who practice in the medically advanced countries and those in the developing countries.

Medically, the world has become an interesting place.

Air travel, frequent movement, and resettlement of people now mean

File Type PDF

Obstetrics And

Agboola
that doctors in
developed countries
can no longer stay
and practice within
the clinical

conditions that were
typical in their
practice settings.

Things have
changed, as they
cannot be certain of

therefore meets the needs of doctors, irrespective of their length of practice or where they practice. What applies to doctors certainly applies to medical students. This book is an atypical book as it puts in its two volumes of less than
