**In this book, we have hand-picked the most sophisticated, unanticipated, absorbing (if not at times crackpot!), original and musing book reviews of "La Estrategia del Oceano Azul." Don't say we didn't warn you: these reviews are known to shock with their unconventionality or intimacy. Some may be startled by their biting sincerity; others may be spellbound by their unbridled flights of fantasy. Don't buy this book if: 1. You don't have nerves of steel. 2. You expect to get pregnant in the next five minutes. 3. You've heard it all.**

Climate change is the great existential reality of our time. How we approach this crisis will affect life on Earth for all present and future generations. In spite of our collective ideals, irreversible damage to the environment is imminent and represents both an urgent local and global concern. Through photographs of an acutely endangered landscape, Oceano: An Elegy for the Earth explores the deep paradox between the devout, powerful presence of nature and environmental loss and damage. Extending eighteen miles along Central California's famed coastline and divided into both a natural preserve and a state vehicular recreation area, the Oceano Dune complex has long fascinated photographers and artists such as Edward and Brett Weston and Ansel Adams. The ephemeral, ever-changing landscape here expresses a sublime order and reflects the many correlations between the land and the dynamics of human society. Using metaphors that inspire hope and explore impermanence and darkness contrasted with the purity of suffusing light, Ulrich's photographs have been likened to Mark Rothko's "silence and solitude" that express the resonance and subtle dimensions of consciousness. The coastal environment of the Oceano Dunes is tempered by multiple threats such as incessant motorized activity, the toxicity of surrounding industrial-scale agriculture, and the second-worst air quality in the nation. Thus, for the title and sequence of the images, the photographer employs the literary form of an elegy, an extended reflection and lamentation on Earth during the twenty first century. An elegy refers to a poetic reflection of sorrow and love, often for a transient, mortal entity. As Ulrich writes: "Sorrow and love for Earth, indeed. No better articulation exists for my regard for our dying planet and common mother."
