I have spent the better part of the last 53 years taking well over a thousand multiple choice tests. As a teenager, I struggled through high school. Armed with an average IQ and some fairly significant learning disabilities, I barely graduating with a 1.4 grade point average. However, I was smart enough to figure out early on that much of academics, and that achieving success in academics, had far more to do with the ability to master multiple choice tests than raw intellect. From there I began a 35 year study on the art and science of passing, mastering and scoring high on multiple choice tests. Despite a very substandard high school GPA, I scored high enough on the SAT and the ACT to be accepted to the University of Michigan, one of the top academic institutions in the Country. Upon graduation from college, I accepted a commission as an officer in the United States Marine Corps. As a Marine Officer, I completed dozens of military and civilian schools, including a Masters Degree from Boston University, and a Juris Doctor Degree from the University of Detroit School of Law. In fact, I earned a full ride military scholarship to law school based primarily on the fact I scored so highly on the Law School Aptitude Test (98th percentile). Upon completion of law school, I passed the Michigan Bar exam on the first attempt, scoring 149 points on the multitstate (the multiple choice portion of the exam), which was one question away from automatic passage (at 150 they normally do not need to grade the essay portion). I have also taken and applied many of the Marine Corps concepts of discipline and mental toughness to the art of preparing for, taking, and passing multiple choice tests. Resigning my commission and leaving the Marine Corps in 1990, I continued both my education as well as honing my test taking skills. I currently hold 12 professional licenses and 5 professional designations, which required me to pass several comprehensive and difficult multiple choice examinations. I have also attended dozens of professional test preparation courses. From those courses I have "cherry picked" all of the valuable lessons and test taking tips and have included those in this book. One of the professional licenses I hold is a paramedic license. As a paramedic I have gained a much greater understanding of the anatomy and physiology of test taking. Test taking is all about the central nervous system, which of course includes the brain. However, as I explain in this book, it is clear that the sympathetic and parasympathetic nervous systems have as much to do with passing and failing multiple choice tests as does the brain. Accordingly, I have also applied many of those principals in this book. "ACT Prep Flashcard Workbook 11: BIOLOGY" 450 questions. Nurses! Test Yourself in Anatomy and Physiology, 2nd Edition, has been fully revised and updated, with new and expanded features, to remain the essential self-test resource for nurses studying basic anatomy and physiology and preparing for exams. This book includes over 500 questions, each with fully explained answers. These include: •50 A&P illustrations and puzzle grids •Over 200 glossary terms •Multiple choice questions •True or false questions •Labelling exercises •Match the terms •Fill in the blank questions Each main body system has its own chapter, so you can get in depth practice for your exams. Body systems covered include: •Integumentary system •Musculoskeletal system •Nervous system •Endocrine system •Cardiovascular system •Respiratory system •Digestive system •Urinary system •Immune and lymphatic system •Male & female reproductive system •Self-testing is an effective activity in improving active learning. This book will help nursing students with their learning and recall in a subject they often report to find difficult. Covering all the main topics relevant to nursing and including varied exercises, this book will prove to be an effective aid alongside standard textbooks for any student studying anatomy and physiology. Dr Jim Jolly Lecturer School of Healthcare University of Leeds. This book is an excellent resource for students and their teachers as it complements all core anatomy and physiology text books and curricula no matter how the content is sequenced. The book covers all of the main systems in the body along with the fundamentals underpinning students' understanding of core concepts in physiology. The use of a self-assessment approach stimulates students to actively engage with the material while they self-correct and learn. The book is a gift to all nursing students revising for examinations that assess the anatomy and physiology component of their programme. I highly recommend this book. Dr. Margarita Corry, Registered Nurse Teacher and Academic, School of Nursing & Midwifery, Trinity College Dublin. Katherine Rogers is a Senior Lecturer in the School of Nursing and Midwifery at Queen's University Belfast, UK. Bill Scott is a Senior Lecturer and Researcher in Biomedicine at Letterkenny Institute of Technology, Ireland.
