

Neonatal Resuscitation Documentation Record

The midwife's role is examined in the community and family-health context in this handbook on effective maternal and newborn care for midwives and other healthcare providers. The skills, competencies, and knowledge required to make informed decisions about neo- and postnatal care are covered, including anatomy and the physiology of reproduction, high-risk pregnancies, and labor and birth. Theoretical and practical issues illuminate a midwife's role in the prevention of illness in mothers and babies, with attention to the unique challenges of midwifery in developing nations. Insights from current research studies and critical questions about midwife practice will help those new to health care understand the unique challenges of this form of health-service delivery.

Inside this comprehensive reference, you'll find in-depth coverage of the liability risks common to obstetric and neonatal settings. From the basics of healthcare law and its relation to clinical practice, to detailed discussions aimed at specific liability challenges, this resource prepares you for the professional and legal responsibilities of today's perinatal nursing.

Principles of Risk Management and Patient Safety identifies changes in the industry and describes how these changes have influenced the functions of risk management in all aspects of healthcare. The book is divided into four sections. The first section describes the current state of the healthcare industry and looks at the importance of risk management and the emergence of patient safety. It also explores the importance of working with other sectors of the health care industry such as the pharmaceutical and device manufacturers. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

A comprehensive resource for practicing perinatal nurses. Provides commonly-accepted guidelines for practice as well as evidence-based care. Extremely useful as a clinical resource as well as staff educator's guide and textbook. Co-publishing with AWHONN provides additional credibility to this book.

Principles for Practice 2nd Edition

Elsevier Clinical Skills Manual, First South Asia Edition, eBook

Legal issues in medical practice have been gripping medical doctors by surprise in recent years. Some decades ago legal issues in medical practice never created any problem. A greater awareness is being created by adding doctor's services within the ambit of Consumer Protection Act, 1986. Neither during the undergraduate training nor the postgraduate courses doctors have ever prepared themselves to deal with real-world situations of litigation related to allegations of negligence. While facing litigation related to allegation of negligence in law courts for the first time, a doctor realizes the importance of medical records, consent and expert witness and searches for help books. There are many books available for reference but this one is a handbook for practising doctors and their lawyers grappled with legal issues culminating in litigations covering a vast number of medical specialties and systems. This book proposes to fill the existing vacuum by creating authentic base required to understand the legal issues in medical practice in India. The esteemed contributors have put in their best efforts to share their knowledge, experience and wisdom with the readers by discussing various landmark legal decisions in the field of (alleged) medical negligence. It aims to make the medical practice safe, ethical, reassuring and hassle-free by discussing various legal issues related to medical practice.

The South Asia edition of Elsevier Clinical Skills Manual: Obstetrics and Gynecology Nursing is adapted from Elsevier's Clinical Skills website and the content is developed keeping in mind the clinical requirements of a nursing student at all levels of nursing education in South Asia. It covers the entire gamut of antenatal, intranatal, and postnatal interventions performed on pregnant women, for both investigative and therapeutic purposes. The content quality and suitability of the South Asian curricula has been validated by renowned experts and faculty members. Fully compliant with the new syllabus prescribed by the Indian Nursing Council (INC) Content organized in sections and chapters, the text is presented in points Organized in a globally recognized sequence and systematically framed to augment dexterity Elucidates concise text with clear and simple terminologies Content is richly supported by figures and tables Provides an enhanced lucidity in the content Chapter content is presented under different heads like Overview, Supplies, Patient and Family Education, Assessment and Preparation, Procedure, Monitoring and Care, Expected and Unexpected Outcomes, and Documentation Content is focused on the procedures specific to Obstetric Nursing and Midwifery Videos related to the procedures are available on the MedEnact website

The first edition of Skills for Midwifery Practice Australia and New Zealand edition builds of the success of the highly regarded Skills for Midwifery Practice by Ruth Johnson and Wendy Taylor, now in its fourth edition. Endorsed by the Australian College of Midwives, this text provides instruction and guidance on more than 100 clinical skills for midwifery students and midwives who wish to perfect their practice. Each clinical skill is presented logically in a step-by-step format, providing a clear sequencing of information. Theory and evidence precedes each skill to thoroughly explain the underlying physiology of the scenarios encountered in midwifery practice. Woman-centred approach Structured to follow the logical progression from pregnancy through to labour and birth, and finally to postnatal care Australian and New Zealand guidelines, policies, standards, statistics, terminology and cultural considerations are included throughout Now includes an eBook with all print purchases

Neonatal Nursing in Australia and New Zealand: Principles for Practice uniquely reflects the local practice, context and standards of neonatal nursing in Australia and New Zealand. Edited by Victoria Kain and Trudi Mannix, the content spans all neonatal care settings, addressing the considerations of all levels, including special care and intensive care units, while highlighting the collaborative nature of neonatal care and interdisciplinary teamwork within this environment. The text comprehensively addresses ANZ-specific perspectives, including the neonatal context for First Peoples; the neonatal nurse practitioner and advanced practice roles; workplace culture; newborn screening, resuscitation, retrievals and transport; stabilisation of the high-risk newborn; the range of disorders by body system; legal and ethical issues; and end-of-life care in the neonatal unit. Supported by international and ANZ neonatal network data Aligned to the Australian College of Neonatal Nurses and New Zealand Nurses Organisation Standards Key learning objectives emphasised Nursing and midwifery-focused Case studies provide the vital link between theory and practice Clinical Practice and Reflections features further reader insight and knowledge Evidence-based practice research underpins all chapters Family-centred care is reinforced throughout Evolve resources included to enhance teaching and learning: eBook on VitalSource Student and Lecturer resources, for each chapter: Test banks of MCQ and short answer questions Additional online case studies Journal articles related to practice and critical thinking questions Answer guide to in-text and online case study, test bank and article questions

A Practical Guide to Third Trimester of Pregnancy & Puerperium is a comprehensive resource for the management of the final stage of pregnancy and its complications. Complications covered include pre-term labour, pre-labour rupture of membranes, post-term pregnancy, placental adhesive disorders, and umbilical cord abnormalities. Enhanced by over 120 images and tables, providing quick reference information for obstetricians and gynaecologists.

reflect new course content and instructor tips.

Thoroughly revised and updated, this new edition of Neonatal Intensive Care Nursing is a comprehensive, evidence-based text for nurses and allied health professionals caring for sick newborn infants. This user-friendly text focuses on the common problems and related care occurring within the neonatal specialty. All previous chapters have been thoroughly updated and new content includes chapters on, for example, organisation of neonatal care, assessment of the neonate, the premature and low birth weight neonate as well as palliative care. In addition, the book now includes a broad and in-depth web-based companion comprising online resources, case studies with answer guides and learning activities.

This accessible and interactive approach enables nurses to recognise, rationalise and understand clinical problems using an evidence-based approach. Divided into four parts, the book provides an overview of neonatal care, and a detailed look at the physical and emotional wellbeing of neonate and family, a range of clinical aspects of neonatal care, and key practices and procedures. Neonatal Intensive Care Nursing will be essential reading for both new and experienced nurses, allied health professionals and students learning about neonatal care including those undertaking qualifications in the neonatal specialism and pre-registration students taking relevant modules or placements.

The completely revised and updated Third Edition of Risk Management in Health Care Institutions: Limiting Liability and Enhancing Care covers the basic concepts of risk management, employment practices, and general risk management strategies, as well as specific risk areas, including medical malpractice, strategies to reduce liability, managing positions, and litigation alternatives. This edition also emphasizes outpatient medicine and the risks associated with electronic medical records. Risk Management in Health Care Institutions: Limiting Liability and Enhancing Care, Third Edition offers r

The South Asia edition of Elsevier Clinical Skills Manual: Child Health Nursing has got the original content from the Elsevier Clinical Skills website and adapted to suit the B.Sc. Nursing curricula of South Asian countries. The content quality and suitability to the South Asian curricula has been validated by renowned experts and faculty members. This comprehensive book will help B.Sc. Nursing students to clear their concepts about various pediatric nursing procedures. This perfect clinical guidebook can also be used by nursing officers working in pediatric settings to update their knowledge and skill.

Fully compliant with the new syllabus prescribed by the Indian Nursing Council Content organized in chapters, text presented in points Steps of procedures are based on current and best practices Chapter content presented under heads like Overview, Supplies, Child and Family Education, Assessment and Preparation, Procedure, Monitoring and Care, Expected Outcomes, and Documentation Content richly supported by figures and tables Latest guidelines related to hand hygiene and CPR, recommended by WHO and American Academy of Pediatrics, have been added Videos related to the procedures available on the MedEnact website

Improvements in the detection of fetal and neonatal brain injuries, advances in our understanding of the pathophysiology, cellular and molecular bases of encephalopathy, and new treatment options have all combined to produce significant changes in the management of neonatal brain disorders in the past few years. This new edition of Fetal and Neonatal Brain Injury brings the reader fully up to date with all advances in clinical management and outcome assessment. Updated material includes inflammation focusing in particular on chorioamnionitis and fetal brain injury; genetic brain injury; and expanded sections on cholestasis, diabetes, and thyroid disease. An updated, highly illustrated chapter on structural and functional imaging of the fetal and neonatal brain is also included. An outstanding international team of highly experienced neonatologists and maternal-fetal medicine clinicians have produced a practical, authoritative clinical text that gives clear management advice to all clinicians involved in the treatment of these patients.

Skills for Midwifery Practice is the go-to book for all midwifery students who need to learn what to do in a range of situations, how to perform a skill, and why they need to do it in a certain way.

Written by midwifery educators Ruth Johnson and Wendy Taylor, the book makes learning easy with background information, learning outcomes, helpful diagrams and lists to represent the skill flow. It explains the underlying physiology associated with pregnancy and childbirth, and clearly defines the nature and extent of current practice. This version is fully updated and referenced throughout to provide a detailed evidence base to support learning and further study. It is ideal for midwives in training, qualified midwives returning to practice, as well as other members of the obstetric healthcare team. Clear and logical – easy to follow and understand for training midwives Accurate, up-to-date evidence base that is relevant to contemporary midwifery practice Each skill contextualized with background, indications and contraindications to support both clinical practice and study Learning objectives and end-of-chapter self-assessment exercises allow readers to monitor their progress New to this edition Latest guidelines and standards New information on resuscitation and other emergencies Now in full color throughout Expanded chapter on the use of standard precautions in light of the global pandemic Developed discussion of alternative feeding methods

Rely on this practical guide to the role of medical imaging in the diagnosis and treatment of common diseases and disorders. Follow its symptoms-based approach to learn when medical imaging is appropriate, what the ideal study may be for a specific clinical problem, how to interpret an official report on a radiologic study, what the possible appropriate next steps are, and how radiologic results may (or may not) alter clinical management of your patient.

Now in its Second Edition with a new title, Best Practices: Evidence-Based Nursing Procedures is an excellent compilation of "best" practices based on current research and expert consensus findings. This timely, authoritative reference applies research findings directly to every aspect of nursing practice to guide nurses in performing procedures for patients with a full range of conditions and illnesses. This edition provides a thorough update and review and includes new procedures and practices. Every entry is evidence-based, identifies the sources of the evidence, and now includes manufacturer recommendations. Nursing diagnoses, expected outcomes, and unexpected outcomes (complications) are now discussed for each procedure.

Ensure you're referencing the most accurate information surrounding nursing practice in today's neonatal intensive care unit with AWHONN's Core Curriculum for Maternal-Newborn Nursing, 6th Edition. Developed by one of the most authoritative associations in neonatal intensive nursing care, AWHONN, this renowned guide provides in-depth coverage of the most common neonatal disorders and their management — focusing on the latest evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications. Additionally, the concise outline format makes information easy to find as it highlights the essentials of each condition including the definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes. With timely content that sets the standard for neonatal nursing practice, this trusted reference is an excellent resource for practicing nurses working in any NICU worldwide. Content developed by AWHONN, one of the most authoritative associations in neonatal intensive care nursing, ensures the information is both accurate and relevant. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Full-scope coverage of neonatal nursing practice provides information on families, ethics, legal issues, research, case management, the transition to home, and more. Focus on evidence-based practice related to preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. Strategies to promote inclusionary care better reflect today's nursing care today with a focus on family-centered care, comprehensive perinatal records, health care teams in the NICU, and infant care best practices. NEW! Expanded information on breastfeeding and acquired opioid dependency keep you informed with the latest best practices related to these two everchanging areas. NEW! Updated neonatal resuscitation guidelines ensures you follow the most up-to-date protocols and procedures in this critical skill area. NEW! Additional tables and boxes help you quickly find important information.

Modelled after the current MRCOG curriculum, the new edition of this bestselling book provides all the information a specialist registrar in obstetrics and gynaecology or senior house officer needs during training or when preparing for the MRCOG examination. Obstetrics & Gynaecology: An Evidence-based Text for MRCOG covers the latest profession

Co-published with the Association of Women's Health, Obstetric and Neonatal Nurses (AWHONN), this book is a comprehensive clinical resource for practicing perinatal nurses and an excellent staff educator's guide and textbook. It provides commonly accepted guidelines for practice and evidence-based care and includes algorithms to support decision-making. Numerous photographs complement the text and summary boxes highlight key points. Appendices provide patient care examples and practice guidelines. This edition has been extensively revised and updated. New features include more than 650 end-of-chapter review questions and answers and selected AWHONN protocols.

Risk management for health care institutions involves the protection of the assets of the organizations, agencies, and individual providers from liability. A strategic approach can result in significant cost savings. Risk Management in Health Care Institutions: A Strategic Approach offers governing boards, chief executive officers, administrators, and health profession students the opportunity to organize and devise a successful risk management program. Experts in risk management have contributed comprehensive, up-to-date syntheses of relevant topics to assist with practical risk management strategies.

Trusted by physicians and advanced practice providers through ten standard-setting editions, Fanaroff and Martin's Neonatal-Perinatal Medicine, 11th Edition, remains the reference of choice for expert, multidisciplinary guidance on the management and evidence-based treatment of problems in the mother, fetus, and neonate. An expanded team of international authors, led by Drs. Richard J. Martin, Avroy A. Fanaroff, and Michele C. Walsh of Rainbow Babies and Children's Hospital, brings you up to date with advances in the control of nosocomial infections in preterm infants, genetic disorders and birth defects, the fetal origins of adult disease, the late preterm infants, and much more — all designed to help you improve the quality of life and long-term outcomes of your patients. Helps you make informed clinical choices for each patient

— from diagnosis and treatment selection through post-treatment strategies and management of complications — with a dual focus on neonatology and perinatology. Includes a new chapter on Social and Economic Contributors to Neonatal Outcome. Features extensive updates and reorganization throughout, with new Key Points at the end of each chapter Provides up-to-date, evidence-based content, with more information on precision medicine and genetics. Uses detailed, full-color illustrations that depict disorders in the clinical setting and explain complex information. Remains the most comprehensive, multidisciplinary text in the field — an excellent source of information for every stage of your practice.

AWHONN's Perinatal Nursing

Skills for Midwifery Practice E-Book

A comprehensive examination of neonatal nursing management from a physiologic and pathophysiologic approach. The book features a complete physiologic and embryonic foundation for each neonatal system as well as coverage of associated risk factors, genetics, critical periods of development, nutrition and parenting.

This book is a comprehensive guide to perinatal medicine for practicing gynaecologists. Divided into 20 sections, it begins with Neonatology, followed by Ethical and Legal issues, Ultrasound, Physiology, Early Pregnancy, Intrauterine Growth, and Infectious Disease amongst other topics. Contributions from multidisciplinary experts guide physicians through the developments in diagnosis and treatment of the mother, foetus and neonate, improving the quality of life and long-term outcomes of patients. All recent developments are presented with recommendations for safe and effective diagnostic and therapeutic interventions in both maternal-foetal medicine and neonatology, making the Textbook of Perinatal Medicine an indispensable resource for obstetricians and gynaecologists. Key Points Comprehensive guide to key topics and advances in perinatal medicine Provides recommendations for safe and effective diagnosis and treatment Internationally recognised editor and author team Highly illustrated with full colour images and tables throughout

This new book will be a core text for undergraduate Maternity/Newborn courses. It also will work for courses emphasizing Women's Health across the lifespan. Coverage includes core content on preconception, pregnancy, labor, birth, and postpartum. In addition, the text focuses on important topics throughout a woman's life: health promotion, nutrition, medical issues, psychosocial issues, sexuality, family, fertility control and issues, menopause, and aging. While other texts touch on the different stages of a woman's lifespan, this book provides more detail and information in areas outside the average maternity text.

Here's what you need to comply with the latest perinatal regulations. In Hospital Perinatal Compliance Manual, you get everything you need to stay in compliance: 1) Legal compliance questions and answers: Find the legal answers you need in seconds, including coverage of the latest issues in perinatal law and regulation. 2) Joint Commission survey questions and answers: Get inside guidance from colleagues who were surveyed under current standards. 3) Hospital accreditation standard analysis: Learn about the latest Joint Commission standards as they apply to perinatal departments, including new requirements issued for 2002. 4) Reference materials for perinatal compliance: All the tools you need to comply with perinatal-related regulations, laws, and accreditation standards, including forms, policies and procedures recently reviewed by the Joint Commission. Includes a diskette containing many of the forms, policies, procedures, and other documentation within the Reference Materials section.

Children and Young People's Nursing at a Glance, is the perfect companion for study and revision for pre-registration children's nursing students from the publishers of the market-leading at a Glance series. Divided into seven sections it explores assessment and screening, working with families, the newborn infant, the developing child, child health policy, nursing the sick child and young person and chronic and life-limiting conditions. This comprehensive book is an invaluable resource for pre-registration nursing students as well as newly qualified nurses wanting to consolidate and expand their knowledge of children and young people's nursing. Breaks down complex aspects of child health care in an accessible and un-intimidating way The perfect revision and consolidation textbook Linked closely with the NMC standards for pre-registration nursing education, and the essential skills clusters framework Highly visual colour presentation, with approximately 130 illustrations Includes boxes, summary boxes, key points and recommendations for practice to improve the learning experience Supported by a companion website featuring over 500 interactive multiple choice questions (www.ataglanceseries.com/nursing/children) Available in a range of digital formats - perfect for 'on the go' study and revision

From early conception until the postpartum period, anaesthetists are required to provide pregnant women with the highest standard of anaesthetic care and pain relief whilst negotiating challenges such as concurrent systemic disease, infertility, and obesity as well as practising in accordance with new developments in fetal medicine surgery, pharmacology, and imaging. The Oxford Textbook of Obstetric Anaesthesia provides an up-to-date summary of the scientific basis, assessment for and provision of anaesthesia throughout pregnancy and labour. This highly authoritative textbook is conceptually divided into nine sections, detailing maternal and fetal physiology, fetal and neonatal assessment and therapy, anaesthesia before and during pregnancy, labour and vaginal delivery, anaesthesia for caesarean delivery, anaesthetic and obstetric complications, as well as systemic disease. Individual chapters address topics such as simulation and ultrasound. Authored by an international team of expert anaesthetists this textbook reflects current world-wide practice and guidelines. Designed for consultants and trainees in anaesthesia, the Oxford Textbook of Obstetric Anaesthesia is the definitive source of expert knowledge for anaesthetists in this subspecialty.

Thoroughly updated for its Second Edition, this pediatric procedures book provides the student and professional nurse with a quick reference to essential nursing procedures and standards for practice. Its format is easily adaptable to organizational policy and procedure manuals. Chapters are alphabetically presented by procedure and contain clinical guidelines for practice. Tables and charts summarize key diagnostic information or parameters.

Endorsed by the Australian College of Midwives (ACM) and the New Zealand College of Midwives (NZCOM), Midwifery: Preparation for Practice has long been upheld as the definitive midwifery text for Australian and New Zealand midwifery students. Oxford Textbook of Obstetric Anaesthesia Maternal and Newborn Care Practical Radiology

The definitive certification review for exam success! Written by leading APRN neonatal educators and clinicians, this authoritative study guide delivers all the tools neonatal nurse practitioners need to pass the National Certification Corporation (NCC) certification exam and the Continuing Competency Assessment (CCA). User friendly and concise, this review's content mirrors that of the actual exam and is structured in accordance with the most updated test plan blueprint. This resource's numerous exam-style questions and answers with rationales included in each chapter help readers uncover gaps in their knowledge. This review synthesizes the knowledge required to pass the exam, saving the reader time and effort by omitting extraneous material. In addition to spotlighting essential content throughout the text, recommended references provide the reader with the option to seek out additional information as needed. Additional benefits include important information about the exam along with savvy study and test-taking tips. This review will ensure exam success for both new NNPs and those who are taking the CCA exam. KEY FEATURES Mirrors the format of the certification exam Concise outline format for easy access to essential content Written by leading NNP educators and clinicians Includes valuable study and test-taking tips Exam-style questions and answers with explanatory rationales Includes more than double the amount of questions on the exam, including a 175-question simulated practice exam Purchase includes digital access for use on most mobile devices or computers

Written by neonatal nurses and midwives for nurses and midwives, the 2nd edition highlights the collaborative nature of neonatal care and the provision of individualised, developmentally and culturally appropriate, family-centred care. Spanning all neonatal care levels and considerations, across special care baby units (SCBU) and neonatal intensive care units (NICU), the text comprehensively addresses newborn screening, resuscitation, interdisciplinary teamwork, retrievals and transport; stabilisation of the high-risk newborn; legal and ethical issues; care of the normal newborn and end-of-life care in the neonatal unit. With an increased focus on the role of the midwife within the neonatal environment, the text is ideally suited to undergraduate nursing and midwifery students and as an introductory text for postgraduate neonatal intensive care specialisation. Key learning objectives emphasised Aligned to the Council of International Neonatal Nursing (COINN) Competency framework Nursing and midwifery-focused case studies provide the vital link between theory and practice Clinical practice and reflection boxes provide additional insights and knowledge Glossary demystifies complex neonatal concepts Test bank questions and journal articles allow the reader to test their knowledge An eBook included in all print purchases Additional resources on Evolve: eBook on VitalSource Instructor resources: Test bank Additional case studies Journal articles with questions Answer guide for test bank, case studies and journal articles & questions Weblinks Image bank Student resources: Test bank Additional case studies Journal articles with questions Weblinks Image bank Increased focus on international data, evidence-based research and exemplars for the principles of best practice New chapters Care of the normal newborn Care of the neonate with congenital abnormality Extensively revised content on neonatal nutrition and fluid management

This text provides clear, easy-to-read guidance on more than 110 skills for midwifery students and midwives seeking to update their practice. Underpinned with the most recent evidence-based practice and research, the second edition walks the reader through general and basic skills in a sequential and logical manner, following a woman's journey through pregnancy, labour and birth, and postnatal care. With a focus on the performance of midwifery skills rather than on the theory of midwifery practice, Skills for Midwifery Practice Australia and New Zealand 2nd edition is an indispensable text to which students will return to again and again. Endorsed by the Australian College of Midwives Step-by-step instructions for each skill Images and diagrams to aid understanding A woman-centred approach and cultural considerations throughout Models of midwifery care (Continuity of Care and Lead Maternity Carer's Model) Australian/NZ specific guidelines, policies, statistics, terminology and medication administration guidelines

This new textbook wants to offer to neonatologists and pediatricians a modern and complete view of the various problems and aspects of neonatology, currently one of the most complex and advanced fields of pediatrics. The first chapters will be dedicated to the epidemiology of neonatal mortality and morbidity and to the conditions responsible for neonatal risk. A section will be devoted to organizational problems of hospitals and home services for efficient modern neonatal and infant care. Particular attention will be paid to neonatal care, medico-legal questions, examination of newborns and current availability of laboratory facilities and instrumentation for identification of perinatal abnormalities. Neonatal nutritional problems will also be examined, outlining current knowledge of the needs of sick and healthy babies. Conditions jeopardizing fetal health such as diabetes, maternal drug abuse and smoking will be discussed. New advances in neonatal pharmacology will be extensively examined. Various diseases of the neonate involving lungs, heart, gastrointestinal tract, blood, immune system, endocrine system and kidneys will be also expounded in special chapters. Fetal and neonatal infections will be extensively discussed. Fetal and neonatal neurological abnormalities will be discussed by highly specialized authors. There will be chapters on neonatal ophthalmology, dermatology and orthopedics. Each chapter has been written by a well recognized international expert in his or her field. As the opinion leader in their field, the Author is responsible for giving the most up-to-date information in terms of what is known, what is still being researched, and what has become evidence based medicine. Underlying causes and mechanisms of neonatal diseases will be presented in an immediate form. The use of summaries, tables, and accurately selected guidelines or recommendations that will accompany the text will supply quick references and instant solutions to the concerned neonatologists during their daily practice.
