In October, 1970, The Blue Flame rocket car screamed across the Bonneville Salt Flats at 622.407 mph setting the absolute world land speed record. The title held fast for 13 years and remains the fastest American-built car in history. Ray Dausman designed the rocket engine for The Blue Flame. Why wasn't he present when The Blue Flame set the world record? Why didn't the car achieve 1,000 mph as he designed it to do? Ray's story unfolds with humorous observations of what it was like to

Sarah, Ray's daughter, shares his story in this memoir of a man with a passion for rockets and new ideas. The Reluctant Rocketman introduces the reader to a boy with a thirst for new adventures who develops a passion for rockets as he reaches adulthood with an even greater appreciation for new ideas. The Blue Flame project is the common thread throughout these chapters which shed light on the life a self-taught rocket designer who had to decide if the price of invention was worth it after all.

Homer Hickam won the praise of critics and the devotion of readers with his first two memoirs set in the hardscrabble mining town of Coalwood, West Virginia. The New York Times crowned his first book, the #1 national bestseller October Sky, “an eloquent evocation ... a thoroughly charming memoir.” And People called The Coalwood Way, Hickam’s follow-up to October Sky, “a heartwarmer ... truly beautiful and haunting.” Now Homer Hickam continues his extraordinary story with Sky of Stone, dazzling us with exquisite storytelling as he takes us back to that remarkable small town we first came to know and love in October Sky. In the summer of ‘61, Homer “Sonny” Hickam, a year of college behind him, was dreaming of sandy beaches and rocket ships. But before Sonny could reach the seaside fixer-upper where his mother was spending the summer, a telephone call sends him back to the place he thought he had escaped, the gritty coal-mining town of Coalwood, West Virginia. There, Sonny’s father, the mine’s superintendent, has been accused of negligence in a man’s death — and the townspeople are in conflict over the future of the town. Sonny’s mother, Elsie, has commanded her son to

spend the summer in Coalwood to support his father. But within hours, Sonny realizes two things: His father, always cool and distant with his second son, doesn't want him there ... and his parents' marriage has begun to unravel. For Sonny, so begins a summer of discovery — of love, betrayal, and most of all, of a brooding mystery that threatens to destroy his father and his town. Cut off from his college funds by his father, Sonny finds himself doing the unimaginable: taking a job as a “track-laying man,” the toughest in the mine. Moving out to live among the miners, Sonny is soon dazzled by a beautiful older woman who wants to be the mine's first female engineer. And as the days of summer grow shorter, Sonny finds himself changing in surprising ways, taking the first real steps toward adulthood. But it's a journey he can make only by peering into the mysterious heart of Coalwood itself, and most of all, by unraveling the story of a man's death and a father's secret. In Sky of Stone, Homer Hickam looks down the corridors of his past with love, humor, and forgiveness, brilliantly evoking a close-knit community where everyone knows everything about each other's lives — except the things that matter most. Sky of Stone is a memoir that reads like a novel, mesmerizing us with rich language, narrative drive, and sheer storytelling genius.

The Most Dangerous Game by Richard Connell The Most Dangerous Game, also published as The Hounds of Zaroff, is a short story by Richard Connell first published in Collier's magazine on January 19, 1924. It features a big-game hunter from New York who falls off a yacht and swims to an isolated island in the Caribbean where he is hunted by a Cossack aristocrat. The story is an adaptation of the big-game hunting safaris in Africa and South America that were fashionable among wealthy Americans in the 1920s. The Most Dangerous Game by Richard Connell Big-game hunter Sanger Rainsford and his friend, Whitney, are traveling to the Amazon rainforest for a jaguar hunt. After a discussion about how they are "the hunters" instead of "the hunted," Whitney goes to bed and Rainsford hears gunshots. He climbs onto the yacht's rail and accidentally falls overboard, swimming to Ship-Trap Island,

which is notorious for shipwrecks. On the island, he finds a palatial chateau inhabited by two Cossacks: the owner, General Zaroff, and his gigantic deaf-mute servant, Ivan. The Most Dangerous Game by Richard Connell Zaroff, another big-game hunter, knows of Rainsford from his published account of hunting snow leopards in Tibet. Over dinner, the middle-aged Zaroff explains that although he has been hunting animals since he was a boy, he has decided that killing big-game has become boring for him, so after escaping the Russian Revolution he moved to Ship-Trap Island and set it up to trick ships into wrecking themselves on the jagged rocks that surround it. He takes the survivors captive and hunts them for sport, giving them food, clothing, a knife, and a three-hour head start, and using only a small-caliber pistol for himself. Any captives who can elude Zaroff, Ivan, and a pack of hunting dogs for three days are set free. He reveals that he has won every hunt to date. Captives are offered a choice between being hunted or turned over to Ivan, who once served as official knouter for The Great White Czar. Rainsford denounces the hunt as barbarism, but Zaroff replies by claiming that "life is for the strong." Realizing he has no way out, Rainsford reluctantly agrees to be hunted. During his head start, Rainsford lays an intricate trail in the forest and then climbs a tree. Zaroff finds him easily, but decides to play with him as a cat would with a

mouse, standing underneath the tree Rainsford is hiding in, smoking a cigarette, and then abruptly departing. The Most Dangerous Game by Richard Connell After the failed attempt at eluding Zaroff, Rainsford builds a Malay man-catcher, a weighted log attached to a trigger. This contraption injures Zaroff's shoulder, causing him to return home for the night, but he shouts his respect for the trap before departing. The next day Rainsford creates a Burmese tiger pit, which kills one of Zaroff's hounds. He sacrifices his knife and ties it to a sapling to make another trap, which kills Ivan when he stumbles into it. To escape Zaroff and his approaching hounds, Rainsford dives off a cliff into the sea; Zaroff, disappointed at Rainsford's apparent suicide, returns home. Zaroff smokes a pipe by his fireplace, but two issues keep him from the peace of mind: the difficulty of replacing Ivan and the uncertainty of whether Rainsford perished in his dive.

Are morals always relative? Are private actions--among consenting adults--always beyond the law? Or are there some behaviors which so weaken a society that common beliefs about right and wrong must be enforced to protect the common good? In opposing the decriminalization of private acts of homosexuality in Britain, Patrick Devlin maintained that not only is it reasonable to allow popular morality to influence lawmaking, it is imperative: "

.. For a society is not something that is kept together physically; it is held by the invisible bonds of common thought." Some sidestep this controversial issue by asserting that the law should not be used to enforce any morality. Others invoke John Stuart Mill's doctrine that the only purpose for laws governing any member of society is to prevent harm to others, chiefly physical harm. But, Devlin argued, while breaches of shared morality do not cause harm to other individuals in the way that murder and assault do, they do harm society by undermining its moral structure. Patrick Devlin (1905-1992) studied history and law at Cambridge University and became a successful lawyer.

Caught between two warring forces and overcoming horrific trials to pursue their hope of immigrating to the West, the Martels' story is a brutal, complex, and ultimately triumphant tale that illuminates the extraordinary power of love, faith, and one family's incredible will to survive and see their dreams realized.

As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on “a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise” (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the

Report. But one perspective has been missing up to this point—a 360-degree account of the day told through firsthand. Now, in *The Only Plane in the Sky*, Garrett Graff tells the story of the day as it was lived—in the words of those who lived it. Drawing on never-before-published transcripts, declassified documents, original interviews, and oral histories from nearly five hundred government officials, first responders, witnesses, survivors, friends, and family members, he paints the most vivid and human portrait of the September 11 attacks yet. Beginning in the predawn hours of airports in the Northeast, we meet the ticket agents who unknowingly usher terrorists onto their flights, and the flight attendants inside the hijacked planes. In New York, first responders confront a scene of unimaginable horror at the Twin Towers. From a secret bunker under the White House, officials watch for incoming planes on radar. Aboard unarmed fighter jets in the air, pilots make a pact to fly into a hijacked airliner if necessary to bring it down. In the skies above Pennsylvania, civilians aboard United 93 make the ultimate sacrifice in their place. Then, as the day moves forward and flights are grounded nationwide, Air Force One circles the country alone, its passengers isolated and afraid. More than simply a collection of eyewitness testimonies, *The Only Plane in the Sky* is the historic narrative of how ordinary people grappled with extraordinary events in real time: the father and son caught on different ends of the impact zone; the firefighter

At once a powerful tribute to the courage of everyday Americans and an essential addition to the literature of 9/11, *The Only Plane in the Sky* weaves together the unforgettable personal experiences of the men and women who found themselves caught at the center of an unprecedented human drama. The result is a unique, profound, and searing exploration of humanity on a day that changed the course of history, and all of our lives. James A. Project: Happily Ever After is her fearlessly honest and humorous account of how she went from being a "divorce daydreamer" to renewing her wedding vows—and all of the steps in between. From bikini waxes to erotica, romance instruction manuals to second honeymoons, the silent treatment to power struggles, she goes where many marriage-improvement gurus have feared to tread. Equal parts funny, poignant, and most importantly, useful, Bowman's story will give other miserably-married folks courage and hope. of experience working with parents and youngsters, advise parents to step back from situations such as those described and offer, instead, techniques for evaluating and solving family problems without needing to know “Why?”. The authors counsel parents how to determine if a problem exists, who owns the problem and who is best equipped to solve it. Numerous real-life examples are presented to illustrate the problem-solving process and solutions. In Parenting Without Guilt, parents learn not only to solve family problems, but also why the challenges parents and youngsters face today are more demanding than ever before. In addition, parents are guided through each stage of child development, from birth to young adulthood, with attention to typical problems any parent may anticipate. Resources that parents can use to help them resolve family discords are discussed, to include working with educators, clergy, pediatricians, private practitioners and others. With compassion, humor and wisdom gained through practical experience, Drs. Larson and Dockstader offer information and advice that provides any parent with the skills to raise successful children without guilt, anxiety or distress.
