Most people fight over something or other and language is usually at the very center of the conflict. Often the way we use language is the cause of the

battle. There are many areas in which fighting about language can be observed but civil law cases offer the most fertile examples of this warfare over words. What did the contract actually say? Was there

deception in the
advertising? Was the warning
label clear and effective?
Did the company evidence
race or age discrimination
against employees or
customers? Was one company's
name too similar to that of

another company? Did the corporation plagiarize the work of another? Did it fraudulently represent what its work? This book is about the ways linguistic analysis describes, exposes, and aids disputes in 18 civil cases

where language framed the battleground. Roger Shuy, a well-known forensic linguist and consultant, shows how the skills of linguistic analysis can help resolve disputed meanings, while also showing how civil cases

can prove to be fertile ground for linguistic scholarship. He does this by collecting and analyzing cases involving contracts, trademark disputes, advertisements, product liability, copyright

infringement,
discrimination, trademark
disputes, and fraud
controversies. In each case
he employs all the tools of
formal linguistics to show
how it can be as helpful as
other physical sciences in

resolving legal disagreements. The work will be of interest primarily to linguists -- sociolinguists, forensic linguists, and scholars and students of law and society -- as well as lawyers and law students.
