Letting Go describes a simple and effective means by which to let go of the obstacles to Enlightenment and become free of negativity. During the many decades of the author's clinical psychiatric practice, the primary aim was to seek the most effective ways to relieve human suffering in all of its many forms. The inner mechanism of surrender was found to be of great practical benefit and is described in this book. Dr Hawkins's previous books focused on advanced states of awareness and Enlightenment. Over the years, thousands of students had asked for a practical technique by which to remove the inner blocks to happiness, love, joy, success, health and, ultimately, Enlightenment. This book provides a mechanism for letting go of those blocks. The mechanism of surrender that Dr Hawkins describes can be done in the midst of everyday life. The book is equally useful for all dimensions of human life: physical health, creativity, financial success, emotional healing, vocational fulfillment, relationships, sexuality and spiritual growth. It is an invaluable resource for all professionals who work in the areas of mental health, psychology,

medicine, self-help, addiction recovery and spiritual development. In the same right-to-the-point, no-nonsense style that was a hallmark of Positioning, this sequel squares off against critical marketing challenges such as how to make sure your message gets through in an era of information overload.

New Revelations of the Americas Before Columbus

Although there have been notable gains for women globally in the last few decades, gender inequality and gender-based inequities continue to impinge upon girls' and women's ability to realize their rights and their full potential as citizens and equal partners in decision-making and development. In fact, for every right that has been established, there are millions of women who do not enjoy it. In this book, studies from Latin America and the Caribbean, the Middle East and North Africa, and sub-Saharan Africa and South Asia are prefaced by an introductory chapter that links current thinking on. This comprehensive and authoritative guide will teach you the DAX language for business intelligence, data modeling, and analytics. Leading Microsoft BI consultants Marco Russo and Alberto Ferrari help you master everything from table functions through advanced code and model optimization. You'll learn exactly what happens under the hood when you run a DAX expression, how DAX behaves differently from other languages,

and how to use this knowledge to write fast, robust code. If you want to leverage all of DAX's remarkable power and flexibility, this no-compromise "deep dive" is exactly what you need. Perform powerful data analysis with DAX for Microsoft SQL Server Analysis Services, Excel, and Power BI Master core DAX concepts, including calculated columns, measures, and error handling Understand evaluation contexts and the CALCULATE and CALCULATETABLE functions Perform time-based calculations: YTD, MTD, previous year, working days, and more Work with expanded tables, complex functions, and elaborate DAX expressions Perform calculations over hierarchies, including parent/child hierarchies Use DAX to express diverse and unusual relationships Measure DAX query performance with SQL Server Profiler and DAX Studio

John Dewey's *Democracy and Education* addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational and contemplative studies in education and for the necessity of universal education for the advancement of self and society. First published in 1916, *Democracy and Education* is regarded as the seminal work on public education by one of the most important scholars of the century.

Disconnected is a path-breaking analysis of the relationship between schooling and employers in Latin America. It is sophisticated in its design, using multiple surveys and multiple methods. It distinguishes carefully among different types of skills and the relationship of each type to employment outcomes and employer needs. It examines both the demand and the supply side of the labor market. And it provides guidance for further work. We commend this book to all readers, scholars, and practitioners concerned with schooling and job markets in Latin America.

Explores some of the main ideas which the ILO has seized, developed and applied, examines their history and tells how they were pursued in different geographical and historical settings. Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

A Course in Miracles is the acclaimed spiritual guide that teaches the way to universal love and peace by undoing guilt through forgiving others. The "miracles" of the title refers to shifts in perception.

fear to love, which fosters the healing and sanctification of relationships. Although expressed in traditional Christianity, this life-changing work constitutes nonsectarian, universal spiritual teaching. The three-part approach begins with an explanation of the course's theory and the development of the experience of forgiveness. The second consists of a workbook, comprising 365 lessons — an exercise for each day of the year — intended to influence students' perceptions. The third section presents materials for teachers, in which the question-and-answer format provides responses for likely inquiries and definitions for terms used throughout the course. Written by Dr. Helen Schucman, a clinical and research psychologist, and edited by her colleague at Columbia University, Dr. William Thetford, from 1965 to 1970, *A Course in Miracles* has been translated into more than 20 languages and sold millions of copies around the world.

The Globally Harmonized System of Classification and Labelling of Chemicals (GHS) addresses the classification and labelling of chemicals by types of hazards. It provides the basis for worldwide harmonization of rules and regulations on chemicals and aims at enhancing the protection of human health and the environment during their handling, transport and use by ensuring that the information about their physical, health and environmental hazards is available. The sixth revised edition includes, inter alia, a new hazard class for desensitized explosives and a new hazard category for pyrophoric gases; miscellaneous amendments intended to further clarify the criteria for some hazard classes (explosives, specific target organ toxicity following single exposure, aspiration hazard, and hazard to the aquatic environment) and to complement the information to be included in section 9 of the Data Sheet; revised and further rationalized precautionary statements; and an example of labelling for small packaging in Annex 7.

"A road map for investing that I have now been following for 57 years." --From the Foreword by Warren E. Buffett First published in 1934, *Security Analysis* is one of the most influential financial books ever written. Selling more than one million copies through five editions, it has provided generations of investors with the timeless value investing philosophy and techniques of Benjamin Graham and David L. Dodd. As relevant today as when they first appeared nearly 75 years ago, the teachings of Benjamin Graham, "the father of value investing," have withstood the test of time across a wide diversity of market conditions, countries, and asset classes. This new sixth edition, based on the classic 1940 version, is enhanced with 200 additional pages of commentary from some of today's leading Wall Street money managers. These masters of value investing explain why the principles and techniques of Graham and Dodd are still highly

relevant even in today's vastly different markets. The contributor list includes: Seth A. Klarman, president of The Baupost Group, L.L.C. and author of Margin of Safety James Grant, founder of Grant's Interest Rate Observer, general partner of Nippon Partners Jeffrey M. Laderman, twenty-five year veteran of BusinessWeek Roger Lowenstein, author of Buffett: The Making of an American Capitalist and When America Aged and Outside Director, Sequoia Fund Howard S. Marks, CFA, Chairman and Co-Founder, Oaktree Capital Management L.P. J. Ezra Merkin, Managing Partner, Gabriel Capital Group . Bruce Berkowitz, Founder, Fairholme Capital Management. Glenn H. Greenberg, Co-Founder and Managing Director, Chieftain Capital Management Bruce Greenwald, Robert Heilbrunn Professor of Finance and Asset Management, Columbia Business School David Abrams, Managing Member, Abrams Capital

Featuring a foreword by Warren E. Buffett (in which he reveals that he has read the 1940 masterwork "at least four times"), this new edition of Security Analysis will reacquaint you with the foundations of value investing—more relevant than ever in the tumultuous 21st century markets.

The Reenchantment of the World is a perceptive study of our scientific consciousness and a cogent and forceful challenge to its supremacy. Focusing on the rise of the mechanistic idea that we can know the natural world only by distancing ourselves from it, Berman shows how science acquired its controlling position in the consciousness of the West. He analyzes the holistic, animistic tradition--destroyed in the wake of Scientific Revolution of the sixteenth and seventeenth centuries--which viewed man as a participant in the cosmos, not as an isolated observer. Arguing that the holistic world view must be revived in some credible form before we destroy our society and our environment, he explores the possibilities for a consciousness appropriate to the modern era. Ecological rather than animistic, this new world view would be grounded in the real and intimate connection between man and nature.

A donkey and his master observe the beauty and tragedy of life in a Spanish village. *Azul...* (1888) is a book of stories and poems by Rubén Darío. Written while the poet was living in Chile, *Azul...* has been recognized as a pioneering work of Hispanic Modernism that launched the career of a leading Latin American poet. Both experimental and traditional, *Azul...* blends Darío's concern over the sustainability of modern life with his abiding interest in the myths and magic of ancient cultures. In addition to classical symbolism, inspired by the myth and philosophy of Ancient Greece, Rubén Darío's *Azul...* bridges the gap between ancient and modern. Rather than focus on the differences between the two, he envisions the past as a living entity, allowing history and fantasy to coincide with the social realities of his time. In these poems, stories, fairies from the plays of Shakespeare appear alongside the working men and women of Latin America. Dreams coincide with a reality mired in poverty, labor, and passionless social climbing. Poets and port workers sing and die in a city of ghostly beauty. *Azul...* is less a book than it is an experience, and nearly a century and a half after its publication it remains one worth the taking. With a beautifully designed cover and professionally typeset manuscript, this edition of Rubén Darío's *Azul...* is a classic of Nicaraguan literature reimagined for modern readers.

Completely revised and updated, this best-selling introduction to programming in JavaScript focuses on writing real applications. JavaScript lies at the heart of almost every modern web application, from social apps like Twitter to browser-based games.

frameworks like Phaser and Babylon. Though simple for beginners to pick up and play with, JavaScript is a flexible, complex language that you can use to build full-scale applications. This much anticipated and thoroughly revised third edition of Eloquent JavaScript dives deep into the JavaScript language to show you how to write beautiful, effective code. It has been updated to reflect the current state of JavaScript and browsers and includes brand-new material on features like class notation, arrow functions, iterators, async functions, template strings, and block scope. A host of new exercises have also been added to test your skills and keep you on track. As with previous editions, Haverbeke continues to teach through extensive examples and immerses you in code from the start, while exercises and full-chapter projects give you hands-on experience with writing your own programs. You start by learning the basic structure of the JavaScript language as well as control structures, functions, and object structures to help you write basic programs. Then you'll learn about error handling, bug fixing, modularity, and asynchronous programming before moving on to web browsers and how JavaScript is used to program them. As you build projects such as an artificial life simulation, a simple programming language, and a paint program, you learn how to:

- Understand the essential elements of programming, including syntax, control, and data
- Organize and clarify your code with object-oriented and functional programming techniques
- Script the browser and make basic web applications
- Use the DOM effectively to interact with browsers
- Harness Node.js to build servers and

utilities Isn't it time you became fluent in the language of the Web? * All source code is available online in an interactive sandbox, where you can edit the code, run it, and see its output instantly.
