

Mzuzu Technical College As Classic Centre For Msce Results

Focuses on digital violence and discrimination, cybercrime, digital transformation, and practices and studies related to digital violence. The book introduces and guides users through current best practices, laboratory methods, policies, protocols, and more within international digital violence and discrimination.

Food Crop Production by Smallholder Farmers in Southern Africa: Challenges and Opportunities for Improvement evaluates traditional cultivation practices used by smallholder farmers, providing a synthesis of the latest information on increasing crop yield through adoption of research innovations. The book catalogs smallholder cultivation practices and recommends innovative strategies for improving the agriculture sector including: management practices that reduce net carbon emissions; technologies that improve soil structures and conserve the natural resources base; means of empowering female resources along value chains; and government commitment to adopt policies that enhance agriculture productivity by encouraging farmers to use environmentally sound cultivation technologies. Traditional farming techniques often produce negative impacts on the environment and ecosystem resulting in outbreaks of diseases and pests. In addition to the region’s recurrent droughts, these outbreaks of numerous diseases and pests, weeds and other invasive plants put thousands at risk of poverty and hunger, as well as malnutrition. This book presents enhanced agricultural production technologies for ensuring adequate food production, safety and nutritional quality for the population of Southern Africa and forms the basis for an increased SADC regional effort in food production through which financial and trade institutions can improve stakeholder capacities, encourage micro-enterprise development and enhance employment and regional trade. Provides a critical synthesis of data and information for increasing crop yield through adoption of research innovations Evaluates traditional and scientific interventions that address food security issues of the poor farmers in the region Presents agro-ecologies of countries in the region and how they relate to various cultivation practices Catalogs smallholder cultivation practices and recommends innovative strategies for improving the agriculture sector

As the use of remote work has recently skyrocketed, digital transformation within the workplace has gone under a microscope, and it has become abundantly clear that the incorporation of new technologies in the workplace is the future of business. These technologies keep businesses up to date with their capabilities to perform remote work and make processes more efficient than ever before.

In understanding digital transformation in the workplace there needs to be advanced research on technology, organizational change, and the impacts of remote work on the business, the employees, and day-to-day work practices. This advancement to a digital work culture and remote work is rapidly undergoing major advancements, and research is needed to keep up with both the positives and negatives to this transformation. The Research Anthology on Digital Transformation, Organizational Change, and the Impact of Remote Work contains hand-selected, previously published research that explores the impacts of remote work on business workplaces while also focusing on digital transformation for improving the efficiency of work. While highlighting work technologies, digital practices, business management, organizational change, and the effects of remote work on employees, this book is an all-encompassing research work intended for managers, business owners, IT specialists, executives, practitioners, stakeholders, researchers, academicians, and students interested in how digital transformation and remote work is affecting workplaces.

This book addresses groundwater governance, a subject internationally recognized as crucial and topical for enhancing and safeguarding the benefits of groundwater and groundwater-dependent ecosystems to humanity, while ensuring water and food security under global change. The multiple and complex dimensions of groundwater governance are captured in 28 chapters, written by a team of leading experts from different parts of the world and with a variety of relevant professional backgrounds. The book aims to describe the state-of-the-art and latest developments regarding each of the themes addressed, paying attention to the wide variation of conditions observed around the globe. The book consists of four parts. The first part sets the stage by defining groundwater governance, exploring its emergence and evolution, framing it through a socio-ecological lens and describing groundwater policy and planning approaches. The second part discusses selected key aspects of groundwater governance. The third part zooms in on the increasingly important linkages between groundwater and other resources or sectors, and between local groundwater systems and phenomena or actions at the international or even global level. The fourth part, finally, presents a number of interesting case studies that illustrate contemporary practice in groundwater governance. In one volume, this highly accessible text not only familiarizes water professionals, decision-makers and local stakeholders with groundwater governance, but also provides them with ideas and inspiration for improving groundwater governance in their own environment.

Don’t Settle for More Most of us know we own too much stuff. We feel the weight and burden of our clutter, and we tire of cleaning and managing and organizing. While excess consumption leads to bigger houses, faster cars, fancier technology, and cluttered homes, it never brings happiness. Rather, it results in a desire for more. It redirects our greatest passions to things that can never fulfill. And it distracts us from the very life we wish we were living. Live a better life with less. In The More of Less, Joshua Becker helps you... • Recognize the life-giving benefits of owning less • Realize how all the stuff you own is keeping you from pursuing your dreams • Craft a personal, practical approach to decluttering your home and life • Experience the joys of generosity • Learn why the best part of minimalism isn’t a clean house, it’s a full life The beauty of minimalism isn’t in what it takes away. It’s in what it gives. Make Room in Your Life for What You Really Want “Maybe you don’t need to own all this stuff.” After a casual conversation with his neighbor on Memorial Day 2008, Joshua Becker realized he needed a change. He was spending far too much time organizing possessions, cleaning up messes, and looking for more to buy. So Joshua and his wife decided to remove the nonessential possessions from their home and life. Eventually, they sold, donated, or discarded over 60 percent of what they owned. In exchange, they found a life of more freedom, more contentment, more generosity, and more opportunity to pursue the things that mattered most. The More of Less delivers an empowering plan for living more by owning less. With practical suggestions and encouragement to personalize your own minimalist style, Joshua Becker shows you why minimizing possessions is the best way to maximize life. Are you ready for less cleaning, less anxiety, and less stress in your life? Simplicity isn’t as complicated as you think.

Presents conceptual and methodological issues related to the use of Participatory Development Communication (PDC). This book describes the major issues involved in applying PDC to natural resource management practices and research, and also discusses the challenges and the difficulties linked to such an approach.

Mapping research and innovation in the Republic of Malawi

Volume III: Fruits

A popular minimalist blogger and author of The More of Less shows you how to methodically turn your home into a place of peace, contentment, and purposeful living. One of today's most influential minimalist advocates takes us on a decluttering tour of our own houses and apartments, showing us how to decide what to get rid of and what to keep. He both offers practical guidelines for simplifying our lifestyle at home and addresses underlying issues that contribute to over-accumulation in the first place. The purpose is not just to create a more inviting living space. It's also to turn our life's HQ--our home--into a launching pad for a more fulfilling and productive life in the world.

An anthology designed for the enjoyment and instruction of students from junior-secondary school onwards. The poems focus on aspects central to African life and culture: lover, identity, death, village life, separation, power and freedom. Guidance for teachers is included. The emergence of mobile money and other new forms of payment has changed the sovereign foundations of money. Starting as a Department for International Development funded project in Kenya, mobile money has now spread to many developing countries. This book looks at the regulatory issues that mobile money poses, and the potential risks to the financial system. It undertakes a comparative study of mobile money regimes in Kenya, Mala?i, Tanzania, and South Africa. Although the main study is on Mala?i, the lessons learnt are valuable to Sub Saharan Africa in understanding the regulatory issues surrounding mobile money. The main argument that this book makes is that the traditional regulatory architecture of supervising the financial services is ill-suited to supervise new forms of money like mobile money.

With no requirement for a bank account, mobile money is not subject to prudential regulation. Mobile money is now considered a key developmental tool to achieve financial inclusion among the poor, rural based, unbanked, and underbanked. As opposed to traditional additive forms of financial inclusion, mobile money is transformative. In most jurisdictions where it has been launched, mobile money has largely been regulated using light-touch, with regulation following innovation. This work, however, proposes an approach based on the concept of really responsive regulation. This approach is best suited to embrace mobile money as it passes from the pre-financial inclusion to the post-financial inclusion phases of its evolution. This book will appeal to students and academics in the financial regulation field.

This country-by-country survey of educational systems provides detailed essays on the histories, legal foundations, and primary and secondary educational systems of 233 countries. This updated and expanded edition gives users up-to-date coverage of reorganized educational systems and high-interest topics such as technological advances.

In Cooking Data Crystal Biruk offers an ethnographic account of research into the demographics of HIV and AIDS in Malawi to rethink the production of quantitative health data. While research practices are often understood within a clean/dirty binary, Biruk shows that data are never clean; rather, they are always "cooked" during their production and inevitably entangled with the lives of those who produce them. Examining how the relationships among fieldworkers, supervisors, respondents, and foreign demographers shape data, Biruk examines the ways in which units of information—such as survey questions and numbers written onto questionnaires by fieldworkers—acquire value as statistics that go on to shape national AIDS policy. Her approach illustrates how on-the-ground dynamics and research cultures mediate the production of global health statistics in ways that impact local economies and formulations of power and expertise.

In this case study of Kenya’s Nairobi Chapel and its “daughter” Mavuno Church, Wanjiru M. Gitau offers analysis of the rise, growth, and place of megachurches worldwide in the new millennium. This engaging account centers on the role of millennials in responding to the dislocating transitions of globalization in postcolonial Africa and around the world, gleaming practical wisdom for

postdenominational churches everywhere.

International Handbook of Universities

First published in 1959 by the International Association of Universities (IAU), the International Handbook of Universities provides detailed information on Education Systems and higher education institutions that offer at least a four-year degree or a four-year professional diploma. For Education Systems: Description of the higher education system of each country Stages of studies as well as information on distance education Admission criteria, including information for foreign students Quality assurance and recognition systems Contact details for national bodies For Institutions: Contact details: name, address, telephone, fax, website Historical background, special facilities and publications Degrees and diplomas offered at each level of study Key personnel, including principal academic and administrative officers Description of facilities, schools and departments Valuable information on academic year, admission requirements, academic staff and student numbers

The spirit of the poetic flowering of the 1960s is encapsulated in this comprehensive anthology. The collection gives voice to some fifty poets from Kenya, Uganda and Zambia, writing in English. The diversity of the interests and styles of the individual poets is illustrated: a blend of the gentle lyricism that is a feature of East African writing. All the major poets are included, and many not so well known. Amongst the best known are Jared Angira, Jonathan Kariara, Joseph Kariuki, Taban Lo Liyong, Okot p’Bitek, and David Rubadiri - one of the editors.

This book is the third in a series evaluating underexploited African plant resources that could help broaden and secure Africa’s food supply. The volume describes 24 little-known indigenous African cultivated and wild fruits that have potential as food- and cash-crops but are typically overlooked by scientists, policymakers, and the world at large. The book assesses the potential of each fruit to help overcome malnutrition, boost food security, foster rural development, and create sustainable landcare in Africa. Each fruit is also described in a separate chapter, based on information provided and assessed by experts throughout the world. Volume I describes African grains and Volume II African vegetables.

Overcoming Distraction to Pursue a More Meaningful Life

Knowledge for a Sustainable World

Discover practical steps you can take today to live a life focused on things that matter, from the bestselling author of The More of Less and The Minimalist Home. “Things That Matter points the way to free ourselves from the distractions of everyday life so that we can build the lives we seek to create.”—Gretchen Rubin, author of The Happiness Project Do you want to live a meaningful life—with very few regrets—and make a positive difference in the world? But is culture distracting you from doing so? Perhaps moments, days, and years go by without you stopping to ask yourself, Am I living out my true purpose? Even if that question whispers to you, are you brushing it aside because you don’t know what to change in life’s busyness? In Things That Matter, Joshua Becker helps you identify the obstacles—such as fear, technology, money, possessions, and the opinions of others—that keep you from living with intention, and then he provides practical ideas for letting go of those distractions today so you can focus on what matters most. He uses practical exercises and questions, insights from a nationwide survey, and success stories to give you the motivation you need to • identify the pursuits that matter most to you • align your dreams with your daily priorities • recognize how money and possessions keep you from happiness • become aware of how others’ opinions of you influence your choices • embrace what you’re truly passionate about instead of planning that next escape • figure out what to do with all those emails, notifications, and pings • let go of past mistakes and debilitating habits Things That Matter is a book about living well. It’s about overcoming the chatter of a world focused on all the wrong things. It’s about rethinking the common assumptions of today to find satisfaction and fulfillment tomorrow. How do we get to the end of our lives with minimal regrets? We set aside lesser pursuits to seek lasting meaning. And we discover the joy of doing it every day.

The search for answers to the issue of global sustainability has become increasingly urgent. In the context of higher education, many universities and academics are seeking new insights that can shift our dependence on ways of living that rely on the exploitation of so many and the degradation of so much of our planet. This is the vision that drives SANORD and many of the researchers and institutions within its network. Although much of the research is on a relatively small scale, the vision is steadily gaining momentum, forging dynamic collaborations and pathways to new knowledge. The contributors to this book cover a variety of subject areas and offer fresh insights about chronically under-researched parts of the world. Others document and critically reflect on innovative approaches to cross-continental teaching and research collaborations. This book will be of interest to anyone involved in the transformation of higher education or the practicalities of cross-continental and cross-disciplinary academic collaboration. The Southern African-Nordic Centre (SANORD) is a network of higher education institutions from Denmark, Finland, Iceland, Norway, Sweden, Botswana, Namibia, Malawi, South Africa, Zambia and

Zimbabwe. Universities in the southern African and Nordic regions that are not yet members are encouraged to join. The Handbook, now in its 15th edition, is the only official guide to universities throughout the world. The information is truly authoritative, based on data collected by the International Association of Universities from official information supplied by national education bodies and the institutions themselves. It is the most comprehensive reference of its kind, available with information and statistics on courses of study, fees, personnel, and so on from over 6,000 universities in over 170 countries.Listings include: -- Full address details, including e-mail and World Wide Web addresses -- Names of key personnel -- administrative and academic -- General description and history -- Special facilities -- Information on fees -- Admission requirements -- Degrees and diplomas offered -- Academic year dates -- Language instruction -- Links with other universities -- Description of academic divisions with number of staff and students per faculty.

Reflexivity and Critical Pedagogy is concerned with understanding the complex political, cultural and psycho-social dynamics that define knowledge and that constitute the contexts in which learning takes place. Reflexivity is key to achieving truly useful approaches to knowledge creation and dissemination. With 86 easy, 5-ingredient Dutch oven recipes, this compact Dutch oven cookbook can go anywhere you can. For outdoor enthusiasts, there are few pastimes more enjoyable than camping. And as any camping buff will tell you, the less you have to bring along, the better. When it comes to meal planning, the question becomes: how do you make delicious, nourishing meals when camping? The answer is simple--the Dutch oven. As a lifelong camper and author of the bestselling Campfire Cuisine, Robin Donovan knows that there's more to "camp food" than canned beans, hot dogs, and freeze-dried noodles. She also knows that the key to good camp cooking is simplicity, which is easy with just a few fresh ingredients, some simple cooking techniques, and your trusty Dutch oven. In The Camp Dutch Oven Cookbook, Robin shares her tried-and-true recipes for cooking breakfasts, lunches, dinners, and desserts that go beyond what you'd expect of campfire meals without much more than a little extra effort. And with its compact size, this Dutch oven cookbook is the perfect pack-and-go companion for those who want to enjoy their camp meals just as much as they do camping itself. The Camp Dutch Oven Cookbook offers everything you need to create flavorful Dutch oven meals under the stars, including: 86 simple recipes requiring no more than 5 main ingredients each A portable, lightweight format so you can bring your Dutch oven cookbook anywhere you camp Handy tips for creating your own Camp Cooking Kit complete with pantry staples and essential equipment Quick-start guidance for safely and easily preparing the best campfire for successful cooking Gone are the days of settling for mediocre camping meals. With The Camp Dutch Oven Cookbook, you'll enjoy recipes such as Blueberry Breakfast Cake, Slow-Cooked Beef Stew, Dutch Oven Pizza Margherita, Butter and Garlic Baked Shrimp, Honey-Sweetened Cornbread, Quick and Easy Peach Pie, and much more.**

African Christianity is not an imported religion but rather one of the oldest forms of Christianity in the world. In The Kingdom of God in Africa, Mark Shaw and Wanjiru M. Gitau trace the development and spread of African Christianity through its two-thousand year history, demonstrating how the African church has faithfully testified to the power and diversity of God's kingdom. Both history and theology are explored through the lives of African churches, figures and movements across the continent conceptualized the kingdom of God and manifested it through their actions. The only up-to-date, single-volume study of its kind, this book also includes maps and statistics that aid readers to absorb the rich history of African Christianity and discover its impact on the rest of the world. Makes a significant contribution to the sustainable urbanisation agenda through authoritative interventions contextualising, assessing and explaining the relevance and importance of three central characteristics of sustainable towns and cities everywhere: that they be accessible, green and fair. Africa's Informal Workers is a vigorous examination of the informalization and casualization of work, which is changing livelihoods in Africa and beyond. Gathering cases from nine countries and cities across sub-Saharan Africa, and from a range of sectors, this volume goes beyond the usual focus on household 'coping strategies' and individual agency, addressing the growing number of collective organizations that are emerging and articulating their demands and interests. The emerging picture is that of a highly diverse landscape of organized actors, providing grounds for tension but also opportunities for alliance. The collection examines attempts at organizing across the formal-informal work spheres, and explores the novel trend of transnational organizing by informal workers. Part of the ground-breaking Africa Now series, this book offers a new perspective on economic, political and social transformations. teachings from the Bible. Some of the stories are pretty hilarious; and others are sad and sorrowful. Her life story will have you laughing, then crying-and then pausing for a moment, to contemplate what it means to have faith. The amazing story of her mother's faith to still find her two kidnapped sons is beyond anybody's compelling imagination. These stories in Tecla's life makes you re-examine your own beliefs, and then seek a clearer path in your travels as well as filled with a desire to live by faith. You will certainly learn how to grow into your own absolute potential, simply by following God's directions. You will also discover that life's greatest accomplishment is doing the will of God, by tapping into your faith. I've had the distinct pleasure of copy-editing this book and offering suggestions on its form; I found the task both inspirational and heart-rending. Tecla's story (like that of her mother, as briefly summarized in the first chapter, dedicated to that strong and faith-filled woman) will certainly lift the spirits of any reader currently walking through the Fires of adversity and life-challenges. It also motivates us to reflect on the (comparatively mild) obstacles we may encounter in our daily lives, to find the courage to rise above them, in partnership with God and our Faith, and to move forward along our own Highway of Holiness.-Steve Trinward, Editor

Rural movements have recently emerged to become some of the most important social forces in opposition to neoliberalism. From Brazil and Mexico to Zimbabwe and the Philippines, rural movements of diverse political character, but all sharing the same social basis of dispossessed peasants and unemployed workers, have used land occupations and other tactics to confront the neoliberal state. This volume brings together for the first time across three continents - Africa, Latin America and Asia - an intellectually consistent set of original investigations into this new generation of rural social movements. These country studies seek to identify their social composition, strategies, tactics, and ideologies; to assess their relations with other social actors, including political parties, urban social movements, and international aid agencies and other institutions; and to examine their most common tactic, the land occupation, its origins, pace and patterns, as well as the responses of governments and landowners. At a more fundamental level, this volume explores the ways in which two decades of neoliberal policy - including new land tenure arrangements intended to hasten the commodification of land, and new land uses linked to global markets -- have undermined the social reproduction of the rural labour force and created the conditions for popular resistance. The volume demonstrates the longer-term potential impact of these movements. In economic terms, they raise the possibility of tackling immiseration by means of the redistribution of land and the reorganisation of production on a more efficient and socially responsible basis. And in political terms, breaking the power of landowners and transnational capital with interests in land could ultimately open the way to an alternative pattern of capital accumulation and development.

Conservation Biology in Sub-Saharan Africa comprehensively explores the challenges and potential solutions to key conservation issues in Sub-Saharan Africa. Easy to read, this lucid and accessible textbook includes fifteen chapters that cover a full range of conservation topics, including threats to biodiversity, environmental laws, and protected areas management, as well as related topics such as sustainability, poverty, and human-wildlife conflict. This rich resource also includes a background discussion of what conservation biology is, a wide range of theoretical approaches to the subject, and concrete examples of conservation practice in specific African contexts. Strategies are outlined to protect biodiversity whilst promoting economic development in the region. Boxes covering specific themes written by scientists who live and work throughout the region are included in each chapter, together with recommended readings and suggested discussion topics. Each chapter also includes an extensive bibliography. Conservation Biology in Sub-Saharan Africa provides the most up-to-date study in the field. It is an essential resource, available on-line without charge, for undergraduate and graduate students, as well as a handy guide for professionals working to stop the rapid loss of biodiversity in Sub-Saharan Africa and elsewhere.

A Green Revolution in the Making?

Referred to in the Bible, pictured on the wall-friezes of ancient Egyptian tombs, and a subject of fascination for generations of scientists, the tilapias (Cichlidae: Tilapiini) have featured in the diet and culture of humankind for thousands of years. The present century has seen their spread from Africa throughout the tropics and sub-tropics, largely for food and fisheries purposes. This book attempts to pull together our knowledge of this important group - their biology and fisheries and aquaculture - in a single volume, something that has not been done comprehensively for nearly two decades. A succession of chapters by acknowledged authorities covers evolution, phylogenetic relationships and biogeography, reproductive biology, mating systems and parental care, diet, feeding and digestive physiology, environmental physiology and energetics, the role of tilapias in ecosystems, population dynamics and management, genetics, seed production, nutrition, farming, economics and marketing. The book is aimed at biologists, fisheries scientists, aquaculturists, and all interested in aquatic ecology.

Updated to align with the American Psychological Association and the National Council of Accreditation of Teacher Education accreditation requirements. Focused on increasing the credibility of research and evaluation, the Fifth Edition of Research and Evaluation in Education and Psychology: Integrating Diversity with Quantitative, Qualitative, and Mixed Methods incorporates the viewpoints of various research paradigms into its descriptions of these methods. Students will learn to identify, evaluate, and practice good research, with special emphasis on conducting research in culturally complex communities, based on the perspectives of women, LGBTQ communities, ethnic/racial minorities, and people with disabilities. In each chapter, Dr. Donna M. Mertens carefully explains a step of the research process—from the literature review to analysis and reporting—and includes a sample study and abstract to illustrate the concepts discussed. The new edition includes over 30 new research studies and contemporary examples to demonstrate research methods including: Black girls and school discipline: The complexities of being overrepresented and understudied (Annamma, S.A., Anyon, Y., Joseph, N.M., Farrar, J., Greer, E., Downing, B., & Simmons, J.) Learning Cooperatively under Challenging Circumstances: Cooperation among Students in High-Risk Contexts in El Salvador (Christine Schmalenbach) Replicated Evidence of Racial and Ethnic Disparities in Disability Identification in U.S. Schools (Morgan, et. al.) Relation of white-matter microstructure to reading ability and disability in beginning readers (Christodoulou, et. al.) Arts and mixed methods research: an innovative methodological merger (Archibald, M.M. & Gerber, N.)
