

Nickel And Dimed Dialectical Journal

Historical translations and underground transfers of knowledge and values between cultural domains merit more attention. This book discusses the past, present and future of meaning. It shows how management of meaning in organizations fuels sociocultural evolution in complex societies, changing semantic fields of possible meanings ahead. This book tells the story of fashion workers engaged in the labor of design and the material making of New York fashion. Christina H. Moon offers an illuminating ethnography into the various sites and practices that make up fashion labor in sample rooms, design studios, runways, factories, and design schools of the New York fashion world. By exploring the work practices, social worlds, and aspirations of fashion workers, this book offers a unique look into the meaning of labor and creativity in 21st century global fashion. This book will be of interest to scholars in design studies, fashion history, and fashion labor.

Paid work is absolutely central to the culture and politics of capitalist societies, yet today's work-centred world is becoming increasingly hostile to the human need for autonomy, spontaneity and community. The grim reality of a society in which some are overworked, whilst others are condemned to intermittent work and unemployment, is progressively more difficult to tolerate. In this thought-provoking book, David Frayne questions the central place of work in mainstream political visions of the future, laying bare the ways in which economic demands colonise our lives and priorities. Drawing on his original research into the lives of people who are actively resisting nine-to-five employment, Frayne asks what motivates these people to disconnect from work, whether or not their resistance is futile, and whether they might have the capacity to inspire an alternative form of development, based on a reduction and social redistribution of work. A crucial dissection of the work-centred nature of modern society and emerging resistance to it, *The Refusal of Work* is a bold call for a more humane and sustainable vision of social progress.

The New York Times bestselling work of undercover reportage from our sharpest and most original social critic, with a new foreword by Matthew Desmond, author of *Evicted Millions of Americans work full time, year round, for poverty-level wages*. In 1998, Barbara Ehrenreich decided to join them. She was inspired in part by the rhetoric surrounding welfare reform, which promised that a job—any job—can be the ticket to a better life. But how does anyone survive, let alone prosper, on \$6 an hour? To find out, Ehrenreich left her home, took the cheapest lodgings she could find, and accepted whatever jobs she was offered. Moving from Florida to Maine to Minnesota, she worked as a waitress, a hotel maid, a cleaning woman, a nursing-home aide, and a Wal-Mart sales clerk. She lived in trailer parks and crumbling residential motels. Very quickly, she discovered that no job is truly "unskilled," that even the lowliest occupations require exhausting mental and muscular effort. She also learned that one job is not enough; you need at least two if you want to live indoors. *Nickel and Dimed* reveals low-rent America in all its tenacity, anxiety, and surprising generosity—a land of Big Boxes, fast food, and a thousand desperate stratagems for survival. Read it for the smoldering clarity of Ehrenreich's perspective and for a rare view of how "prosperity" looks from the bottom. And now, in a new foreword, Matthew Desmond, author of *Evicted: Poverty and Profit in the American City*, explains why, twenty years on in America, *Nickel and Dimed* is more relevant than ever.

Growing Up in the Nuclear Shadow of Rocky Flats
Half-light
Fifth edition
The Practice of Inclusion
Feminism, Marxism, Antiwork Politics, and Postwork Imaginaries
The Management of Meaning in Organizations

This is a collection of essays that address the international changes in welfare policy. The book discusses the new patterns of governing associated with the notions of welfare, care, and education that emerge during the late Twentieth and early Twenty-first-centuries. The issues examined are, among others, the role of international donors and their emphasis on efficiency and lower social subsidies, international migration and its impact on welfare policy inclusions (and exclusions), and national policy change. While representing many different locations and traditions, contributors work within a variety of critical theoretical perspectives that critique our cultural ways of reasoning about the care and education of the child, the role and practice of the state, and the social and cultural construction of citizenship and nationhood.

This edited collection provides a series of accounts of workers' local experiences that reflect the ubiquity of work's digitalisation. Precarious gig economy workers ride bikes and drive taxis in China and Britain; call centre workers in India experience invasive tracking; warehouse workers discover that hidden data has been used for layoffs; and academic researchers see their labour obscured by a 'data foam' that does not benefit them. These cases are couched in historical accounts of identity and selfhood experiments seen in the Hawthorne experiments and the lineage of automation. This book will appeal to scholars in the Sociology of Work and Digital Labour Studies and anyone interested in learning about monitoring and surveillance, automation, the gig economy and the quantified self in the workplace.

Diversity at Work: The Practice of Inclusion How can organizations, their leaders, and their people benefit from diversity? The answer, according to this cutting-edge book, is the practice of inclusion. Diversity at Work: The Practice of Inclusion (a volume in SIOP's Professional Practice Series) presents detailed solutions for the challenge of inclusion—how to fully connect with, engage, and empower people across all types of differences. Its editors and chapter authors—all topic experts ranging from internal and external change agents to academics—effectively translate theories and research on diversity into the applied practice of inclusion. Readers will learn about the critical issues involved in framing, designing, and implementing inclusion initiatives in organizations and supporting individuals to develop competencies for inclusion. The authors' diverse voices combine to provide an innovative and expansive model of the practice of inclusion and to address its key aspects at the individual, group, and organizational levels. The book, designed to be a hands-on resource, provides case studies and illustrations to show how diversity and inclusion operate in a variety of settings, effectively highlighting the practices needed to benefit from diversity. This comprehensive handbook: Explains how to conceptualize, operationalize, and implement inclusion in organizations. Connects inclusion to multiple dimensions of diversity (including gender, race, ethnicity, nationality, social class, religion, profession, and many others) in integrative ways, incorporating specific and relevant examples. Includes models, illustrations, and cases showing how to apply the principles and practices of inclusion. Addresses international and multicultural perspectives throughout, including many examples. Provides practitioners with key perspectives and tools for thinking about and fostering inclusion in a variety of organizational contexts. Provides HR professionals, industrial-organizational psychologists, D&I practitioners, and those in related fields—as well as anyone interested in enhancing the workplace—with a one-stop resource on the latest knowledge regarding diversity and the practice of inclusion

in organizations. This vital resource offers a clear understanding of and a way to navigate the challenges of creating and sustaining inclusion initiatives that truly work. A division of the American Psychological Association and established in 1945, the Society for Industrial and Organizational Psychology (SIOP) is the premier association for professionals charged with enhancing human well-being and performance in organizational and work settings. SIOP has more than 7,000 members.

The concepts of alienation and its overcoming are central to Marx's thought. They underpin his critique of capitalism and his vision of future society. Marx's ideas are explained in rigorous and clear terms. They are situated in the context of the Hegelian ideas that inspired them and put into dialogue with contemporary debates.

"This book interprets insights from the complexity sciences to explore seven types of complexity better to understand the predictable unpredictability of social life. Drawing on the natural and social sciences, it describes how complexity models are helpful, but insufficient for our understanding of complex reality. Taking an interdisciplinary approach, the book develops a complex theory of action more consistent with our experience that our plans inevitably lead to unexpected outcomes, explains why we are both individuals and thoroughly social, and gives an account of why, no matter how clear our message, we may still be misunderstood. The book investigates what forms of knowledge are most helpful for thinking about complex experience, reflects on the way we exercise authority (leadership), and thinks through the ethical implications of trying to cooperate in a complex world. Taking complexity seriously poses a radical challenge to more orthodox theories of managing and leading, based as they are on assumptions of predictability, control and universality. The author argues that management is an improvisational practice which takes place in groups in a particular context at a particular time. Managers can influence, but never control an uncontrollable world. To become more skilful in complex group dynamics involves taking into account multiple points of view, and acknowledging not knowing, ambivalence and doubt. This book will be of interest to researchers, professionals, academics and students in the fields of business and management, especially those interested in how taking complexity seriously can influence the functioning of businesses and organisations and how they manage and lead"--

Performance Theories in Education: Power, Pedagogy, and the Politics of Identity breaks new ground by presenting a range of approaches to understanding the role, function, impact, and presence of performance in

education. It is a definitive contribution to a beginning dialogue on how performance, as a theoretical and pragmatic lens, can be used to view the processes, procedures, and politics of education. The conceptual framework of the volume is the editors' argument that performance and performativity help to locate and describe repetitive actions plotted within grids of power relationships and social norms that comprise the context of education and schooling. The book brings together performance studies and education researchers, teachers, and scholars to investigate such topics as: *the relationship between performance and performativity in pedagogical practice; *the nature and impact of performing identities in varying contexts; *cultural and community configurations that fall under the umbrella of teaching, education, and schooling; and *the hot button issues of educational policies and reform as performances. With the aim of developing a clearer understanding of the effect, affect, and role of performance in education, the volume provides a crucial starting point for discourse among theorists and teacher practitioners who are interested in understanding and acknowledging the politics of performance and the practices of performative social identities that always and already intervene in the educational endeavor. Kelly Reichardt's 1994 debut *River of Grass* established her gift for a slow-paced realism that emphasizes the ongoing, everyday nature of emergency. Her work since then has communed with--yet remained apart from--postwar European realisms, the American avant-garde, independent film, and the emerging slow cinema movement. Katherine Fusco and Nicole Seymour read such Reichardt films as *Wendy and Lucy* and *Night Moves* to consider the root that emergency shares with emergence --the slowly unfolding or the barely perceptible. They see Reichardt as a filmmaker preoccupied with how environmental and economic crises affect those living on society's fringes. Her spare plots and slow editing reveal an artist who recognizes that disasters are gradual, with effects experienced through duration rather than sudden shock. Insightful and boldly argued, Kelly Reichardt is a long overdue portrait of a filmmaker who sees emergency not as a break from the everyday, but as a version of it. From bestselling writer David Graeber—"a master of opening up thought and stimulating debate" (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled "On the Phenomenon of Bullshit Jobs." It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society's most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. "Clever and charismatic" (The New Yorker),

Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture.

This book is for everyone who wants to turn their vocation back into an avocation and “a thought-provoking examination of our working lives” (Financial Times).

Globalization and Social Change

An overview of Catholic social thought, both official and non-official, particularly in recent decades, first published in 2006.

Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

The collected works of one of contemporary poetry’s most original voices Gathered together, the poems of Frank Bidart perform one of the most remarkable transmutations of the body into language in contemporary literature. His pages represent the human voice in all its extreme registers, whether it’s that of the child-murderer Herbert White, the obsessive anorexic Ellen West, the tormented genius Vaslav Nijinsky, or the poet’s own. And in that embodiment is a transgressive empathy, one that recognizes our wild appetites, the monsters, the misfits, the misunderstood among us and inside us. Few writers have so willingly ventured to the dark places of the human psyche and allowed themselves to be stripped bare on the page with such candor and vulnerability. Over the past half century, Bidart has done nothing less than invent a poetics commensurate with the chaos and appetites of our experience. Half-light encompasses all of Bidart’s previous books, and also includes a new collection, Thirst, in which the poet austerely surveys his life, laying it plain for us before venturing into something new and unknown. Here Bidart finds himself a “Creature coterminous with thirst,” still longing, still searching in himself, one of the “queers of the universe.” Visionary and revelatory, intimate and unguarded, Bidart’s Half-light: Collected Poems 1965-2017 are a radical confrontation with human nature, a conflict eternally renewed and reframed, restless line by restless line.

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

“ An intimate and deeply human memoir that shows why we should all be concerned about nuclear safety, and the dangers of ignoring science in the name of national security. ” —Rebecca Skloot, #1 New York Times bestselling author of *The Immortal Life of Henrietta Lacks* A shocking account of the government ' s attempt to conceal the effects of the toxic waste released by a secret nuclear weapons plant in Colorado and a community ' s vain search for justice—soon to be a feature documentary Kristen Iversen grew up in a small Colorado town close to Rocky Flats, a secret nuclear weapons plant once designated "the most contaminated site in America." *Full Body Burden* is the story of a childhood and adolescence in the shadow of the Cold War, in a landscape at once startlingly beautiful and--unknown to those who lived there--tainted with invisible yet deadly particles of plutonium. It's also a book about the destructive power of secrets--both family and government. Her father's hidden liquor bottles, the strange cancers in children in the neighborhood, the truth about what was made at Rocky Flats--best not to inquire too deeply into any of it. But as Iversen grew older, she began to ask questions and discovered some disturbing realities. Based on extensive interviews, FBI and EPA documents, and class-action testimony, this taut, beautifully written book is both captivating and unnerving.

We still lack practical answers to one of the most basic questions in empirical research: How should researchers interpret meanings? The contributors take seriously the goals of both post-modernist and positivist researchers, as they offer detailed guidance on how to apply specific tools of analysis and how to circumvent their inherent limitations.

A financial and business expert takes on corporate America in a confrontational and well-researched attack on long work weeks and eroding job security in the American workplace.

Sociology, Work and Industry

A pair of playful and romantic twin guidebooks created specially for couples to help them talk about the difficult yet important issues that will affect their relationship and their future. Whether getting married or cohabitating, committed couples face important questions about money, work, children, household chores, sex, and a host of other issues that will shape their lives together. But the conversations around these big questions can be difficult, making them easy to avoid. How will you split your money? What kind of family do you envision having? Do you want kids—and how many? Where do spend the holidays? Where do you want to live? City or suburb? House or apartment? And what about . . .

sex? Charly Ligety and Les Stark want to make it easier for couples to talk to each other about intimidating topics with love and confidence. They spoke in depth with marriage and family therapists and interviewed dozens of dating, engaged, and recently married couples from around the country. Everything they learned—as well as the insights they've gained from their own relationships with their wives—is inside this warm and important guide. A pair of lighthearted conversation handbooks—one for you, one for your partner—Very Engaging prepares you to “go there.” Divided into a dozen chapters covering critical topics such as values, squabbles, family, religion, living together, and everything in between, Very Engaging includes a series of fun, interactive conversation prompts to get you and your partner talking and bring you closer together. Charly and Les create a comfortable, fun environment in which you and your significant other can learn more about one another to help you both navigate some of life's most significant (and not so significant) discussions with humor and confidence. Partners play through their own individual books simultaneously, turning the pages together. Each page is carefully designed to create a constructive, lively, and thoughtful discussion on the topic at hand. A relationship performance enhancer, Very Engaging is a journey of personal discovery perfect for dating, engaged, or married couples looking to tackle the hard stuff in an easy and approachable way.

Bureaucratic labor unions are under assault. Most unions have surrendered the achievements of the mid-twentieth century, when the working class was a militant force for change throughout the world. Now trade unions seem incapable of defending, let alone advancing, workers' interests. As unions implode and weaken, workers are independently forming their own unions, drawing on the tradition of syndicalism and autonomism—a resurgence of self-directed action that augurs a new period of class struggle throughout the world. In Africa, Asia, the Americas, and Europe, workers are rejecting leaders and forming authentic class-struggle unions rooted in sabotage, direct action, and striking to achieve concrete gains. This is the first book to compile workers' struggles on a global basis, examining the formation and expansion of radical unions in the Global South and Global North. The tangible evidence marshaled in this book serves as a handbook for understanding the formidable obstacles and concrete opportunities for workers challenging neoliberal capitalism, even as the unions of the old decline and disappear. Contributors include Au Loong-Yu, Bai Ruixue, Shawn Hattingh, Piotr Bizyukov, Irina Olimpieva, Genese M. Sodikoff, Aviva Chomsky, Dario Burszty, Gabriel Kuhn, Erik Forman, Steven Manicasteri, Arup Kumar Sen, Verity Burgmann, Ray Jureidini, Meredith Burgmann, and Jack Kirkpatrick.

Our usual representations of the opposition between the "civilized" and the "primitive" derive from willfully ignoring the relationship of distance our social science sets up between the observer and the observed. In fact, the author argues, the relationship between the anthropologist and his object of study is a particular instance of the relationship between knowing and doing, interpreting and using, symbolic mastery and practical mastery—or between logical logic, armed with all the accumulated instruments of objectification, and the universally pre-logical logic of practice. In this, his fullest statement of a theory of practice, Bourdieu both sets out what might be involved in incorporating one's own standpoint into an investigation and develops his understanding of the powers inherent in the second member of many oppositional pairs—that is, he explicates how the practical concerns of daily life condition the transmission and functioning of social or

cultural forms. The first part of the book, "Critique of Theoretical Reason," covers more general questions, such as the objectivization of the generic relationship between social scientific observers and their objects of study, the need to overcome the gulf between subjectivism and objectivism, the interplay between structure and practice (a phenomenon Bourdieu describes via his concept of the habitus), the place of the body, the manipulation of time, varieties of symbolic capital, and modes of domination. The second part of the book, "Practical Logics," develops detailed case studies based on Bourdieu's ethnographic fieldwork in Algeria. These examples touch on kinship patterns, the social construction of domestic space, social categories of perception and classification, and ritualized actions and exchanges. This book develops in full detail the theoretical positions sketched in Bourdieu's Outline of a Theory of Practice. It will be especially useful to readers seeking to grasp the subtle concepts central to Bourdieu's theory, to theorists interested in his points of departure from structuralism (especially from Lévi-Strauss), and to critics eager to understand what role his theory gives to human agency. It also reveals Bourdieu to be an anthropological theorist of considerable originality and power.

New Forms of Worker Organization

In this book, Christian W. Chun examines the ways in which identities, discourses, and topographies of both capitalist and anti-capitalist imaginaries and realities are embodied in the everyday practices of people. *A World without Capitalism?* is a sociolinguistic ethnography that explores the heretofore limited research in applied linguistics and sociolinguistics on the discursive and materialized representations and enactments of capitalism. Engaging across disciplinary fields, including applied linguistics, ethnography, political economy, philosophy, and cultural studies, Chun investigates in ethnographic detail how capitalism does and does not pervade people's everyday experiences. This book aims to further contribute to a much-needed understanding of how discourses operate in the co-constructions of capitalist and anti-capitalist imaginaries and instantiated realities and practices as narrated, lived, and embodied by people and material artifacts. This book is vital reading for students and researchers working in the fields of applied linguistics, discourse analysis, and cultural studies, as well as those interested in understanding capitalism and questioning how to live beyond it.

The bestselling author of *Pledged* returns with a groundbreaking look at the pressure to achieve faced by America's teens. In *Pledged*, Alexandra Robbins followed four college girls to produce a riveting narrative that read like fiction. Now, in *The Overachievers*, Robbins uses the same captivating style to explore how our high-stakes educational culture has spiraled out of control. During the year of her ten-year reunion, Robbins goes back to her high school, where she follows heart-tuggingly likeable students including "AP" Frank, who grapples with horrifying parental pressure to succeed; Audrey, whose panicked perfectionism overshadows her life; Sam, who worries his years of overachieving will be wasted if he doesn't attend a name-brand college; Taylor, whose ambition threatens her popular girl status; and The Stealth Overachiever, a mystery junior who flies

under the radar. Robbins tackles teen issues such as intense stress, the student and teacher cheating epidemic, sports rage, parental guilt, the black market for study drugs, and a college admissions process so cutthroat that students are driven to suicide and depression because of a B. With a compelling mix of fast-paced narrative and fascinating investigative journalism, *The Overachievers* aims both to calm the admissions frenzy and to expose its escalating dangers.

This volume provides a comprehensive and interdisciplinary account of the scholarship on religion, conflict, and peacebuilding. Looking far beyond the traditional parameters of the field, the contributors engage deeply with the legacies of colonialism, missionary activism, secularism, orientalism, and liberalism as they relate to the discussion of religion, violence, and nonviolent transformation and resistance. Featuring numerous case studies from various contexts and traditions, the volume is organized thematically into five different parts. It begins with an up-to-date mapping of scholarship on religion and violence, and religion and peace. The second part explores the challenges related to developing secularist theories on peace and nationalism, broadening the discussion of violence to include an analysis of cultural and structural forms. In the third section, the chapters explore controversial topics such as religion and development, religious militancy, and the freedom of religion as a keystone of peacebuilding. The fourth part locates notions of peacebuilding in spiritual practice by focusing on constructive resources within various traditions, the transformative role of rituals, youth and interfaith activism in American university campuses, religion and solidarity activism, scriptural reasoning as a peacebuilding practice, and an extended reflection on the history and legacy of missionary peacebuilding. The volume concludes by looking to the future of peacebuilding scholarship and the possibilities for new growth and progress. Bringing together a diverse array of scholars, this innovative handbook grapples with the tension between theory and practice, cultural theory, and the legacy of the liberal peace paradigm, offering provocative, elastic, and context-specific insights for strategic peacebuilding processes.

Timely, thoughtful, and comprehensive, this text directly supports pre-service and in-service teachers in developing curriculum and instruction that both addresses and exceeds the requirements of the Common Core State Standards. Adopting a critical inquiry approach, it demonstrates how the Standards' highest and best intentions for student success can be implemented from a critical, culturally relevant perspective firmly grounded in current literacy learning theory and research. It provides specific examples of teachers using the critical inquiry curriculum framework of identifying problems and issues, adopting alternative perspectives, and entertaining change in their classrooms to illustrate how the Standards can not only be addressed but also surpassed through engaging instruction. The Second Edition provides new material on adopting a critical inquiry approach to enhance student engagement and critical thinking planning instruction to effectively implement the CCSS in the classroom fostering critical

response to literary and informational texts using YA literature and literature by authors of color integrating drama activities into literature and speaking/listening instruction teaching informational, explanatory, argumentative, and narrative writing working with ELL students to address the language Standards using digital tools and apps to respond to and create digital texts employing formative assessment to provide supportive feedback preparing students for the PARCC and Smarter Balanced assessments using the book 's wiki site <http://englishccss.pbworks.com> for further resources

People and Places in a Divided World

Introduction to Sociology 2e

Men and women experience the city differently: in relation to housing assets, use of transport, relative mobility, spheres of employment and a host of domestic and caring responsibilities. An analysis of urban and gender studies, as co-constitutive subjects, is long overdue. *City and Gender* is a systematic treatment of urban and gender studies combined. It presents a feminist critique of mainstream urban policy and planning and a gendered reorientation of key urban social, environmental and city-regional debates. It looks behind the 'headline' issues of transport, housing, uneven development, regeneration and social exclusion, for instance, to account for the 'hidden' infrastructure of everyday life. The three main sections on 'Approaching the City', 'Gender and Built Environment' and, finally, 'Representation and Regulation' explore not only the changing environments, working practices and household structures evident in European and North American cities today, but also those of the global south. International case studies alert the reader to stark contrasts in gendered life-chances (differences between north and south as well as inequalities and diversity within these regions) while at the same time highlighting interdependencies which globally thread through the lives of women and men as the result of uneven development. This book introduces the reader to previously neglected dimensions of gendered critical urban analysis. It sheds light through competing theories and alternative explanations, on recent transformations of gender roles, state and personal politics and power relations; across intersecting spheres: of home, work, the family, urban settlements and civil society. It takes a household perspective alongside close scrutiny of social networks, gender contracts, welfare regimes and local cultural milieu. In addition to providing the student with a solid conceptual grounding across the broad structures of production, consumption and social reproduction, the argument cultivates an interdisciplinary awareness of, and dialogue between, the everyday issues of urban dwellers in affluent and developing world cities. The format of the book means that included with each chapter are key definitions, 'boxed' concepts and case study evidence along with specifically tailored learning activities and further reading. This is both a timely and trenchant discussion that has pertinence for students, scholars and researchers. *The Problem with Work* develops a Marxist feminist critique of the structures and ethics of work, as well as a perspective for imagining a life no longer subordinated to them. In a pioneering reinterpretation of the role of mainstream feminism, Eisenstein shows how

the ruling elites of developed countries utilize women's labor and the ideas of women's liberation and empowerment to maintain their economic and political power, both at home and abroad. Her explorations range from the abolition of "welfare as we know it" and the ending of the family wage in the United States to the creation of export-processing zones in the global South that depend on women's "nimble fingers"; and from the championing of microcredit as a path to women's empowerment in the global South to the claim of women's presumed liberation in the West as an ideological weapon in the war on terrorism. Eisenstein challenges activists and intellectuals to recognize that international feminism is at a fork in the road, and argues that it is crucial for feminists to throw in their lot with the progressive forces that are seeking alternatives to globalized corporate capitalism.

The radical black left has largely disappeared from the struggle for equality and justice. Michael Dawson examines the causes and consequences, and argues that the conventional left has failed to take race seriously as a force in reshaping American institutions and society. Black politics needs to find its way back to its radical roots.
