This book addresses questions and answer to provide guidance and serve as a resource for those considering such a selection. A variety of health care professionals are available to employers. Selecting an appropriate provider for the worksite depends on a number of factors including: The Occupational Safety and Health Administration's (OSHA) screening and surveillance requirements for specific substances or hazards associated with the worksite; the number, diversity, size and seriousness of the hazards involved at the worksite (s); and the level of resources committed to an occupational health care service as part of a comprehensive safety and health program; and distance to the closest trauma center or health care facility.
