English Bilingual Collection Tagalog Edition*

A triumphant tale of self-discovery, a celebration of a family's rich heritage, and a love letter to American immigrant freedom. I Was Their American Dream is at once a journal of growing up and a reminder of the thousands of immigrants who come to America in search for a better life for themselves and their children. The daughter of parents with unfulfilled dreams themselves, Malaka navigated her childhood chasing her parents' ideals, learning to code-switch between her family's Filipino and Egyptian customs, adapting to white culture to fit in, crushing on skater boys, and trying to understand the tension between holding onto cultural values and trying to be an all-American kid. In a graphic novel format, Malaka Gharib's illustrations bring to life her teenage antics and illuminate earnest questions about identity and culture, while providing thoughtful insight into the lives of modern immigrants and the generation of millennial children they raised. Malaka's upbringing will look familiar to anyone who grew up in the pre-internet era, but her particular story is a heartfelt tribute to the American immigrants who have invested their future in the promise of the American dream.

When he's not working at The Pie Who Loved Me (a spy-themed pizza shop) or passing the time with his girlfriend Sab (occasionally in one of their town's seventeen cemeteries), he carefully avoids the spotlight. But Excel knows that his family is far from normal. His mother, Maxima, was once a Filipina B-movie action star who now makes her living scamming men online. The old man they live with is not his grandfather, but Maxima's lifelong martial arts trainer. And years ago, on Excel's tenth birthday, Maxima revealed a secret that he must keep forever. "We are 'TNT'—tago ng tago," she told him, "hiding and hiding." Excel is undocumented—and one accidental slip could uproot his entire life. Casting aside the paranoia and secrecy of his childhood, Excel takes a leap, joining Sab on a journey south to a ramshackle desert town called Hello City. Populated by drifters, old hippies, and washed-up techies—and existing outside the normal constructs of American society—Hello City offers Excel a chance to forge his own path for the first time. But after so*

many years of trying to be invisible, who does he want to become? And is it possible to put down roots in a country that has always considered you an outsider? Thrumming with energy and at once critical and hopeful, The Son of Good Fortune is a luminous story of a mother and son testing the strength of their bond to their country—and to each other.

In her debut cookbook, acclaimed chef Angela Dimayuga shares her passion for Filipino food with home cooks. Filipinx offers 100 deeply personal recipes—many of them dishes that define home for Angela Dimayuga and the more than four million people of Filipino descent in the United States. The book tells the story of how Dimayuga grew up in an immigrant family in northern California, trained in restaurant kitchens in New York City—learning to make everything from bistro fare to Asian-American cuisine—then returned to her roots, discovering in her family's home cooking the same intense attention to detail and technique she'd found in fine dining. In this book, Dimayuga puts a fresh spin on classics: adobo, perhaps the Filipino dish best known outside the Philippines, is traditionally built on a trinity of soy sauce, vinegar, and garlic—all pantry staples—but add coconut milk, vinegar, and oil, and it turns lush and silky; ribeye steaks bring extra richness to bistek, gilded with butter and a bright splash of lemon and orange juice. These are the punches of flavor and inspired recipes that home cooks have been longing for. A modern, welcoming resource for this essential cuisine, Filipinx shares exciting and approachable recipes everyone will wholeheartedly embrace in their own kitchens.

Red and Yellow, Black and Brown gathers together life stories and analysis by twelve contributors who express and seek to understand the often very different dynamics that exist for mixed race people who are not part white. The chapters focus on the social, psychological, and political situations of mixed race people who have links to two or more peoples of color— Chinese and Mexican, Asian and Black, Native American and African American, South Asian and Filipino, Black and Latino/a and so on. Red and Yellow, Black and Brown addresses questions surrounding the meanings and communication of racial identities in dual or multiple minority situations and the editors highlight the theoretical implications of this fresh approach to racial studies.

This text offers a hermeneutic phenomenological exploration of the lived experiences of Filipinx American teachers in U.S. schools, classrooms, and colleges. By drawing on one-on-one dialogues, group discussion, and reflective writing, the text identifies racial, cultural, and linguistic barriers that members of this minority group have faced in their training and practice as educators. The text questions the underrepresentation of Filipinx Americans amongst U.S. teaching staff, and identifies causes both within the Filipino community, and via external factors, including the absence of Filipino culture in curricula, as well as a lack of peer support in the development of Asian American teacher identities. This timely volume highlights the need to expand diversity teacher education to create a more racially diverse and inclusive workforce.

Offering rich insight into the experiences of Filipinx American teachers, this volume will be of interest to students, scholars and researchers drawn to studies of multicultural education, as well as teacher education.

Filipino Americans, like many ethnic groups in America, are complex and heterogeneous. This book documents how Filipino Americans have grown within the context of political forces, the prevailing social order, rights and responsibilities of individuals, economic success, and the American Dream. Lott shows how Filipino Americans have become active participants in the American democracy and why active civic participation is crucial to any emerging ethnic group. Her controversial thesis is that the twenty-first century will not be defined by the color line but by a more basic human relationship-the adult/child connection-because no society can survive without sustained commitment and shared sacrifice by adult men and women for the welfare of future generations.

Decentering Whiteness in Mixed Race Studies

Colorism is defined as "discriminatory treatment of individuals falling within the same 'racial' group on the basis of skin color." That is, some people, particularly women, are treated better or worse on account of the color of their skin relative to other people who share their same racial category. Colorism affects Asian Americans from many different backgrounds and who live in all different parts of the United States. *Is Lighter Better?* discusses this often-overlooked topic. Rondilla and Spickard ask important questions like: What are the colorism issues that operate in Asian American communities? Are they the same issues for all sorts of Asian Americans—for women and for men, for immigrants and the American born, for Chinese, Filipinos, Koreans, Vietnamese, and all the other sorts of Asian Americans?

Filipino Americans are projected to become the largest Asian American population

by 2010. As the second largest immigrant group in the country, there are approximately 3 million documented and undocumented Filipino Americans in the US. Filipino Americans are unique in many ways. They are descendants of the Philippines, a country that was colonized by Spain for over three centuries and by the US for almost 50 years. They are the only ethnic group that has been categorized as Asian American, Pacific Islander, Hispanic, and even as their own separate ethnicity. Because of diverse phenotypes, they are often perceived as being Asian, Latino, multiracial, and others. And contrary to the Model Minority Myth, Filipino Americans have experienced several health, psychological, and educational disparities, including lower college graduation rates and higher levels of cardiovascular disease, diabetes, obesity, teen pregnancy, HIV/AIDS, substance abuse, depression, and suicide. Despite these disparaging statistics, Filipino Americans have made significant contributions to the US, ever since their first arrivals in October 1587- from their involvement in the United Farmworkers Movement to their roles in hip-hop culture and their presence in medicine, education, and the arts. However, Filipino Americans have also been referred to as the "Forgotten Asian Americans" because of their invisibility in mainstream media, academia, and politics. *Filipino American Psychology: A Collection of Personal Narratives* offers an intimate look at the lives of Filipino Americans through stories involving ethnic identity, colonial mentality, cultural conflicts, and experiences with gender, sexual orientation, and multiraciality. Writers courageously address how they cope with mental health issues- including depression, anxiety, post-traumatic stress, and suicide. Theories and concepts from the book's predecessor, *Filipino American Psychology: A Handbook of Theory, Research, and Clinical Practice* can be applied through the voices of a diverse collection of Filipino Americans.

But in this inspiring field guide to dropping out of the attention economy, artist and critic Jenny Odell shows us how we can still win back our lives. Odell sees our attention as the most precious—and overdrawn—resource we have. And we must actively and continuously choose how we use it. We might not spend it on things that capitalism has deemed important ... but once we can start paying a new kind of attention, she writes, we can undertake bolder forms of political action, reimagine humankind's role in the environment, and arrive at more meaningful understandings of happiness and progress. Far from the simple anti-technology screed, or the back-to-nature meditation we read so often, *How to do Nothing* is an action plan for thinking outside of capitalist narratives of efficiency and techno-determinism. Provocative, timely, and utterly persuasive, this book will change how you see your place in our world.

But she was one of eight children in the Concepcion family, whose ancestry Samaha traces in this. . . powerful book." –The New York Times A journalist's powerful and incisive account of the forces steering the fate of his sprawling Filipino American family reframes how we comprehend the immigrant experience Nearing the age at which his mother had migrated to the US, part of the wave of non-Europeans who arrived after immigration quotas were relaxed in 1965, Albert Samaha began to question the ironclad belief in a better future that had inspired her family to uproot themselves from their birthplace. As she, her brother Spanky—a rising pop star back in Manila, now working as a luggage handler at San Francisco airport—and others of their generation struggled with setbacks amid mounting instability that seemed to keep prosperity ever out of reach, he wondered whether their decision to abandon a middle-class existence in the Philippines had been worth the cost. Tracing his family's history through the region's unique geopolitical roots in Spanish colonialism, American intervention, and Japanese occupation, Samaha fits their arc into the wider story of global migration as determined by chess moves among superpowers. Ambitious, intimate, and incisive,

This is the first volume to explore the link between family language policy, practice and management in the light of state and community language policy in more than 20 ethno-linguistic communities worldwide. Contributions by leading scholars from eight countries and three continents offer insights in how family language policy might be interpreted from various theoretical perspectives, using innovative methodologies. In particular, the authors present novel data on successful family language practices such as faith-related literacy activities and homework sessions, as well as management, including prayer, choice of bilingual education, and links with mainstream and complementary learning, which permit the realization of language ideology within three contexts:

immigrant families, inter-marriage families, and minority and majority families in conflict-ridden societies.

Home to immigrants from more than 140 countries speaking over 180 languages, Los Angeles is a microcosm of the world. While Los Angeles' ethnic enclaves have been the subject of study by researchers from a wide range of fields, these enclaves remain under-researched from a linguistic standpoint. Multilingual La La Land addresses the sociolinguistic landscape of the Greater Los Angeles (GLA) area, providing in-depth accounts of the sixteen most spoken languages other than English in the region. Each chapter introduces the history of the language in the L.A. region, uses census figures and residential densities to examine location-based and network-based speech communities, and discusses the patterns of usage that characterize the language, including motivations to maintain the language. How these patterns and trends bear on the vitality of each language is a central consideration of this book.
