mucosal indicators of drug use, sexual abuse, and eating disorders are also identified. Oral lesions are a relatively common occurrence in the pediatric population.

Fortunately, most of these lesions are transient and can be diagnosed clinically; examples include

aphthous ulcers,
traumatic ulcers, and
lesions of infectious
etiology such as viral
lesions and
candidiasis. There are
also a number of
mucosal lesions, such
as mucoceles and

require biopsy for
diagnosis and/or
surgical excision for
treatment. This book
