Written by Tad James and Wyatt Woodsmall, Time Line Therapy and the Basis of Personality is a compelling study of the important elements that make up a person's core personality, and a detailed exploration of and introduction to how Time Line therapy works in practice. Utilizing discoveries made by Richard Bandler, Time Line Therapy and the Basis of Personality, this book provides knowledge of how people actually store their memories, and sheds light on the effect that the system used for memory storage has on the individual. The authors contend that the concept of Time Line, or the notion of time that you have stored in your mind, shapes and structures your experience of the world, and consequently shapes your personality. Time Line Therapy premise that the client goes back to the first time they remember a particular problem, does change work utilizing Neuro Linguistic Programming (NLP) to eliminate irritating behaviors or issues and, if necessary, goes to subsequent times when their behavior or response was a problem, and undertakes further change work to resolve it. Written in an informative and practical style, Time Line Therapy and the Basis of Personality offers readers the opportunity to see how Time Line therapy works providing a clear description of how to elicit the Time Line, and sharing step-by-step methods to subsequently help the client to release a limiting decision or trauma, remove anxiety, or set a future goal. All of these key aspects are explained using clear language and examples. The authors' expert commentary is further complemented by examples, exercises and transcripts in order to help the reader transfer the theory into effective practice. In Section I, the authors explain the NLP Communication Model and share their in-depth analysis of the filters values, beliefs, attitudes, decisions, memories and meta programs which we subconsciously use around us and which form the basis of our personalities. Section II provides a comprehensive description of the Time Line and how it works: laying down a theoretical basis for the technique before offering insight into its practice and application with a demonstrative transcript of Time Line elicitation and change work in order to illustrate the concepts explored. In Section III, the authors carefully survey simple and complex meta programs (and how they can be changed) before exploring the formation, evolution and changing of values in Section IV, which includes a helpful exercise that gives guidance on how to elicit values from the client. Exploring many interesting contexts and how personality can be positively changed to help people live happier lives. The Basis of Personality is a worthy addition to any therapist's or NLP practitioner's library and is suitable reading for anyone interested in behavioral change. Sections include: Section I Introduction; Section II Time Line Therapy; Section III Meta Programs; Section IV Values. Time Line Therapy and the Basis of Personality was originally published in 1988 by Meta Publications.

The controls used on emotional arousal and cognitive processes are difficult in several societies, because of the presence of beliefs in several more issues and forces, which influence the bidirectional to and fro journey of effects between mental health and mental illness. Human beings in general accept only experiential methods of verifications and approval of reality, when they come in contact with their own mental and physical conditions. However, many may still be influenced by suggestions and produce experiences as per suggestions, which may not respond to scientific methods of verifications and corrections. Mental health and diseases, mainly in the domain of emotional health may therefore be affected by beliefs and psychological effects produced from cognitive processes and cognitive molding of emotions. Interventions in the cognitive and emotional domains do often work and changes may be brought out at the psychological and biological levels

*Empower your mind through neuro linguistic programming. Do you find yourself trapped in things that you cannot untangle yourself from even when you try so hard to beat them? Have you opted to using other unorthodox means to deal with some of these problems with little or no success? Well, what is it that you are trying to fight? Is it an addiction that you have found impossible to stop, a phobia, anxiety, low self-esteem or any other problem? What do you think has been making you "fall" every time you try overcoming the problem? Have you always been beating yourself up and saying that you are not good enough or that you have failed your loved ones, yourself and the society? Well, have you ever thought that the problem could be in the method you are using to fight the problem and not necessarily your doing? Actually, whatever method you might have been using might simply be defective, which simply means that you shouldn't expect any different results! Proponents of NLP believe that how you behave has a certain structure to it. Therefore, NLP aims to examine this structure to redefine the way your brain performs and responds to the information it receives. NLP helps you understand the things that make you tick. It opens your eyes to how you perceive the things that happen to you and around you on a daily basis. Your neurological system is responsible for transmitting all the information your brain receives from your environment. In this context, your environment refers to everything external including all your organs- your ears, your eyes, your skin, stomach, lungs, and every other part of your body. Your brain processes the information from all these parts of your body and transmits them to your brain and vice versa. For instance, once your brain receives information, it processes it and decides if it is good or bad news, and then transmits it to emotions that could be joy, tears, or laughter. The takeaway here is that your brain determines how you respond to everything going on around you and how you communicate with others. Now, imagine being able to somehow, alter the way your brain handles this information and force it to react in a certain way. That is the whole logic behind NLP. This book gives a comprehensive guide on the following: - Overview Of The History And Origins Of NLP - Mastery and body language - Persuasion: How To Influence People With NLP Techniques - Manipulation - Mind Control - Maximize Your Potential - Fundamental Concepts And Connection To Stoicism - Deception - Neuro-linguistic Programming in Everyday Life.....AND MORE! Therapists who have found this phobia difficult to treat will find everything they need to give their clients success. Anxious flyers who have “tried everything” to no avail can look forward to joining the nearly 10,000 graduates of the SOAR program who now have the whole world open to them as they fly anxiety free wherever they want. This approach begins by explaining how anxiety, claustrophobia, and panic are caused when noises, motions—or even the thought of flying—trigger excessive stress hormones. Then, to stop this problem, Captain Bunn takes the reader step-by-step through exercises that permanently and automatically control these feelings. He also explains how flying works, why it is safe, and teaches flyers how to strategically plan their flight, choose the right airlines, meet the captain, and so on. Through this program, Captain Bunn has helped thousands overcome their fear of flying. Now his book arms readers with the information they need to control their anxiety and fly comfortably.*

The truth is that you can defeat your fears. With more than forty simple, effective techniques, you'll learn how to overcome every conceivable kind of anxiety without medication. Are you plagued by fears, phobias, or panic attacks? Do you toss and turn at night with a knot in your stomach, worrying about your job, your family, work, your health, or relationships? Do you suffer from crippling shyness, obsessive doubts, or feelings of insecurity? What you may not realize is that these fears are almost never based on reality. When you're anxious, you're actually fooling yourself, telling yourself things that simply aren't true. See if you can recognize yourself in any of these distortions: All-or-Nothing Thinking: "My mind will go blank when I give my presentation at work, and everyone will think I'm an idiot." Fortune Telling: "I just know I'll freeze up and blow it when I take my test." Mind Reading: "Everyone at this party can see how nervous I am." Magnification: "Flying is so dangerous. I think this plane is going to crash!" Should Statements: "I shouldn't be so anxious and insecure. Other people don't feel this way." Emotional Reasoning: "I feel like I'm on the verge of cracking up!" Self-Blame: "What's wrong with me? I'm such a loser!" Mental Filter: "Why can't I get anything done? My life seems like one long procrastination." Now imagine what it would feel like to live a life that's free of worries and self-doubt; to go to sleep at night feeling peaceful and relaxed; to overcome your shyness and have fun with other people; to give dynamic presentations without worrying yourself sick ahead of time; to enjoy greater creativity, productivity and self-confidence. With these forty techniques, you'll be able to put the lie to the distorted thoughts that plague you and your fears will immediately disappear. Dr. Burns also shares the latest research on the drugs commonly prescribed for anxiety and depression and explains why they may sometimes do more harm than good.
