Inside you'll find: Five full-length sample tests that match the actual NLN PAX-RN exam in content, format, and science Clear explanations in the answer key for all sample test questions Expert strategies on achieving a top score

The only NLN-PAX study guide based on the evidence-based method of Cognitive Recall, with a customizable study schedule. Designed specifically for the NLN PAX, this study guide includes: A customizable study schedule 2 FULL practice and example questions Concise coverage of all domains and topics, including review items WHAT IS COGNITIVE RECALL? Coanitive Recall is the science of implementing the optimal space of time between learning something, then reviewing it, and later guizzing vourself on it. Scientists say studying effectively is not a function of how long or how often vou study - it's the order, schedule, and timing of vour studies. Traditional study guides tend to be nothing more than extended versions of repeated cram sessions, which is neither efficient or effective. Cramming is

the opposite of Cognitive Recall learning, evidenced by the extremely short-lived benefits. The memories from a cram session have been shown to fade away after only a few hours. That's not an option if you are serious about passing the NLN-PAX. CUSTOMIZED STUDY SCHEDULE Designed around the ideal timeframe of 30-days, our system can be easily extended or reduced to fit your specific schedule and test date. This PAX Guide has the functionality of a customizable calendar telling you not only what to focus on, but when to focus on it.
