Clinical correlation boxes in each chapter include history and background information on topics in physiology. Cases present realistic situations that show theory in practice and reinforce students' understanding of each topic. The organization by body system follows a logical progression and makes it easy to refer to specific information.

St. Patrick's Day, New York City. Everyone is celebrating, but everyone is in for the shock of his life. Born into the heat and hatred of the Northern Ireland conflict, IRA man Brian Flynn has masterminded a brilliant terrorist act the seizure of Saint Patrick's Cathedral. Among his hostages: the woman Brian Flynn once loved, a former terrorist turned peace activist. Among his enemies: an Irish-American police lieutenant fighting against a traitor inside his own ranks and a shadowy British intelligence officer pursuing his own cynical, bloody plan. The cops face a booby-trapped, perfectly laid out killing zone inside the church. The hostages face death. Flynn faces his own demons, in an electrifying duel of nerves, honor, and betrayal.

Brett Bohlinger seems to have it all: a plum job, a spacious loft, an irresistibly handsome boyfriend. All in all, a charmed life. Grief-stricken, Brett can barely make sense of her mother's decision—her childhood dreams don't resemble her ambitions at age thirty-four in the slightest. Some seem impossible. How can she possibly have a relationship with a father who died seven years ago? Other goals (Be an awesome teacher!) would require her to
