This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and

Where ties to the West were limited, external democratizing pressure was weaker and countries rarely democratized. In these cases, regime outcomes hinged on the character of state and ruling party organizations.

Among the unique characteristics of the schema, all of which simplify faculty decision making, are the elimination of partial credit, the

Used consistently over time, it can restore credibility to grades by
