Even students capable of writing excellent

presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement.

Writing a Research Paper in Political Science breaks down the research paper into its constituent parts and shows students

what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political

protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and
