

New Power How Its Changing The 21st Century And Why You Need To Know

A History of the Greek and Roman World, first published in 1926, presents the story of Graeco-Roman antiquity from its earliest recorded origins to the height of the Roman imperium. It aims to bring into prominence the internal dynamism - political, cultural, intellectual, and aesthetic - which animated the ancient peoples at different periods of their history, and to draw attention to the physical, socio-economic and religious conditions under which they lived. Written in a style which will likely be unfamiliar to modern readers, Grundy's historical portrait is painted with broad brush-strokes, offering not only compelling narrative but also incisive commentary on the individuals and societies which occupy the foreground. A History of the Greek and Roman World will be of interest for the general enthusiast as well as students, who may value such a radically different approach to the interpretation of antiquity compared to the conventions which prevail amongst contemporary scholars.

What is the impact of demographics on the prospective production of military power and the causes of war? This monograph analyzes this issue by projecting working-age populations through 2050; assessing the influence of demographics on manpower, national income and expenditures, and human capital; and examining how changes in these factors may affect the ability of states to carry out military missions.

NEW YORK TIMES BESTSELLER • This instant classic explores how we can change our lives by changing our habits. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Wall Street Journal • Financial Times In The Power of Habit, award-winning business reporter Charles Duhigg takes us to the thrilling edge of scientific discoveries that explain why habits exist and how they can be changed. Distilling vast amounts of information into engrossing narratives that take us from the boardrooms of Procter & Gamble to the sidelines of the NFL to the front lines of the civil rights movement, Duhigg presents a whole new understanding of human nature and its potential. At its core, The Power of Habit contains an exhilarating argument: The key to exercising regularly, losing weight, being more productive, and achieving success is understanding how habits work. As Duhigg shows, by harnessing this new science, we can transform our businesses, our communities, and our lives. With a new Afterword by the author “Sharp, provocative, and useful.”—Jim Collins “Few [books] become essential manuals for business and living. The Power of Habit is an exception. Charles Duhigg not only explains how habits are formed but how to kick bad ones and hang on to the good.”—Financial Times “A flat-out great read.”—David Allen, bestselling author of Getting Things Done: The Art of Stress-Free Productivity “You’ll never look at yourself, your organization, or your world quite the same way.”—Daniel H. Pink, bestselling author of Drive and A Whole New Mind “Entertaining . . . enjoyable . . . fascinating . . . a serious look at the science of habit formation and change.”—The New York Times Book Review

"Nader's assessment of how concentrated wealth and power undermine democracy is clear and compelling, but it's his substantive vision of how we ought to respond that makes Breaking Through Power essential reading. Written just before Donald Trump's Electoral College victory, Nader's latest book reads with even greater urgency now."--Yes Magazine In Breaking Through Power, Ralph Nader draws from a lifetime waging--and often winning--David vs. Goliath battles against big corporations and the United States government. In this succinct, Tom Paine-style wake-up call, the iconic consumer advocate highlights the success stories of fellow Americans who organize change and work together to derail the many ways in which wealth manipulates politics, labor, media, the environment, and the quality of national life today. Nader makes an inspired case about how the nation can--and must--be democratically managed by communities guided by the United States Constitution, not by the dictates of big businesses and the wealthy few. This is classic Ralph Nader, a crystallization of the core political beliefs and commitments that have driven his lifetime of advocacy for greater democracy. "Ralph Nader is the grand progressive of our time. We overlook his words at our own peril! This book is required reading."--Cornel West "Ralph Nader's Breaking Through Power is a brilliant analysis of corporate power and the popular mechanisms that can be used to wrest back our democracy. No one has been fighting corporate domination longer, or understands it better, than Nader, who will go down in history not only as a prophet but an example of what it means to live the moral life. We disregard his wisdom and his courage at our peril."--Chris Hedges, Pulitzer-Prize winner and author of Wages of Rebellion: The Moral Imperative of Revolt "Nader goes beyond delineating the problem and provides a critical prescription to battle the toxicity of unjust power--one that every individual can, and must, embrace."--Nomi Prins, author, All the Presidents' Bankers "People are recognizing that our founding, fundamental values of fairness, justice, and opportunity for all--the very values that define our America--are being shoved aside to create an un-America of plutocracy and autocracy. Ralph Nader's new book Breaking Through Power provides progressive boat-rockers with inspiration and a plan for reclaiming America from the greedy Plutocrats and Fat Cats who think democracy is for sale to the highest bidder."--Jim Hightower "I read Ralph Nader for the same reasons that I read Tom Paine. He knows what he thinks, says what he means, and his courage is a lesson for us all."--Lewis Lapham "Nader insists on speaking up for the little people and backs his arguments and decent sentiments with hard facts."--Publishers Weekly About Ralph Nader: Named by The Atlantic as one of the hundred most influential figures in American history, and by Time and Life magazines as one of the most influential Americans of the twentieth century, Ralph Nader has helped us drive safer cars, eat healthier food, breathe better air, drink cleaner water, and work in safer environments for more than four decades. Nader's recent books include Animal Envy, Unstoppable, The Good Fight, and the bestseller, Seventeen Traditions. Nader writes a syndicated column, has his own radio show, and gives lectures and interviews year round.

From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. "Old power" is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. "New power" is made by many: it is open, participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikely victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions.

In New Power, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in--a world where connectivity has made change shocking and swift and a world in which everyone expects to participate.

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Do you ever feel like you could do more with your life, but you don't know where to start? Do great ideas keep going through your mind, barely changing from year to year? Do you need the tools to get you going in the right direction? This book has one purpose: To help you make your dream come true, no matter how big that dream might be. To change your life you need the desire to change and the commitment to make that change possible through action. Mind to Mind Conversations will help start you on the path to a new life.

The Target Oriented Curriculum (TOC) is arguably the most comprehensive, fundamental and controversial attempt to promote systemic curriculum reform in Hong Kong. It aimed at a radical change in the nature of knowledge, pedagogy and assessment in schools. After an initial phase of confusion and criticism, this ambitious reform was revamped and vigorously promoted, but within a few years, it totally lost momentum as other educational issues attracted the attention of policy-makers. This book traces the career of TOC and studies the impact of the reform on the education system, subjects, schools and teachers. Drawing on a four-year multi-level research project, the chapters provide a deep understanding of the complex nature of educational reform and how a new curriculum is interpreted, developed and implemented. Besides providing a fascinating portrayal of the experiences of the TOC reform, this book offers lessons for future curriculum change in Hong Kong and elsewhere. 'This', writes Ivor Goodson in the Foreword, 'is curriculum research at its best.'

A masterclass to build self-trust, beat self-doubt and make your boldest aspirations a reality. Does fear hold you back? We all have moments when we succumb to doubt and let our fears call the shots. Each time they do, we limit our lives. It’s why learning to trust in ourselves is crucial to rising above our biggest challenges and enjoying true happiness and success – in our careers, relationships, leadership and life. Written with heart and humour but grounded in research, You’ve Got This! is a handbook for unleashing our untapped potential and passion, creativity and courage, to thrive in today’s uncertain world. Filled with compelling stories and hard-won wisdom, author Margie Warrell draws on her background in business, coaching and doctoral studies as well as her challenges raising four children while living and working around the world. Applying the practical advice and twelve powerful principles in this book will help you: Defy negative self-talk and take the bold actions you’ve been putting off Become your greatest cheerleader, not your loudest critic Embrace vulnerability and trust your intuition Combat stress and thrive amid uncertainty Amplify your power as a leader and ‘change maker’ Hailed as a “high five to the human spirit”, You’ve Got This! is a must-read for everyone, from seasoned leaders, to those embarking on their adult lives, and anyone in between who just needs encouragement to rise to their take that leap. How Power Works in Our Hyperconnected World--and How to Make It Work for You

A brilliant condemnation of political hobbyism—treating politics like entertainment—and a call to arms for well-meaning, well-informed citizens who consume political news, but do not take political action. Who is to blame for our broken politics? The uncomfortable answer to this question starts with ordinary citizens with good intentions. We vote (sometimes) and occasionally sign a petition or attend a rally. But we mainly “engage” by consuming politics as if it’s a sport or a hobby. We soak in daily political gossip and eat up statistics about who’s up and who’s down. We tweet and post and share. We crave outrage. The hours we spend on politics are used mainly as pastime. Instead, we should be spending the same number of hours building political organizations, implementing a long-term vision for our city or town, and getting to know our neighbors, whose votes will be needed for solving hard problems. We could be accumulating power so that when there are opportunities to make a difference—to lobby, to advocate, to mobilize—we will be ready. But most of us who are spending time on politics today are focused inward, choosing roles and activities designed for our short-term pleasure. We are repelled by the slow-and-steady activities that characterize service to the common good. In Politics Is for Power, pioneering and brilliant data analyst Eitan Hersh shows us a way toward more effective political participation. Aided by political theory, history, cutting-edge social science, as well as remarkable stories of ordinary citizens who got off their couches and took political power seriously, this book shows us how to channel our energy away from political hobbyism and toward empowering our values.

Discover the wonder of a life with God you can't contain. The pages of scripture are full of ordinary people who walked with God as he poured himself out through them to a world in need. What if God never changed? What if he is still speaking to us and longing to work miraculously through us? What if it isn't a matter of more training or effort but simply receiving and releasing everything he already purchased? "Life in the Overflow" invites you to know God intimately as your Daddy in a way that spills out of you naturally. Filled with disarming honesty and fervent expectation, this book mirrors a reflection of who you are, who your God is and what he actually longs to do through "ordinary, messy kids" today!

Global Demographic Change and Its Implications for Military Power

The Internet's ultimate impact on the nature of power is a concern shared by nations around the world. The Future of Power examines what it means to be powerful in the twenty-first century and illuminates the road ahead. Power evolves. At the beginning of the twenty-first century, unsurpassed in military strength and ownership of world resources, the United States was indisputably the most powerful nation in the world In The Future of Power, Joseph S. Nye, Jr., a longtime analyst of power and a hands-on practitioner in government, delivers a new power narrative that considers the shifts, innovations, bold technologies, and new relationships that will define the twenty-first century. He shows how power resources are adapting to

the digital age and how smart power strategies must include more than a country's military strength. Today, China, Brazil, India, and others are increasing their share of world power resources. Information once reserved for the government is now available for mass consumption. The Internet has literally put power at the fingertips of nonstate agents, allowing them to launch cyberattacks on governments from their homes and creating a security threat that is felt worldwide. The cyberage is rendering traditional markers of power obsolete and has created a new power frontier among states, ripe with opportunity for developing countries. To remain at the pinnacle of world power, the United States must adopt a strategy that designed for a global information age.

This special issue of Space Science Reviews contains selected papers on electromagnetic man-made and natural environmental interactions. Originally these papers were pre sented at the Fifth International Wroclaw Symposium on Electromagnetic Compatibility. Wroclaw (Poland), 17-19 September, 1980, a biennial gathering of scientists and engineers. At that time, the symposium organizers selected a few persons of recognized authority and invited them to organize special sessions. Session organizers were given a free hand in the choice of topics and speakers. As a result, several impressive papers originated and a number of interesting people came to Wroclaw to discuss the recent results of their research. Professor Hiroshi Kikuchi from the Nihon University (J apan) was among them, serving as one of the most effective invited session chairmen/organizers at the symposium. The papers presented here were read at Prof. Kikuchi's session. At the symposium they received considerable attention not only because of the fascinating personalities and temperaments of the authors, but mainly because of the timeliness and soundness of their content. Their topic links both scientific and engineering fields in making attempts to resolve these kinds of specific hybrid problems. The problems discussed appear to be of interest not only to the EMC* community but also to a broader forum of persons interested in the areas of electrical and space science, and engineering in general. This opinion was confirmed during the URSI** symposium in Washington, D. C.

Through a careful consideration of historical factors and raw data, Denny Roy examines the benefits and consequences of a more politically, economically, and militarily potent China. Since China's sphere of influence encroaches on the autonomy of regional states, its attempts to increase its security have diminished the security of its neighbours.

Competition and Cooperation in the Developing World : a Report of the CSIS Smart Power Initiative

Return of the Dragon

China has been pursuing its national interests recently through the exercise of "soft power," as it projects a nonconfrontational face to the developing world. It is China's rapid economic expansion—and the country's need for natural resources, export markets, and political influence—that has led it to step up its engagement with developing countries in Southeast Asia, the Middle East, Africa, and Latin America.Extensive debate is ongoing in China regarding the source of the country's soft power and its reasons for utilizing it. It currently lacks a coordinated national soft-power strategy and views its soft power as defensive and largely reactive, a point of view intended to allay fears in other states of a Chinese threat. In the United States, also, debate is taking place about whether China's soft-power projection represents healthy competition or a strategic threat.Engaging China successfully on critical global issues such as climate change, energy, and security requires an accurate assessment of Chinese policy, exigencies, and progress in these issue areas. This new report from the CSIS Smart Power Initiative seeks to provide such an assessment, offering a multifaceted view of China's use of smart power and its implications for the United States.

What do you do after life has handed you a wake-up call?Author Brian Seth Hurst experienced a significant professional setback, but, rather than "soldier on," he recognized it as a profound opportunity to acknowledge a deeper foundation at work in his life. It is the affirmation that there is sheer power in what one believes, and, for better or worse, those beliefs are the foundation for the reality we create.The question of "Why?" began a thirty-day inquiry and adventure for Hurst into the unknown. The result is the book W H O L E - a collection of powerful essays that examine how beliefs serve, or do not serve, us in our lives, how those beliefs can be transformed to change our circumstances, and the power of the ultimate connection to Source.What do you do after life has handed you a wake-up call? If you decide to remain awake, then you begin looking at your life. W H O L E is your companion as you review the past, balance all areas of your life, and begin to create anew.W H O L E prompts a very personal, progressive, and conscious examination of concepts and belief systems in every area of your life, ranging from relationships, work and time, to money, the environment, morality and your purpose. It asks provocative and thoughtful questions that lead to understanding.How do you reconcile everything that has happened and is happening in your life with the one you truly want? The good and the bad, the joy and the hurt, the wins and the losses - all those parts form the experience of your life and your identity. Yet, you are much greater than the sum of all those parts.W H O L E allows you to make sense of the pieces of your life as part of the greater being that is You.W H O L E presents you with the opportunity to reconcile the past, arrive wholly connected in the present, and create your future.W H O L E literally answers the question, "What was I thinking?"To know "whole" in the duality of your reality, you must know broken.To know broken is to recognize that you are, always have been, and always will be WHOLE."

Your Choice, Your Voice, Our Future What I am offering Maine is nothing like what others who have run for this position have offered. I have never wanted someone to be my voice, and I do not offer to be yours. I am using this opportunity to shine light on the system that creates a stage for elites and keeps everyone else from having a voice. I am running for Governor of Maine to educate, and if we win, I am smashing the stage so everyone may have their voice heard equally. Our system is disenfranchising, falsely binary, oppressive, and fraught with contention and slavery. We can rise against this or we can continue on the same path. It has been the result of the American system that generation after generation left this nation (and the world) freer and more prosperous than the last. We cast off race-based slavery, we have destroyed the notion that one gender should rule while the other obeys, we had built a nation of rights and freedom... but, we have backslidden. Our nation is not better off than it was a generation ago. We are in unprecedented debt, have resurfaced racism and sexism, we have instilled a class warfare, and we are being oppressed by fascism and authoritarians. Generation X and Millennials have less opportunity, less ability to grow and flourish, and less unity than our grandparents. We have been slowly taken over by a rotting infestation of cronies, puppet masters, propogandists, and dictators. As our nations becomes more centralized, Maine can stand in opposition. We have an opportunity to demonstrate what America has lost. Maine has strong educators, doctors, nurses, social workers, counselors, laborers of all types, and most respectably, we have strong work and moral ethics. Our State has diversity and a will to surpass obstacles and be reveled across the nation and world. We need the will to see an opportunity through the despair. By continuing what we do best, by growing rather than contracting, by embracing innovation and adaptation rather than antiquity and failed ideas, we can guide America back to prosperity. Maine can be the economic engine of tomorrow's America. Through this book, we have covered Education, Healthcare, ideological spectrums, Corrections, Rehabilitation, Culture, Community, politics, Economics, Energy, business, debt, governance, and a slew of other topics. Through this journey, we have delved into what keeps us from growth, how we can overcome oppressing obstruction, and what we could do to drop the shackles and pick up prosperous freedom. Reaching a better future for everyone takes change. Change is not always easy; change is often coupled with fear. We need not fear the future and change when we can be so positively impacted. When we decide to swallow our fear and move toward a better future, we will be unstoppable. I am applying for a job: the executive position of our State of Maine. This is your choice, your voice, our future. Richard Lee Light

#1 New York Times Bestseller "THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In Think Again, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I've never felt so hopeful about what I don't know." –Brené Brown, Ph.D., #1 New York Times bestselling author of Dare to Lead The bestselling author of Give and Take and Originals examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become. Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of Originals and Give and Take, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. Think Again reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom.

Two visionary thinkers examine the defining issue of our time: how the nature of power has changed, and how this 'New Power' is already shaping our future.

The #1 New York Times bestseller. Over 4 million copies sold! Tiny Changes, Remarkable Results No matter your goals, Atomic Habits offers a proven framework for improving--every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to:

- make time for new habits (even when life gets crazy);
- overcome a lack of motivation and willpower;
- design your environment to make success easier;
- get back on track when you fall off course; ...and much more.

Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal. The author of the acclaimed New York Times bestseller The Next 100 Years now focuses his geopolitical forecasting acumen on the next decade and the imminent events and challenges that will test America and the world, specifically addressing the skills that will be required by the decade 's leaders. In the long view, history is seen as a series of events—but the course of those events is determined by individuals and their actions. During the next ten years, individual leaders will face significant transitions for their nations: the United States ' relationships with Iran and Israel will be undergoing changes, China will likely confront a major crisis, and the wars in the Islamic world will subside. Unexpected energy and technology developments will emerge, and labor shortages will begin to matter more than financial crises. Distinguished geopolitical forecaster George Friedman analyzes these events from the perspectives of the men and women leading these global changes, focusing in particular on the American president, who will require extraordinary skills to shepherd the United States through this transitional period. The Next Decade is a provocative and fascinating look at the conflicts and opportunities that lie ahead.
