From subject-specific titles to test prep workbooks, Spectrum offers a variety of ways to enhance and enrich learning at home and in the classroom. For all of your child's need, Spectrum has you covered!

The purpose of this manual is to teach you how to examine yourself biblically so you can live in a manner that pleases the Lord and help others to do the same. The material in this manual also has been used in Bible studies for youth and adults, classes for Christian students (junior high, high school, college, and seminary level), courses of study designed to prepare missionaries for their ministry, evangelism training, discipleship training in prison ministries, Sunday school classes, home group studies, personal devotional studies, and Scripture memorization programs. In addition, it has proved valuable as a resource for pastors, counselors, health care professionals, personnel managers, educators, social workers and other professionals who are responsible to deal with personal and interpersonal problems. As you progress through this manual, you will discover many other uses for this material in your life and personal ministry. Please do not be intimidated by the volume of Scripture references contained in this manual. A new believer in Jesus Christ can find great comfort and help from looking up only one verse out of many that are listed on a particular subject. On the other hand, the Bible scholar or seminary student may desire to research many of the Scripture references from the original languages of the Bible. No matter how proficient you are in using Scripture, this manual encourages you to rely on the Word of God to discover God's sufficiency for every aspect of your life.

Subtraction skills are a necessary building block to create solid math proficiency. Spectrum(R) Subtraction for grade 2 provides standards-based practice to help children use visual models to represent problems, understand unknown number equations, and strengthen place value strategies. The book, Etiquette Lessons is a collection of the good manners parents want their children to know. Girls & Boys at the Table & Teens at the Table Part I and II are easy to use instructional programs containing a series of 45 minute classes in table manners, social behavior etiquette and introduction to Ballroom Dance. These two courses are designed for groups of children and young people ages five through twelve and thirteen through nineteen. Each program includes detailed lesson plans to help educators guide students through lessons such as how to use napkins and eating utensils to how to dress for dinner. Each lesson is presented with a light snack and beverage. Convenient instructions allow you to order Etiquette Achievement Certificates and Student Keepsake Booklets for presentation to program graduates. In addition to basic table manners, teens learn tips on grooming, how to eat different foods, make introductions, write social correspondence, the art of conversation and Cotillion Dance Floor Etiquette. Each lesson ends with a quiz to help evaluate and insure program effectiveness. All receive social skills that will last a lifetime. "Our experience with Mrs. Reilly's Etiquette Course was magnificent."-Ms. L., Mrs. N., Mrs. K., a Montessori School "Wait until you see this program, this is brilliant!"-Mrs. S.D., Publisher "Ours is the practical and natural approach to etiquette training. Young people study these lessons gaining confidence and skill together. They soon begin to conform to the roles of ladies and gentlemen at the table. We strive to prepare our students to dine capably and independently. We review and reinforce good manners taught at home adding nuances of fine dining etiquette. This system of dining and social behavior creates opportunities for each graduate's best traits to shine through."-Teresa Kathryn Grisinger Reilly Superb, photocopiable resource sheets written in clear language and layout. There are support and extension sheets included, and unique self-evaluation sheets for children to fill in. Target sheets are provided to record successes and problems, allowing progress to be checked and targets to be set for the future.

With the help of Spectrum, your child will build the language arts skills necessary for a lifetime of success.

Go Facts: Teaching guide

Counting Money, Grade 2

Innovative Quality Improvements in Operations

Middle School Math

The Educational Weekly

This book examines current and emerging challenges in manufacturing related to the ideal of developing production processes with variability and agility on one level of the system, combined with structures ensuring stability and robustness on another level; close to what by other scholars has been discussed in terms of continuous innovation. However, this ideal has proven to be difficult to achieve in practice, and there is a need for enhanced and more sophisticated theoretical models dealing with the complexity surrounding organizational conditions to foster incremental as well as radical change in production systems, and, at the same time to ensure stability over time. As a theoretical frame of reference, a perspective on change where conflicting demands and conflicting activities, e.g., exploration and exploitation, are seen as intertwined and interdependent, is used throughout the book. The ideal from this perspective is to make use of such conflicting forces and to develop the change dynamics by keeping them in the same social system, not to structurally separate them in different departments or different initiatives. The main purpose of the book is to address an increased need for quality improvement through innovation and disruptive change in production. Traditional theories and managerial models of production systems are developed with a focus on stability and improvement. There is a need for enhanced models to reach an ability to develop new future production systems. The goal of the book is to provide nuances and new perspectives giving more realistic models of the production system to be able to increase the change potentiality of the organization and thus the long-term competitiveness. Learning and organizational perspectives are in focus as enablers to increase the understanding of a production system as such. Long-term competitiveness through adaptability and the potential for radical improvement is of importance throughout the book. The use of dualities and the concept of ambidextrous organizations as a frame of understanding is the innovative strength for this area.
