Gegenstand des Bandes ist die Transformation und Neuformierung des Gesetzesbegriffs als Folge des Zusammentreffens von antiken und lokalen Rechtstraditionen mit den die neuen Kulturen formenden Offenbarungsreligionen Judentum, Christentum, Islam, die das geschriebene Gotteswort gleichfalls als Gesetz begreifen. Damit wird ein interdisziplinärer und interkultureller Blick auf die Rechtsdiskurse jenes Zeitraumes gelenkt, den wir aus abendländischer Sicht als Mittelalter bezeichnen. Bei dieser Begegnung entstehen zum Teil sehr unterschiedlich gelagerte Problemkonstellationen, wie Begründung, Anspruch und Verhältnis des göttlichen, menschlichen und natürlichen Gesetzes zu bestimmen sind. Bleibt das Gesetzesverständnis hinsichtlich seiner juristischen Dimension vornehmlich auf den jeweiligen kulturellen und politischen Raum bezogen, so bilden der spekulative und der religiöse Gesetzesbegriff etnen Referenzrahmen eigener Art, dessen unterschiedliche, Theologie, Philosophie, Rechtslehre und Geschichte umspannende Fragestellungen im Zentrum des Bandes stehen. Hier liegen die Wurzeln für unser modernes Rechtsverständnis wie auch die Gründe für die aktuell zum Vorschein tretenden Differenzen zwischen den Kulturkreisen und Religionen.

A Philosophical Introduction to His Life and Thought

With blue, green, and gold foliage and shapes ranging from spiky to weeping, conifers have the potential to be garden design stars. But they are commonly misused in gardens and landscapes, leading to looming spruces squashed against a house or rows of kettledrum-shaped yews along a sidewalk. When used correctly and creatively, conifers can be star players in creating beautiful, long-lasting plant combinations or serene backyard havens. Designing with Conifers shows readers exactly how to choose the best conifers for specific needs. Chapters cover shape, color, and conifers for specific sites and conditions, including front gardens, hedges and screens, topiary, dwarf conifers, shade gardens, Asian-style gardens, bonsai, and miniature railroad gardens. Also includes useful appendices that list of conifers for various problems and conditions, like conifers for areas plagued by deer and the best conifers for Christmas trees and Southern gardens. Each section is enlivened with gorgeous color photographs. Whatever landscape situation or challenge a gardener designer faces, Designing with Conifers shows how to make the best choice from this beautiful, useful, and versatile group of plants.

Seeing Kurose for the first time in two months, Shirotani takes a big step forward in their relationship—and his treatment—by kissing Kurose’s hand when asked. Then, after Kurose fails to invite him home, Shirotani chases after him! Could this new, more impulsive side of Shirotani signal a new phase in their tumultuous relationship? -- VIZ Media

Principles and Applications

Anti-black racism avows reason is white while emotion, and thus supposedly unreason, is black. Challenging academic adherence to this notion, Lewis R. Gordon offers a portrait of Martinican-turned-Algerian revolutionary psychiatrist and philosopher Frantz Fanon as an exemplar of “living thought” against forms of reason marked by colonialism and racism. Working from his own translations of the original French texts, Gordon critically engages everything in Fanon from dialectics, ethics, existentialism, and humanism to philosophical anthropology, phenomenology, and political theory as well as psychiatry and psychoanalysis. Gordon takes into account scholars from across the Global South to address controversies around Fanon’s writings on gender and sexuality as well as political violence and the social underclass. In doing so, he confronts the replication of a colonial and racist geography of reason, allowing theorists from the Global South to emerge as interlocutors alongside northern ones in a move that exemplifies what, Gordon argues, Fanon represented in his plea to establish newer and healthier human relationships beyond colonial paradigms.

Chinese Archery

A Cumulative Author List Representing Library of Congress Printed Cards and Titles Reported by Other American Libraries

Chinese Archery is a broad view of traditional archery in China as seen through the eyes of historians, philosophers, poets, artists, novelists and strategists from 1500 BC until the present century. The book is written around parallel text translations of classical chinese sources some famous and some little known in which Chinese writers give vivid and detailed explanations of the techniques of bow-building, archery and crossbow technique over the centuries. The author is both a sinologist and practising archer; his translations make the original Chinese texts accessible to the non-specialist. Written for readers who may never have picked up a book about China, but still containing a wealth of detail for Chinese scholars, the book brings the fascinating history of Chinese archery back to life through the voices of its most renowned practitioners.

Pulsed-Power Systems describes the physical and technical foundations for the production and application of high-voltage pulses of very high-power and high-energy character. In the initial chapters, it addresses materials, components and the most common diagnostics. In the second part, three categories of applications with scientific and industrial relevance are detailed: production of strong pulsed electric and magnetic fields, intense radiation sources and pulsed electric (plasma) discharges.

The aim of this work is to map and analyse the extant Latin 'defixiones' whose production within the Roman Empire is attested from the 2nd cent. BCE to the end of the 4th/beginning of the 5th cent. CE. There are altogether five hundred Latin curse texts most of which are inscribed on lead tablets. These were intended to affect the actions or health of people/animals against their will and with the help of supernatural powers. As such, they provide the epigraphical evidence of Mediterranean of antiquity. They are often aimed at rivals e.g. in circus or in love, opponents in lawsuits, or enemies, in general. Additionally, there is a special category of so-called 'prayers for justice' which are traditionally classified among 'defixiones' and share several characteristics with them. They are predominantly used against thieves, and are meant to harm or eliminate the culprit. At the same time, their aim is to achieve justice: returning the stolen property, a ?just? punish treachery, or fraud).

Used throughout the United States and many other countries, the National Electrical Code (NEC) is the world's most detailed set of electrical codes pertaining to photovoltaic (PV) systems. PV and the NEC presents a straightforward explanation of the NEC in everyday language. This new edition is based on the 2020 NEC, which will be used widely until 2026, with most of the interpretations and material staying true long after. This book interprets the distinct differences between these code changes relate specifically to PV installations. Written by two of the leading authorities and educators in the field, this book will be a vital resource for solar professionals, as well as anyone preparing for a solar certification exam.
