The University of Oxford saw far-reaching intellectual and institutional changes in the course of the nineteenth century, shifting from an Anglican institution in an Anglican state to an undenominational "free-thinking" institution. Volume VI of the magisterial History of the University explores the major developments of the period.

*This volume presents a selection of Hubert Dreyfus's pioneering work in bringing phenomenology and existentialism to bear on the philosophical and scientific study of the mind. Each of the thirteen essays interprets, develops, and extends the insights of his predecessors working in the European philosophical tradition. One of Dreyfus' central contributions to reading the historical canon of philosophy comes from his recognition that great philosophers help us to understand the "background practices" of a culture - the practices that shape and embody our most basic understanding of ourselves and the things and situations we encounter in our world. Background practices are all too often*

*overlooked completely, or else their importance is misunderstood. Each chapter in this volume shows in one way or another how a broad range of philosophical topics can only be properly understood when we recognize how they are grounded in the background practices that shape our lives and give meaning to our activities, our tasks, our normative commitments, our aims and our goals.*
