From the author of *The Old Ways* and *Underland*, an "eloquent (and compulsively readable) reminder that, though we're laying out a world, nature still holds sway over much of the earth's surface." --Bill McKibben Winner of the Boardman Tasker Prize for Most Original and a finalist for the Orion Book Award Are there any genuinely wild places left in Britain and Ireland? That is the question that Macfarlane poses to himself as he embarks on a series of breathtaking journeys through some of the archipelago's most remarkable landscapes. He climbs, walks, and swims by day and spends his nights sleeping on cliff-tops and in ancient meadows and wild places. With elegance and passion he entwines history, memory, and landscape in a bewitching evocation of wildness and its vital importance.

'A comfortable chair and a Mary Stewart: total heaven. I'd rather read her than most other authors.' Harriet Evans Ashley Court: the tumbledown ancestral home of the Ashley family, all blessed with 'the gift' of being able to speak to each other without words. When Bryony Ashley's father dies under mysterious circumstances, his final words a cryptic warning to her, Bryony returns from abroad to uncover Ashley Court's secrets. What did her father's message mean? What lies at the centre of the overgrown maze in the gardens? And who is trying to prevent Bryony from discovering the truth? Tell Bryony. Nestled by the roadside, peeking through the hedgerows, hidden in the woods and even in city streets and parks, wild food is all around us - if you know where to look. From woodland mushrooms and riverbank redcurrants to garden weeds and urban cherry blossoms, Where the Wild Things Grow takes us on a journey through the forager's landscape.

Drawing on 25 years of foraging experience, David Hamilton show us how and where to hunt for the food that is hidden

all around us. Along the way he delves into the forgotten histories and science of wild foods and their habitats and reveals his many foraging secrets, tips and recipes. You'll discover where to find mallows, mustards and pennywort, as well as sumac, figs and mulberries. You'll learn how to pick the sweetest berries, preserve mushrooms using only a radiator and prepare salads, risottos and puddings all with wild food. In all weathers, landscapes and seasons, David shows us that foraging doesn't just introduce us to new tastes and sensations, it also brings us closer to the natural world on our doorstep. Beautifully illustrated and rich in detail, Where the Wild Things Grow is more than a field guide - it is a celebration of the wonderful and fragile gifts hidden in our landscape.

"The children and nature movement is fueled by this fundamental idea: the child in nature is an endangered species, and the health of children and the health of the Earth are inseparable." —Richard Louv, from the new edition In his landmark work Last Child in the Woods, Richard Louv brought together cutting-edge studies that pointed to direct exposure to nature as essential for a child's healthy physical and emotional development. Now this new edition updates the growing body of evidence linking the lack of nature in children's lives and the rise in obesity, attention disorders, and depression. Louv's message has galvanized an international back-to-nature campaign to "Leave No Child Inside." His book will change the way you think about our future and the future of our children. "[The] national movement to 'leave no child inside' . . . has been the focus of Capitol Hill hearings, state legislative action, grass-roots projects, a U.S. Forest Service initiative to get more children into the woods and a national effort to promote a 'green hour' in each day. . . . The increased activism has been partly inspired by a best-selling book, Last Child in the Woods, and its author, Richard Louv." —The Washington Post "Last Child in the Woods, which describes a generation so plugged into electronic diversions that it has lost its connection to the natural world, is helping drive a movement quickly flourishing across the nation." —The Nation's Health "This book is an absolute must-read for parents." —The Boston Globe Now includes A Field Guide with 100 Practical Actions We Can Take Discussion Points for Book Groups, Classrooms, and Communities Additional Notes by the Author New and Updated Research from the U.S. and Abroad

Secret Gardens

A motley crew of saboteurs wreak outrageous havoc on the corporations destroying America's Western wilderness in this classic, comic extravaganza. When George Washington Hayduke III returns home from war in the jungles of Southeast Asia, he finds the unspoiled West he once knew has been transformed. The pristine lands and waterways are being strip mined, dammed up, and paved over by greedy government hacks and their corrupt corporate coconspirators. And the manic, beer-guzzling, rabidly antisocial ex-Green Beret isn't just getting mad. Hayduke plans to get even. Together with a radical feminist from the Bronx; a wealthy, billboard-torching libertarian MD; and a disgraced Mormon polygamist, Hayduke's ready to stick it to the Man in the most creative ways imaginable. By the time they're done, there won't be a bridge left standing, a dam unblown, or a bulldozer unmolested from Arizona to Utah. Edward Abbey's most popular novel, The Monkey Wrench Gang is an outrageous romp with ultra-serious undertones that is as relevant today as it was in the early days of the environmental movement. The author who Larry McMurtry (Lonesome Dove) once dubbed "The Thoreau of the American West" has written a true comedic classic with brains, heart, and soul that more than justifies the call from the Los Angeles Times Book Review that we should all "praise the earth for Edward Abbey!"

The scientific evidence behind why maintaining a lifestyle more like that of our ancestors will restore our health and well-being. In GO WILD, Harvard Medical School Professor John Ratey, MD, and journalist Richard Manning reveal that although civilization has rapidly evolved, our bodies have not kept pace. This mismatch affects every area of our lives, from our general physical health to our emotional wellbeing. Investigating the power of living according to our genes in the areas of diet, exercise, sleep, nature, mindfulness and more, GO WILD examines how tapping into our core DNA combats modern disease and psychological afflictions, from Autism and Depression to Diabetes and Heart Disease. By focusing on the ways of the past, it is possible to secure a healthier and happier future, and GO WILD will show you how.

Why rush through life when you could stop, ponder and truly experience the world around you? This unhurried exploration of the great outdoors encourages you to engage all of your senses and fully appreciate the beauty of your surroundings. With the emphasis on experiencing, rather than simply passing through, Slow Adventures asks us to pause for a moment and reconnect with nature. Try willow weaving in Somerset, rock pooling in East Sussex, wild camping in Cambridgeshire, foraging in Herefordshire, spoon carving in Cumbria, fossil hunting in Yorkshire, lino printing in Monmouthshire, bushcraft in Northumberland, sea kayaking in Inverness-shire and many more memorable experiences. These immersive adventures will awaken your senses, revive your spirits and allow you to make the most of your time in our glorious countryside.

"Deftly written, gripping and informative. Empire of Wild is a rip-roaring read!" —Margaret Atwood, From Instagram "Empire of Wild is doing everything I love in a contemporary novel and more. It is tough, funny, beautiful, honest and propulsive—all the while telling a story that needs to be told by a person who needs to be telling it." —Tommy Orange, author of There There A bold and brilliant new indigenous voice in contemporary literature makes her American debut with this kinetic, imaginative, and sensuous fable inspired by the traditional Canadian Métis legend of the Rogarou—a werewolf-like creature that haunts the roads and woods of native people's communities. Joan has been searching for her missing husband, Victor, for nearly a year—ever since that terrible night they'd had their

first serious argument hours before he mysteriously vanished. Her Métis family has lived in their tightly knit rural community for generations, but no one keeps the old ways . . . until they have to. That moment has arrived for Joan. One morning, grieving and severely hungover, Joan hears a shocking sound coming from inside a revival tent in a gritty Walmart parking lot. It is the unmistakable voice of Victor. Drawn inside, she sees him. He has the same face, the same eyes, the same hands, though his hair is much shorter and he's wearing a suit. But he doesn't seem to recognize Joan at all. He insists his name is Eugene Wolff, and that he is a reverend whose mission is to spread the word of Jesus and grow His flock. Yet Joan suspects there is something dark and terrifying within this charismatic preacher who professes to be a man of God . . . something old and very dangerous. Joan turns to Ajean, an elderly foul-mouthed card shark who is one of the few among her community steeped in the traditions of her people and knowledgeable about their ancient enemies. With the help of the old Métis and her peculiar Johnny-Cash-loving, twelve-year-old nephew Zeus, Joan must find a way to uncover the truth and remind Reverend Wolff who he really is . . . if he really is. Her life, and those of everyone she loves, depends upon it.

'A careful and thoughtful provocation' (Justin Welby, Archbishop of Canterbury) Ambitiously placed at the intersection of scientific insights and spiritual wisdom, Human Flourishing prompts us to reflect on what constitutes a good life and the choices that can help achieve it. For thousands of years, humans have asked 'Why we are here?' and 'What makes for a good life?' At different times, different answers have held sway. Nowadays, there are more answers proposed than ever. Much of humanity still finds the ultimate answers to such questions in religion. But in countries across the globe, secular views are widely held. In any event, whether religious or secular, individuals, communities and governments still have to make decisions about what people get from life. This book therefore examines what is meant by human flourishing and see what it has to offer for those seeking after truth, meaning and purpose. This is a book written for anyone who wants a future for themselves, their children, and their fellow humans - a future that enables flourishing, pays due consideration to issues of truth and helps us find meaning and purpose in our lives. At a time when most of us are bombarded with messages about what we should or should not do to live healthily, attain a work-life balance and find meaning, a careful consideration of the contributions of both scientific insight and spiritual wisdom provides a new angle. This is therefore a book that not only helps readers clarify their views and see things afresh but also help them improve their own well-being in an age of AI and other new technologies. Want to save cash, your child's imagination and possibly even the planet? This is the book you need. Packed with great photos of real families in the outdoors, Born to Be Wild contains easy-to-follow instructions for activities that require nothing more sophisticated than a small person's imagination and access to a little outdoor space. Nature lays on magical materials for free each season, from fallen leaves and twigs, moulted feathers, sand and shells, to mud, puddles and rain. Everything else you'll need for these activities is already hiding in your cupboards at home. No expensive art supplies or outward-bound kit required. All you need are the toolkit items at the front of the book - ordinary household essentials like scraps of paper, string, glue, recycled food containers and an empty jar or two. Along the way Hattie talks to families, organisations and communities who have rebuilt their relationships with nature with extreme or inspiring results, and she introduces scientists, psychologists and other experts who explain why, as modern families, we should revive our waning relationships with nature, whatever age or stage we're at.
