For more than a century, from 1900 to 2006, campaigns
of nonviolent resistance were more than twice as
effective as their violent counterparts in achieving their
stated goals. By attracting impressive support from
citizens, whose activism takes the form of protests,
boycotts, civil disobedience, and other forms of
nonviolent noncooperation, these efforts help separate
regimes from their main sources of power and produce
remarkable results, even in Iran, Burma, the Philippines,
and the Palestinian Territories. Combining statistical
analysis with case studies of specific countries and
territories, Erica Chenoweth and Maria J. Stephan detail
the factors enabling such campaigns to succeed and,
sometimes, causing them to fail. They find that
nonviolent resistance presents fewer obstacles to moral
and physical involvement and commitment, and that
higher levels of participation contribute to enhanced
resilience, greater opportunities for tactical innovation
and civic disruption (and therefore less incentive for a

regime to maintain its status quo), and shifts in loyalty among opponents' erstwhile supporters, including members of the military establishment. Chenoweth and Stephan conclude that successful nonviolent resistance ushers in more durable and internally peaceful democracies, which are less likely to regress into civil war. Presenting a rich, evidentiary argument, they originally and systematically compare violent and nonviolent outcomes in different historical periods and geographical contexts, debunking the myth that violence occurs because of structural and environmental factors and that it is necessary to achieve certain political goals. Instead, the authors discover, violent insurgency is rarely justifiable on strategic grounds.

Troisieme conference de la communaute europeenne sur handicap et education. Valladolid (España) 10-12/10/1991

This book examines the state of the Open and Distance Learning (ODL)-based secondary education in India. ODL-based education has been a key resource for children in India who can neither cope with nor avail of regular schooling opportunities due to economic, health and disability, or other constraints. The volume uses large-scale empirical data

collected from various Indian states and a sensitive theoretical framework to study the equity, efficiency, and effectiveness of the National Institute of Open Schooling (NIOS) and the State Open School (SOS).

Highlighting the roadblocks and barriers in terms of its reach, inclusion, and delivery, particularly to the marginalised, this book explores whether ODL has a potential of being a sustainable and effective option at the secondary and senior secondary level in India. Thus, it seeks to generate policy discourse around delivery mechanisms and effectiveness of ODL in developing countries. First of its kind, this comprehensive volume will be useful for scholars and researchers of education, education policy, public policy, and political studies.

Early Childhood Care and Education (ECCE) programme has gained importance today. Driven by socio-economic compulsions these days both parents seek jobs and remain away from the child for the whole day. Early Childhood Care centres provide them a safer alternative where their children can grow and develop in a stimulative environ-ment. Therefore, ECCE has been comprehensively included in teacher training programmes at all levels. Designed as a text for the undergraduate students of education (B.Ed.) and elementary education (B.El.Ed.), it provides uptodate and ready to use material. A complete section in the book is devoted to planning a pre-school or ECCE centre, organizing and managing it for its optimum utility and efficient functioning. The effort has been made to include the topics which will help students to understand the ECCE and its functioning in a straightforward and unconventional manner. KEY FEATURES : Written in a conversational style Comprehensive coverage with sample activities Numerous figures and illustrations for better

understanding of the subject Integration of theory and practice Conceptual clarity and practical approach The book would also be extremely useful to the nursery school teachers, teacher educators, parents, postgraduate students of education (M.Ed.) and for those who would like to run an ECCE centre as a good reference material.

It is often said that leaders are born, not made, but today we need to develop leadership among youth in various fields. Leadership is an important virtue for success. In the field of Education also it becomes important to understand and develop leadership for achieving the objectives. The management of all types of organizations depends upon the kind of leadership. An effective leader can bring out the best in the persons, enabling them to pursue a shared vision. Effective

leadership is reflected in the smooth and successful functioning of an organisation. Leading is a process rather than a position. This is important that teachers and teacher educators develop an understanding of this process. It is with this purpose this book has been compiled. It discusses meaning and nature of Leadership, characteristics of Good Leader, various models of Leadership and the concept of Educational Leadership. I hope this will help the students, teachers and teacher educators not only to develop an preliminary understanding of the process of Leadership, but also to select the appropriate models of Leadership and to develop leadership attributes in their personality.
