Craig-y-nos Castle, on the edge of the Brecon Beacons in South Wales, was the home of the world famous opera singer, Adelina Patti. After her death in 1919,

Get Free Navy Napt Study Guide

it became a tuberculosis sanatorium, mainly for children and young adults. The 'Children of Craig-y-nos' project was begun in 2006 by Ann Shaw who had spent four

Get Free Navy Napt Study Guide

years there from the age of nine to thirteen. The launch of her blog (www.craig-y-nos.blogspot.com) to collect the memories of ex-patients and staff

Get Free Navy Napt Study Guide

was so successful that within a year over a hundred stories and 1200 photographs, mostly taken by the children themselves, had been contributed. There

Get Free Navy Napt Study Guide

followed three photographic exhibitions, radio programmes, a reunion at Craig-y-nos Castle, and a Lottery grant to produce this book. But

Get Free Navy Napt Study Guide

despite a romantic location, this is not a fairy tale. TB affected the whole community - physically, socially and emotionally. It was the disease never spoken

Get Free Navy Napt Study Guide

about except in hushed whispers. Craig-y-nos was called a hospital but it had all the hallmarks of a prison for sick children. Even at a distance of fifty

Get Free Navy Napt Study Guide

or sixty years, some people broke down when reliving deeply buried memories. Others were unable to talk at all but communicated entirely through e.mail.

Get Free Navy Napt Study Guide

A few remember physical and sexual abuse by staff. Stomach wash-outs terrified toddlers. Use of restraint by tying children to cot and bed railings was justified

Get Free Navy Napt Study Guide

by over-stretched staff but criticized by hospital inspectors. Even keeping five-year-olds in high-sided cots could be interpreted as a form of imprisonment.

Get Free Navy Napt Study Guide

The physical isolation of Craig-y-nos was another. Only one young woman admits to successful escape although several teenagers and children

Get Free Navy Napt Study Guide

made abortive bids for freedom. Although this is an historical study, TB is not a disease of history. The World Health Organization in 1993 declared TB a

Get Free Navy Napt Study Guide

public health emergency. An estimated 8.8 million people were diagnosed with TB in 2005 and 1.6 million died of it. But however difficult it becomes to control

Get Free Navy Napt Study Guide

tuberculosis both locally and globally, one thing is certain. Those infected will never again be isolated from the rest of society because history has

shown that policing infectious diseases is neither workable nor humane. Ann Shaw was born in Crickhowell, Powys, and worked as a journalist on newspapers

“For an engineer determined to refine and

secure Internet operation or to explore alternative solutions to persistent problems, the insights provided by this book will be invaluable.” —Vint Cerf, Internet pioneer TCP/IP Illustrated, Volume 1, Second Edition, is a detailed and visual guide to today’s TCP/IP protocol suite. Fully updated for the

on the late W. Richard Stevens' classic first edition, author Kevin R. Fall adds his cutting-edge experience as a leader in TCP/IP protocol research, updating the book to fully reflect the latest protocols and best practices. He first introduces TCP/IP's core goals and architectural concepts, showing how they can robustly

connect diverse networks and support multiple services running concurrently. Next, he carefully explains Internet addressing in both IPv4 and IPv6 networks. Then, he walks through TCP/IP's structure and function from the bottom up: from link layer protocols—such as Ethernet and Wi-Fi—through network,

Building Wireless Community Networks is about getting people online using wireless network technology. The 802.11b standard (also known as WiFi) makes it possible to network towns, schools,

Get Free Navy Napt Study Guide

neighborhoods, small business, and almost any kind of organization. All that's required is a willingness to cooperate and share resources. The first edition of this book helped thousands of people engage in community networking activities. At the time, it was impossible to predict how quickly and thoroughly WiFi would

penetrate the marketplace. Today, with WiFi-enabled computers almost as common as Ethernet, it makes even more sense to take the next step and network your community using nothing but freely available radio spectrum. This book has showed many people how to make their network available, even from the park

bench, how to extend high-speed Internet access into the many areas not served by DSL and cable providers, and how to build working communities and a shared though intangible network. All that's required to create an access point for high-speed Internet connection is a gateway or base station. Once that is set up, any computer
