do. To be creative, you need to engage in the art-making process. When you are "in the flow," you shift out of the future and into the present, making connections, generating variations and surrendering to the process. This ten-year edition of *Keys to Drawing With Imagination* is a course for artists in how to take something, do something to it and make something new. Bert Dodson, author of the best-selling *Keys to Drawing* (more than 250,000 copies sold!) presents fun techniques and mind-stretching strategies to get you drawing better and

more imaginatively than you ever have before. In every section, he offers you basic guidelines that help you channel your creative energies in the right direction. Before you know it, you'll lose yourself in the process, enjoying the experience as you create something gratifying and worthwhile. The subjects covered in this hands-on book are as vast as the imagination itself. Through 58 strategies, 36 exercises and 13 step-by-step demonstrations, you'll explore how to:

This book reports on research and developments in human-technology interaction. A special emphasis is given to human-computer interaction, and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication, and education, among others.

The human aspects are analyzed in detail. Timely studies on human-centered design, wearable technologies, social and affective computing, augmented, virtual and mixed reality simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business, security, and infrastructure are also critically examined, thus offering a timely, scientifically-grounded, but also professionally-oriented snapshot of the current state of the field. The book

is based on contributions presented at the 2nd International Conference on Human Interaction and Emerging Technologies: Future Applications, IHiet-AI 2020, held on April 23-25, in Lausanne, Switzerland. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems.
