"Presents 500 off-the-beaten-path travel destinations around the world that are notable for their vistas, wildlife, and historical and cultural significance"--Provided by publisher.

The world is full of mind-blowing marvels and this book uncovers our planet's most peculiar phenomena, puzzles from the past, eye-opening inventions, astonishing animals, and so much more! Did you know that caterpillars liquefy when they turn into butterflies? That humans shed eight pounds of skin every year? That there's a funky forest in Poland where all the trees are mysteriously crooked? That space smells like burnt plastic? Our world is filled with strange, bizarre, and weird realities. But what do they mean? WHY are they important? And what exactly is the secret behind them? National Geographic Kids presents a jam-packed new series perfect for fans of Weird But True! and 5,000 Awesome Facts. With cool, action-packed photos, tons of awesome information, and filled to the brim with the weirdest facts ever, this book takes readers behind the scenes of the world of the truly bizarre, to reveal the truth behind our planet's wildest and wackiest. Meet the bizarre bacteria that make Yellowstone National Park's Morning Glory Pool pop with radiant color, discover the mysteries behind the Sphinx of ancient Egypt, learn why the beaches of the Maldives glow bright blue, how tornadoes are so powerful, and so much more! And with Q&As with in-the-field experts, fantastic infographics, exciting stories, and more, this book presents a fresh way of looking at our bizarre planet. So, get ready to experience our not-so-secret world.

On the 100th anniversary of Titanic's sinking, National Geographic revisits the romance, glory, and tragedy of this tremendous ship and presents an insider's look at the new findings about the passengers and scientific study of the wreck site. For 100 years the great ship Titanic has rested in its final grave on the ocean floor, lost to deep ocean darkness until its 1985 discovery by National Geographic's Bob Ballard. Relive the spell-binding tragic final hours of the ship in a detailed retelling of the famous story and learn the personal stories of lesser-known passengers, including the "guarantees." For the first time since its discovery, Ballard travels to Belfast to interview descendants of the ship builders and the "guarantee group"--the ill-fated men who traveled on the ship's first voyage to assure its seaworthiness. Understand underwater mapping techniques that have brought Titanic's debris field into high resolution, and get a glimpse of current deep ocean scientific research on the wreckage and the future of underwater exploration.

Explores the mysterious monument of Stonehenge and reveals some of its secrets and history.

Secrets of the National ParksThe Experts' Guide to the Best Experiences Beyond the Tourist TrailNational Geographic Books

Utah has long claimed to have the greatest snow on Earth—the state itself has even trademarked the phrase. In Secrets of the Greatest Snow on Earth, Jim Steenburgh investigates Wasatch weather, exposing the myths, explaining the reality, and revealing how and why Utah's powder lives up to its reputation. Steenburgh also examines ski and snowboard regions beyond Utah, making this book a meteorological guide to mountain weather and snow climates around the world. Chapters explore mountain weather, avalanches and snow safety, historical accounts of weather events and snow conditions, and the basics of climate and weather forecasting.

Steenburgh explains what creates the best snow for skiing and snowboarding in accurate and accessible language and illustrates his points with 150 color photographs, making Secrets of the Greatest Snow on Earth a helpful tool for planning vacations and staying safe during mountain adventures. Snowriders, weather enthusiasts, meteorologists, students of snow science, and anyone who dreams of deep powder and bluebird skies will want to get their gloves on Secrets of the Greatest Snow on Earth.

A guide to the characters and settings of the game "Temple Run" features facts and trivia about ancient civilizations, from Cambodia and Turkey to prehistoric England, ancient Egypt and Greece, and Machu Picchu in Peru.

The best "National Geographic" picks in 32 amazing national parks including Yellowstone's Lamar Valley, the Everglades' Nine Mile Pond Canoe Trail, and Yosemite's exquisite Snow Creek Trail. Informed by park rangers, superintendents, and frequent park visitors, it provides all the inspiration and information to plan a visit beyond the well-trodden, touristy spots.

**Bestselling author Dan Buettner reveals how to transform your health using smart nutrition, lifestyle, and fitness habits gleaned from longevity research on the diets, eating habits, and lifestyle practices of the communities he's identified as "Blue Zones"—those places with the world's longest-lived, and thus healthiest, people, including locations such as Okinawa, Japan; Sardinia, Italy; Costa Rica's Nicoya Peninsula; Ikaria, Greece; and Loma Linda, California. With the audacious belief that the lifestyles of the world's Blue Zones could be adapted and replicated in towns across North America, Buettner launched the largest preventive health care project in the United States, The Blue Zones City Makeovers, which has impacted the health of millions of Americans since 2009. In The Blue Zones Solution, readers can be inspired by the specific stories of the people, foods, and routines of our healthy elders; understand the role community, family, and naturally healthy habits can play in improving our diet and health; and learn the exact foods—including the 50 superfoods of longevity and dozens of recipes adapted for Western tastes and markets—that offer delicious ways to eat your way to optimum health. Throughout the book are lifestyle recommendations, checklists, and stories to help you create your own personal Blue Zones solution. Readers will learn and apply the 80/20 rule, the plant slant diet, social aspects of eating that lead to weight loss and great health naturally, cultivating your "tribe" of friends and family, and your greater purpose as part of your daily routine. Filled with moving personal stories, delicious recipes, checklists, and useful tips that will transform any home into a miniature blue zone, The Blue Zones Solution is the ultimate blueprint for a healthy, happy life.**

Discusses important archeological finds from the Celts' past and reveals how archaeologists use the latest technology to discover clues to ancient Celtic civilization.

Our seas are host to an extraordinary variety of plant and animal life, but much of it remains mysterious and great imagery is surprisingly hard to find. Alex Mustard is one of the world's leading underwater photographers and his images are so crisp and immediate that the animals seem to swim out of the water towards you. This beautiful book gathers together a selection of his award-winning images and a number of new ones to create a vivid picture of the seas and oceans and the animals that inhabit them, each chapter accompanied by a 1500 word essay and extended captions written by leading natural history writer, Professor Callum Roberts. The text addresses the issue of change in the oceans along with tales of oceanography, marine life and human history in the seas and aims to help the reader to get to know the oceans, understand how marine animals live their lives and how they have, are and may well adapt to change.

Briefly describes the ancient civilizations of Pompeii, China, Egypt, and the Americas. Features pop-up and movable illustrations.

Discusses important archeological finds from Africa's past and reveals how archaeologists use the latest technology to discover clues to ancient African civilization.

**There's simply no better getaway in the United States than a visit to one of the country's 62 national parks from Alaska to the Virgin Islands, from Maine to America Samoa. Profiled in this all-new ninth edition of National Geographic's enduring and informative guide, you'll find expert travel advice, candid tips for hiking and wildlife spotting, and detailed maps to help navigate your way through America's great outdoors. Updated throughout with the latest information from park rangers and National Geographic's own acclaimed travel writers, this fully revised and comprehensive guidebook includes the newest additions to the United States park system—Indiana Dunes, White Sands, and Gateway Arch national parks. Whether you're looking to explore the underground world of Mammoth Caves or make your way through the mangroves of Everglades National Park, you'll find a destination that suits your needs, and inspiration to plan your next wild adventure. In addition to park details and descriptions, this sparkling new edition features week-long regional road trip itineraries s so you can visit multiple parks in one vacation. Filled with more than 300 dazzling photographs and 80 full-color maps, this inspiring book reveals the best the United States has to offer—right in its own backyard. Many of us have seen dinosaur bones and skeletons, maybe even dinosaur eggs...but what did those fearsome animals really look like in the flesh? Soft-tissue fossils give tantalizing clues about the appearance and physiology of the ancient animals. In this exciting book, paleontologist Phillip Manning presents the most astonishing dinosaur fossil excavations of the past 100 years—including the recent discovery of a remarkably intact dinosaur mummy in the Badlands of North Dakota. Bone structure is just the beginning of our knowledge today, thanks to amazing digs like these. Drawing on new breakthroughs and cutting-edge techniques of analysis, Dr. Manning takes us on a thrilling, globe-spanning tour of dinosaur mummy finds—from the first such excavation in 1908 to a baby dinosaur unearthed in 1980, from a dino with a heart in South Dakota to titanosaur embryos in Argentina. And he discusses his own groundbreaking analysis of "Dakota," discovered by Tyler Lyson. Using state-of-the-art technology to scan and analyse this remarkable discovery, National Geographic and Dr. Manning create an incredibly lifelike portrait of Dakota. The knowledge to be gained from this exceedingly rare find, and those that came before it, will intrigue dinosaur-loving readers of all ages. This provocative book of photography offers bold new insight into the lives of the world's largest mammals, along with their complex societies. In these pages, we learn that whales share an amazing ability to learn and adapt to opportunities, from specialized feeding strategies to parenting techniques. There is also evidence of deeper, cultural elements of whale identity, from unique dialects to matrilineal societies to organized social customs like singing contests. Featuring the arresting underwater images of Brian Skerry, who has explored and documented oceans for over four decades, this book will document these alluring creatures in all their glory—and demonstrate how these majestic creatures can teach us about ourselves and our planet.**

**An engaging treasury of facts about strange science, masked history and amazing phenomena includes entries ranging from hidden treasure stories and dangers in the animal world to the secret work of spies and tips for spotting forgeries. Simultaneous.**
