The number of people interested and active in keeping bees at an amateur level has continued to increase over the past few years in both rural and urban situations. The book introduces the reader to beekeeping, including such areas as the workings of the colony, the structure of a hive, how to acquire bees and keep them healthy and what happens in each month in a beekeeping year. Each chapter is accompanied by anecdotes, answers to frequently asked questions and fascinating facts about bees and honey. The new edition includes new step-by-step sequences to illustrate procedures such as containing a swarm, identifying the queen, using a smoker and cleaning a hive as well as more information on different kinds of hives, disease management and many other key areas.

The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is

an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology "An uncontested
