Management - the pursuit of objectives through the organization and co-ordination of people - has been and is a core feature, and function, of modern society. Some forms of corporate and bureaucratic management may come to be seen as a prevalent form of organization and organizing in the 20th century, and in the post-Fordist, knowledge driven contemporary world we are seeing different patterns, principles, and styles of management as old models are questioned. The functions, ideologies, practices, and theories of management have changed over time, as recorded by many scholars; and may vary according to different models of organization; and between different cultures and societies.
