"My Life is My Message" "You may be sure I am living now just the way I wish to live. What I might have done at the beginning, had I more light, I am doing now in the evening of my life, at the end of my career, building from the bottom up. Study my way of living here, study my surroundings, if you wish to know what I am. Village improvement is the only foundation on which conditions in India can be permanently ameliorated." M. K. Gandhi

Education is the most effective tool and a medium of human development. It changes the mindsets through a continuous process involving, research, experiment and innovation. Education is that source by which socially and economically marginalized children and adults can lift themselves out of poverty. Jawahar Navodaya Vidyalayas or JNVs are fully residential and co-educational schools affiliated to CBSE with classes from VI to XII standards. These JNVs are specifically tasked to find talented children in rural areas of India and provide them with an education equivalent to the best residential school system, without regard to their families' socio-economic condition. The present edition of 'Jawahar Navodaya Vidyalayas Entrance Exam 2021 for class 6' is the complete guide book that has been designed to provide complete syllabus for the Jawahar Navodaya Vidyalaya Selection Test (JNVST) which is conducted by Navodaya Vidyalaya Samiti. All the chapters provided in the book are basically divided into 3 main sections: Mental Ability Test, Arithmetic Test and Language Test. It also provides Previous Years' Solved Papers and Practice Sets that help in the understanding the latest exam pattern, trend of questions and their weightage. This book is an essential handy practice book, which aims to polish up the hidden talent in young students to help them get the success in their forthcoming examination. TABLE OF CONTENT Solved Paper 2020, Solved Paper 2019, Solved Paper 2018, Solved Paper 2017, Mental Ability Test, Arithmetic Test, Language Test, Practice Sets (1-5).

Machiavelli in Love

A sensitive, humorous novel on Hindu-Muslim relations, set in post-Independence India, by an eminent Hindi writer.

In India, religion continues to be an absolutely vital source for social as well as personal identity. All manner of groups--political, occupational, and social--remain grounded in specific religious communities. This book analyzes the development of the modern Hindu and Sikh communities in North India starting from about the fifteenth century, when the dominant bhakti tradition of Hinduism became divided into two currents: the sagun and the nirgun. The sagun current, led mostly by Brahmins, has remained dominant in most of North India and has served as the ideological base of the development of modern Hindu nationalism. Several chapters explore the rise of this religious and political movement, paying particular attention to the role played by devotion to Ram. Alternative trends do exist in sagun tradition, however, and are represented here by chapters on the low-caste saint Chokhamel and the tantric sect founded by Kina Ram. The nirgun current, led mostly by persons of Kshatriya and artisan castes, formed the base of both the Sikh community, founded by Guru Nanak, and of various non-Brahmin sectarian movements derived from such saints as Kabir, Raidas, Dadu, and Shiv Dayal Singh. Two chapters discuss the formation of a distinctive Sikh theology and a Sikh community identity separate from that of the Hindus. Other chapters discuss the validity of the sagun-nirgun distinction within Hindu tradition and the interplay of social and religious ideas in nirgun hagiographic texts and in sectarian movements such as the Adi Dharma Mission and the Radhasoami Satsang.

A GORGEOUS GEM, BACK IN PRINT The Vancouver artist Julie Morstad spins fairy tales infused with dreamlike innocence and a touch of the macabre, a universe populated by animals, flowers, peculiar objects, and disembodied heads. Haig Patapan discovers that Machiavelli intertwines teachings on love with his political and philosophical theories. This book is an invitation to find the implicit teachings on love cleverly intermingled in Machiavelli's works, with the reward of reaching a profound understanding of modernity and Machiavelli's political views in relation to the foundations of love, Patapan reveals that the understanding of love is essential to the appreciation of Machiavelli's political thought. Each chapter of the book engages different facets of the philosopher's thought to yield a comprehensive appreciation of Machiavellian love and fear and its implication for modernity.

The book that inspired the major new motion picture Mandela: Long Walk to Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. LONG WALK TO FREEDOM is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

The growth of interest in newly developed porous materials has prompted the writing of this book for those who have the need to make meaningful measurements without the benefit of years of experience. One might consider this new book as the 4th edition of "Powder Surface Area and Porosity" (Lowell & Shields), but for this new edition we set out to incorporate recent developments in the understanding of fluids in many types of porous materials, not just powders. Based on this, we felt that it would be prudent to change the title to "Characterization of Porous Solids and Powders: Surface Area, Porosity and Density". This book gives a unique overview of principles associated with the characterization of solids with regard to their surface area, pore size, pore volume and density. It covers methods based on gas adsorption (both physi and chemisorption), mercury porosimetry and pycnometry. Not only are the theoretical and experimental basics of these techniques presented in detail but also, in light of the tremendous progress made in recent years in materials science and nanotechnology, the most recent developments are described. In particular, the application of classical theories and methods for pore size analysis are contrasted with the most advanced microscopic theories based on statistical mechanics (e.g. Density Functional Theory and Molecular Simulation). The characterization of heterogeneous catalysts is more prominent than in earlier editions; the sections on mercury porosimetry and particularly chemisorption have been updated and greatly expanded.
