From the New York Times bestselling author of the Tradd Street series comes a stunning novel about a young single mother who discovers that the nature of friendship is never what it seems.... Recently divorced, Merilee Talbot Dunlap moves with her two children to the Atlanta suburb of Sweet Apple, Georgia. It ' s not her first time starting over, but her efforts at a new beginning aren ' t helped by an anonymous local blog that dishes about the scandalous events that caused her marriage to fail. Merilee finds some measure of peace in the cottage she is renting from town matriarch Sugar Prescott. Though stubborn and irascible, Sugar sees something of herself in Merilee—something that allows her to open up about her own colorful past. Sugar ' s stories give Merilee a different perspective on the town and its wealthy school moms in their tennis whites and shiny SUVs, and even on her new friendship with Heather Blackford. Merilee is charmed by the glamorous young mother ' s seemingly perfect life and finds herself drawn into Heather ' s world. In a town like Sweet Apple, where sins and secrets are as likely to be found behind the walls of gated mansions as in the dark woods surrounding Merilee ' s house, appearance is everything. But just how dangerous that deception can be will shock all three women...

STOP going through your systems manual trying to figure out what you know and what you don't know. After going through this study guide a few times, you will easily organize what you know and what you don't know on the CRJ 700. This kind of organization will make it much easier and faster to study for your next CRJ checkride. Need a better way to study for a CRJ training event? Try the Aviation Study Made Easy System. Over 1,200 questions with answers The average time to go through a system chapter in our book, after organizing the information, is 15 minutes Easy to quiz yourself 100% of your study time will be spent on information you don't know Easily organize all of the systems information for future training events Build your confidence whether you are studying for an initial training event or recurrent training, this book will help you prepare efficiently.

Every year thousands of private pilots buy a FAR/AIM with the intention of studying the regulations. My estimate is that the average pilot spends less than 20 hours a year using the FAR/AIM manual to increase their knowledge. Pilots have good intentions of studying, but the lack of use is mainly due to the poor study format of the FAR/AIM. The end result is that pilots understand only a small number of regulations. This study guide is going to change that! The Federal Aviation Regulations Study Guide for the Private Pilot is presented in a very study-friendly format. Our professional pilot staff reviewed all of the FARs and selected the regulations that apply to private pilots. Those regulations were then formatted into a study guide format with questions, answers and additional information. Whether you are preparing for your private pilot check ride, a biennial flight review, or a general review, this book will help you prepare much more efficiently and retain more information.
