In the desert sands of southern Jordan lies a once-hidden conflict landscape along the Hejaz Railway. Built at the beginning of the twentieth-century, this narrow-gauge 1,320 km track stretched from Damascus to Medina and served to facilitate participation in the annual Muslim Hajj to Mecca. The

discovery and archaeological investigation of an unknown landscape of insurgency and counter-insurgency along this route tells a different story of the origins of modern guerrilla warfare, the exploits of T. E. Lawrence, Emir Feisal, and Bedouin warriors, and the dramatic events of the Arab Revolt of 1916-18. Ten years of research in this prehistoric terrain has revealed sites lost for almost 100 years: vast campsites occupied by railway builders; Ottoman Turkish machine-gun redoubts; Rolls Royce Armoured Car raiding

camps; an ephemeral Royal Air Force desert aerodrome; as well as the actual site of the Hallat Ammar railway ambush. This unique and richly illustrated account from Nicholas Saunders tells, in intimate detail, the story of a seminal episode of the First World War and the reshaping of the Middle East that followed.

EIR RELEASES ROAD-MAP TO THE NEW WORLD
ECONOMIC ORDER: THE NEW SILK ROAD BECOMES THE
WORLD LAND-BRIDGE EIR's comprehensive study of the
progress of the Eurasian Land-Bridge project which Lyndon and
Helga LaRouche have championed for over 20 years, has finally

been completed. The official release date is Dec. 1. The 374-page report, entitled *The New Silk Road Becomes the World Land-Bridge*, "is nothing less than a conceptual, and often physical, road-map" to a New World Economic Order. This path is currently being charted by the nations of the BRICS (Brazil, Russia, India, China, and South Africa), who are leading a dynamic of global optimism toward real economic development, complete with new credit institutions and major high-technology projects for uplifting all mankind. After an introduction by Helga Zepp-LaRouche, the report lays out the "Metrics of Progress," based on the economic scientific principles developed by renowned physical economist Lyndon LaRouche. It then proceeds region by region, beginning with China and Russia, to present the stunning progress, and plans, which have been made toward the Eurasian Land-Bridge design that

the Chinese government laid out in 1996, and other nations have begun to rally behind in recent years. The report, complete with many full-color maps of its featured development corridors, is available in paperback for \$50 and hard cover bound for \$75.
