What if you could make an extra \$100 each week with stocks you would love to own? If you're worried about current market instability... then the Wheel Strategy is here to amplify your returns. This triple income strategy has been dubbed "buy and hold on steroids" It's so effective because you receive an immediate cash injection directly into your brokerage account. With cash secured puts, you get paid to buy stocks you want to own. Then with covered calls, you get paid to own them. Finally, you can sell your shares for a profit. So you get paid not once. Not twice. But three times! And if you feel uncomfortable when you hear the word "options" - don't worry. Because inside this book... we explain exactly how to use options the way smart Billionaire investors like Warren Buffett and Bill Ackman do. Even if you started investing later in life. There are people who started in their 50s, 60s and 70s successfully trading the wheel for extra income on the side. Whether you want to earn an extra \$500, \$1,000 or even \$2,000 every single month. The Wheel Strategy makes it possible Here is just a fraction of what you'll discover inside this book - Why George Lucas (yes, that George Lucas) is the greatest options trader of all time - Page 15 - The 6 criteria you should use to select stocks for The Wheel - Page 69 - Is 100% annualized return really possible? - Page 23 - The 5 best stocks for the wheel strategy in 2021 - Page 54 - The minimum amount of premium you should be collecting. Most new traders get this wrong and lose their shirt in the process - Page 107 - Which IV your stocks should be at for optimum risk/reward rate. Many people new to the Wheel Strategy get this wrong and end up losing money as a result - Page 70 - "The VIX Trap" - you should never write options if the VIX is above this level - Page 97 - The perfect delta level for your covered calls so you get the right balance of premium without risking your stock being called away - Page 108 - 4 real examples of potential wheel candidates - Page 81 ...Plus free video tutorials for key parts of this strategy... plus 8 extra bonuses on Page 6 Even if you get stuck, you can always send us an email (provided inside the book) or reach out in our private investing community on social media - we're always happy to help with any questions you might have. And if you put together a portfolio of three of the best Wheel Strategy stocks... you could see an average yield of 15-20% per year... just from your options income. That's 2 to 3 times more than you'll see anywhere else! All this from your regular brokerage account... just as easily as you buy stock. Because if you know how to buy stocks, you can run the

wheel strategy. It's that simple. And when you receive just a single premium from one of these covered calls or cash secured puts (which is paid into your account instantly) it will cover the cost of this book 10x over. To get your copy right now, just scroll up and click "add to cart"
