Forty-eight percent of U.S. households perform at least some automobile

maintenance on their own, with women now accounting for one third of this \$34

billion automotive do-it-yourself market. For new or would-be do-it-yourself

mechanics, this illustrated how-to guide has long been a must and now it's even

better. A complete reorganization now puts relevant repair and maintenance

information directly after each automotive system overview, making it much easier

to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and

repair information throughout, eliminating discussions of carburetors and adding

coverage of hybrid and alternative fuel vehicles. She's also revised schedules for

tune-ups and oil changes, included driving tips that can save on maintenance and

repair costs, and added new advice on troubleshooting problems and determining

when to call in a professional mechanic. For anyone who wants to save money on

car repairs and maintenance, this book is the place to start. Deanna Sclar (Long

Beach, CA), an acclaimed auto repair expert and consumer advocate, has

contributed to the Los Angeles Times and has been interviewed on the Today

show, NBC Nightly News, and other television programs.
