

Nine Tomorrows Isaac Asimov

Science Fiction and Fantasy Literature, A Checklist, 1700-1974, Volume one of Two, contains an Author Index, Title Index, Series Index, Awards Index, and the Ace and Belmont Doubles Index.

Gold is the final and crowning achievement of the fifty-year career of science fiction's transcendent genius, the world-famous author who defined the field of science fiction for its practitioners, its millions of readers, and the world at large. The first section contains stories that range from the humorous to the profound, at the heart of which is the title story, "Gold," a moving and revealing drama about a writer who gambles everything on a chance at immortality: a gamble Asimov himself made -- and won. The second section contains the grand master's ruminations on the SF genre itself. And the final section is comprised of Asimov's thoughts on the craft and writing of science fiction.

Letters to the Cyborgs describes a frightening future about to land on our doorsteps, based on inventions, science and technology we have today. Each story details the political, social, and environmental destruction of our world as Artificial Intelligence takes over the planet. With intelligence, insight and humor, Baker examines what it means to be human in a world where Cyborgs and robots rule. Ranging from chilling visions of Armageddon to haunting stories of the power of human love, with some comic relief thrown in to make the truth easier to handle, this groundbreaking collection of short stories faces the questions scientists, politicians and corporations are ignoring: when Artificial Intelligence becomes "self-aware" and is a thousand times more intelligent than any human being, what happens next? Scientists tell us that this "Singularity" will occur by 2030. "What is human?" will become the most important question in history as humans become 51% or more machine.

Poems

Fourteen classic Smith stories, set in his star-spanning future universe of scanners, planofforming ships and the Underpeople. Here is the account of the strange origin of the Vomact family and its role in founding the Instrumentality, of how one man's love broke the secret of Space-Three, of what happens to people too long between the stars - even of a shape-changing Martian with a passion for gadgets - in a collection that presents some of the strongest work of an unforgettable writer.

Twelve stories by the modern master of science fiction represent the evolution of his writing over a period of thirty-three years

Updates and expands science fiction scholar James Gunn's definitive, Hugo Award-winning critical volume about Isaac Asimov and his contributions to the science fiction genre.

One moment Joseph Schwartz is a happily retired tailor in Chicago, 1949. The next he's a helpless stranger on Earth during the heyday of the first Galactic Empire. Earth, as he soon learns, is a backwater, just a pebble in the sky, despised by all the other 200 million planets of the Empire because its people dare to claim it's the original home of man. And Earth is poor, with great areas of radioactivity ruining much of its soil--so poor that everyone is sentenced to death at the age of sixty. Joseph Schwartz is sixty-two. This is young Isaac Asimov's first novel, full of wonders and ideas, the book that launched the novels of the Galactic Empire, culminating in the Foundation series. This is Golden Age SF at its finest. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

"A biography of Russian-American science-fiction author Isaac Asimov"--Provided by publisher.

The second book in the Orphan Trains Trilogy from writing duo Al and Joanna Lacy When 62 orphans and abandoned children leave New York City on a train headed out West, they have no idea what to expect. Will they get separated from their friends or siblings? Will their new families love them? Will a family even pick them at all? But their futures are wilder than any of them could imagine, and range from kidnappings and whippings to stowing away on wagon trains, from starting orphanages of their own to serving as missionaries to the Apaches. No matter what, their paths are being watched by someone who cares about--and carefully plans--all of their tomorrows.

When strange animals land in Red's yard, he and his friend Slim agree to keep it to themselves. The creatures are unlike any that they've ever seen before, and are - to them - animals that would make a fortune putting on a show at the circus. All the while, their fathers are fretting over the arrival of interstellar diplomats, on whose trade their civilisation may have to rely on to survive. Despite the urgency of the mission, however, neither hide nor hair of them have been seen...

The Bicentennial Man

Contains four long science fiction stories written by Isaac Asimov in the 1950s, including the title work in which Martian colonists are hindered in their attempts to solve their problems by a Senator McCarthy-like politician.

Examining nearly every conspiracy theory in the public's consciousness today, this investigation seeks to link seemingly unrelated theories through a cultural studies perspective. While looking at conspiracy theories that range from the moon

landing and JFK's assassination to the Oklahoma City bombing and Freemasonry, this reconstruction reveals newly discovered connections between wide swaths of events. Linking Dracula to George W. Bush, UFOs to strawberry ice cream, and Jesus Christ to robots from outer space, this is truly an all-original discussion of popular conspiracy theories. A collection of all of Isaac Asimov's robot stories, including some which have never before appeared in book form.

Repairman Jack isn't your average appliance repairman--he fixes situations for people, often risking his own life. Jack has no last name, no social security number, works only for cash, and has no qualms when it comes to seeing that the job gets done. Dr. Alicia Clayton, a pediatrician who treats children with AIDS, is full of secrets, and she has just inherited a house that holds another. Haunted by painful memories, Alicia wants the house destroyed--but somehow everyone she enlists to help ends up violently killed. The house holds a powerful secret, and Alicia's charmless brother Thomas seems willing to do anything to get his hands on that secret himself. But not if Repairman Jack can find it first! Legacies is the first thrilling novel in the Repairman Jack series from bestselling author F. Paul Wilson At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Youth

Nine Horses, Billy Collins' s first book of new poems since Picnic, Lightning in 1998, is the latest curve in the phenomenal trajectory of this poet' s career. Already in his forties when he debuted with a full-length book, The Apple That Astonished Paris, Collins has become the first poet since Robert Frost to combine high critical acclaim with broad popular appeal. And, as if to crown this success, he was appointed Poet Laureate of the United States for 2001–2002, and reappointed for 2002–2003. What accounts for this remarkable achievement is the poems themselves, quiet meditations grounded in everyday life that ascend effortlessly into eye-opening imaginative realms. These new poems, in which Collins continues his delicate negotiations between the clear and the mysterious, the comic and the elegiac, are sure to sustain and increase his audience of avid readers.
