Newspaper Articles from the Flood of September 1986

Prepared for the City Plan Commission of Bloomington

The management of flood risk seems to be facing a daunting paradox. Despite increasingly effective risk knowledge tools and the efforts of international institutions to place risk reduction at the top of the agenda, the cost of disasters continues to increase. It is also increasingly difficult to avoid the urbanization or development of potential flood zones. The fundamental issue involves determining the conditions necessary for efficient prevention by focusing on adaptability to risk, which implies coping with the risk of flooding rather than directly fighting against it or simply ignoring it. This second volume of the Floods series of books explores existing policies and tools which mitigate the impact of flooding: the construction of protective structures, the reduction of vulnerability, land use planning, the improvement of crisis management, etc. The closing chapters focus on the question of adaptation through post-flood reconstruction, integrating disaster risk reduction measures, e.g. through resilient urbanism. Presents the state-of-the-art surrounding flood issues, from the description of the phenomena, to the management of risk (dikes, dams, reducing vulnerability and management of crisis) Written by specialists, but accessible to mainstream scientists Exposes knowledge, methodologies, scientific locks and the prospects of each discipline on the theme of floods

A scrapbook of newspaper articles from the Cincinnati area newspapers covering the Ohio River flood and cleanup, Jan. 22-March 10, 1937. Inscribed by Joy Ott on inside front cover.

Holly Remembers the '65 Flood

A Historical Observation of the 25th Anniversary of the Flood of June, 1965

Capacity, Equity and Sustainability

Newspaper Articles about the Flood of June 16, 1965, in Eastern Colorado

Technical Report

Imperial County and San Diego County Streams that Flow Into the Salton Sea, California

Features three dozen firsthand accounts of Hurricane Floyd, the most destructive hurricane in North Carolina history, and recounts dramatic rescues, sorrowful losses, and uplifting displays of spirit. Simultaneous.

Collection of photocopies of The Telegraph (Alton, Ill.) newspaper articles chronicling the areas affected by the flood of 1995.

Northern California Flood Disaster Press Clippings, Dec. 22, 1964-Feb. 12, 1965

Floods of the Riverbend Area

1983-1994

Frankstown Branch, Juniata River, Frankstown, Pennsylvania

Java Under the Japanese Occupation, 1942-1945

Sedro-Woolley Courier-Times 1904-1951

With its major focus on the citizens and events in Lancaster County, this scrapbook comprised of newspaper clippings and obituaries. Lancaster experienced a major flood in 1936 from the Susquehanna River and it wrecked train tracks that spanned from Wrightsville to Columbia. The aftermath of the flood was covered in newspaper articles that are in this scrapbook. Some of the newspaper articles reveal the history of Lancaster County, while others convey engagement, wedding, anniversary and birth announcements. Many important people were noted within the scrapbook including Walter G. Bushong, Charles Henry Demuth, Andrew W. Mellon, Milton Thomas Garvin and Dr. J.P. McCaskey.

Scrapbooks of newspaper articles related to the Ohio River flood and cleanup, Jan. 22-March 10, 1937, and of the freezing over of the Ohio River, Jan. 1940. Very few clippings have the newspaper identified, but most are very likely from the 3 Cincinnati papers publishing at that time, the Enquirer, Post, and Times-Star. A total of 106 p. of adhesive scrapbook pages with plastic cover sheets. The flood clippings cover Jan.-Feb. 1937, and the river freezing, Jan. 1940, 10 p. at the end of v.3.

Ste.Genevieve Flood Control Study

The 1937 Flood of the Ohio River

Rio de Flag, Flood Control Study
Adaptation to Climate Change through Water Resources Management
Flood Plain Information
Skagit Valley Herald 1895-1969

Scrapbook of newspaper articles from the Cincinnati enquirer covering the Ohio River flood of Jan. 22-March 10, 1937 on the fiftieth anniversary in 1987.

A comprehensive analysis of the Japanese occupation of Java. The book explores the human drama that cannot be simply explained in terms of nationalism and fascism. The totality of Indonesian society is addressed, including the politics and daily lives of peasants.

Newspaper articles about the 1955 flood
Ellicott Creek Flood Control, Erie County
Merced County Streams Flood Control Plan
Concrete Herald 1920-1970

The 1955 Flood
Hurricane Floyd Remembered

Contains photocopies of various California newspaper articles describing disaster flood relief efforts in California during 1964 and 1965.

Collection of photocopies of The Telegraph (Alton, Ill.) newspaper articles chronicling the floods affecting the Riverbend (Alton, IL) area. Also includes photocopies of personal photographs.

Flood Plain Information, Beanblossom Creek and Its Tributaries Vicinity of Bloomington, Indiana
Skagit River Floods

Managing Floodplain Development Through the National Flood Insurance Program
1937 Ohio River Flood in Cincinnati, Ohio

Scrapbook of newspaper articles related to the Ohio River flood and cleanup, Jan.-March, 1937. Few clippings have the newspaper identified, but most are very likely from the 3 Cincinnati papers publishing at that time, the Enquirer, Post, and Times-Star. In addition to articles about the flood, river stages, and aftermath, includes clippings of advertisements for products such as Lysol, Creolin antiseptic, candles, and fumigation services ; business and insurance company notices to employees and customers ; information about the water supply and locations to get clean water, and notices of resumption of water, power, and streetcar services. Additional special sections of newspapers laid in back.

Floods and Flood Control is one of a series of special technical reports covering important phases of the work of TVA's Office of Engineering. The principle concern of the report is the technical engineering aspects of floods and flood control of the Tennessee River Basin and the effect of this control downstream on the lower Ohio and Mississippi Rivers.

Floods

Compilation of original newspaper articles from the Santa Cruz Sentinel-News covering the flood of December 1955. Articles begin on December 28, 1955 and conclude on December 9, 1958.

The impacts of human-induced climate change are largely mediated by water, such as alterations in precipitation and glacial melt patterns, variations in river flow, increased occurrence of droughts and floods, and sea level rise in densely populated coastal areas. Such phenomena impact both urban and rural communities in developed, emerging, and developing countries. Taking a systems approach, this book analyzes evidence from 26 countries and identifies common barriers and bridges for local adaptation to climate change through water resources management. It includes a global set of case studies from places experiencing increased environmental and social pressure due to population growth, development and migration, including in Africa, Asia, Australia, Europe, North and South America. All chapters consider the crosscutting themes of adaptive capacity, equity, and sustainability. These point to resilient water allocation policies and practices that are capable of protecting social and environmental interests, whilst ensuring the efficiency of water use.

often-scarce resource.
