The Canon of Medicine

With this significant new work, Larry Cuban provides a unique and insightful

perspective on the bridging of the long-standing and well-known gap between teachers and administrators. Drawing on the literature of the field as well as personal experience, Cuban recognizes the enduring structural

relationship within school organizations inherited by teachers, principals, and superintendents, and calls for a renewal of their sense of common purpose regarding the role of schooling in a democratic society. Cuban

analyzes the dominant images (moral and technical), roles (instructional, managerial, and political), and contexts (classroom, school, and district) within which teachers, principals, and superintendents have worked
