Tony Redmond's Guide to
Successful Implementation
Commerce Business Daily
Network World

In this real-world guide for telephony decision makers, the author presents practical techniques for selecting, implementing, and managing voice communications systems-including Voice over IP. It enables buyers to focus on telephony systems that fit their organization's needs. It provides a wealth of new ideas that will enable them to provide new services, existing services at a lower

cost, and "zero downtime" service levels. It helps them to quickly articulate a telephony strategy that encompasses large and small offices, domestic and international locations, and a heterogeneous hardware/software environment.

The first book published on deploying Voice Over IP (VoIP) products from Nortel Networks, the largest supplier of voice products in the world. This book begins with a discussion of the current protocols used for transmitting converged data over IP as well as an

overview of Nortel's hardware and software solutions for converged networks. In this section, readers will learn how H.323 allows dissimilar communication devices to communicate with each other, and how SIP (Session Initiation Protocol) is used to establish, modify, and terminate multimedia sessions including VOIP telephone calls. This section next introduces the reader to the Multimedia Concentration Server 5100, and Nortel's entire suite of Multimedia Communications Portfolio

(MCP) products. The remaining chapters of the book teach the reader how to design, install, configure, and troubleshoot the entire Nortel product line. • If you are tasked with designing, installing, configuring, and troubleshooting a converged network built with Nortel's Multimedia Concentration Server 5100, and Multimedia Communications Portfolio (MCP) products, then this is the only book you need. • It shows how you'll be able to design, build, secure, and maintaining a cutting-edge converged network to

satisfy all of your business requirements · Also covers how to secure your entire multimedia network from malicious attacks
