A Kid's Nature Journal! The pages of this perfect bound (think coloring book) journal are printed on a very nice 55 lb paper, but markers and paint WILL bleed through. Good old pencils and color pencils are going to work beautifully for your child's nature journal entries. This simple and easy to use kids nature journal was designed with children ages 6-12 in mind (but of course can be used by any age!). My own kids (so I would assume a few others) were always somewhat overwhelmed by the big open space of a completely blank page when they first began their adventures in nature study. So I teamed up with my 9 year old daughter, and we came up with a non-intimidating journal that was fun and easy for her to just take out and use any time, with little help from me. It is really a nature workbook of sorts, and has been designed to encourage frequency of use, and therefore develop the lifelong habit of nature observation. This 8"x10" nature journal has 102 pages total with 45 pages for recording important information on the wide ruled lines (such as the date, location, lunar phase etc.) and sketches. The following pages have been included in the front of this nature journal: \* A

place to record the owner's name. \* A list of nature observation tips. \* A few handy supplies. \* How to use this journal. \* Phases of the moon. \* A few animal tracks. \* Plants to avoid. Again, the pages are printed on 55 lb paper and markers and paint will bleed through. Pencils and color pencils are what will work best for journal entries.

*From the day it was released in 2000, Keeping a Nature Journal has struck a profound chord among professional, casual, and occasional naturalists of all ages. In response to this groundswell of enthusiasm, we have revised KEEPING A NATURE JOURNAL, updated the interior design, and created a new cover. Undoubtedly the most exciting*

*new element in this second edition is a portfolio of 32 illustrated pages from Clare Walker Leslie's most recent journals, reproduced in full color. What makes KEEPING A NATURE JOURNAL so popular? It is inspiring and easy to use. Clare and co-author Charles Chuck E. Roth offer simple techniques to give first-time journal-keepers the confidence to go outside, observe the natural world, and sketch and write about what they see. At the same time, they motivate long-time journal-keepers to hone their powers of observation as they immerse themselves in the mysteries of the natural world. Clare and Chuck stress that the journal is a personal record of daily experience and the world around us. Nature's beauty can be observed everywhere, whether in the city, suburbs, or country.*
