Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. How successful have Southern African states been in dealing with the major issues that have faced the region in recent years? What could be done to produce more cohesive and effective region-building in Southern Africa? In this original and wide-ranging volume, which draws on an interdisciplinary team of mainly African and African-based specialists, the key political, socio-economic, and security challenges facing Southern Africa today are addressed. These include the various issues

confronting the Southern African Development Community (SADC) and its institutions; such as HIV/AIDS, migration and xenophobia, land-grabbing and climate change; and the role of the main external actors involved with the region, including the United Nations, the European Union, the United States, and China. The book also looks at the Southern African Customs Union and Southern African Development Finance Institutions, including the Development Bank of Southern Africa and Industrial Development Corporation, and issues of gender and peacebuilding. In doing so, the book goes to the heart of analyzing the effectiveness of SADC and other regional organisation, suggesting how region-building in Southern Africa may

minorities live in more polluted neighborhoods than do other groups. These findings have sparked a broad activist movement, numerous local lawsuits, and several federal policy reforms. Despite the importance of environmental justice, the topic has received little attention from economists. And yet, economists have much to contribute, as several explanations for the correlation between pollution and marginalized citizens rely on market mechanisms. Understanding the role of these mechanisms is crucial to designing policy remedies, for each lends itself to a different interpretation to the locus of injustices. Moreover, the different mechanisms have varied implications for the efficacy of policy responses—and who gains and loses from them. In the first book-length examination of environmental justice from the perspective of economics,
