*The Cocker Spaniel has long been one of Britain's favourite breeds, prized for his fun-loving personality and constant wagging tail, The Cocker loves his human family and has a kind, affectionate nature.*

*Hermit crabs make for an unusual pet but people who have decided to become hermit crab owners quickly discover that these pets are interesting and easy to care for. The personality of a pet crab is curious and they have unique characteristics which make for low maintenance.*

*Hermit crabs are not true crabs as they have a smaller and softer abdomen which they protect by living inside an empty snail shell. As they grow they will find larger shells in which to dwell. As a hermit crab owner you will need to provide these shells so that they will have a new home to move into.*

*"an easy to read book that helps non-marketing people understand how to market their business on the internet" The importance of a powerful web presence for businesses is what compelled me to write this book. I have learned that only you as the business owner have the power to do it by educating yourself about internet marketing. Then you can take your business to the next level and achieve what you have set out to. My book will help give you a broad understanding of internet marketing and hopefully you can then ask the right questions of professionals and know the answers to expect so that you can get an effective website for your business, market it well and make your business grow. My advice is drawn from my 13 years' experience in the industry and many clients with successful websites and online marketing strategies. I hope you can glean some useful nuggets of information to empower you to grow your business with the help of the internet. I firmly believe that Digital Marketing, and a good understanding of general marketing, is what has allowed my to move from a one-man-band business into the market-leading marketing company Copper Bay Creative is today, with its 12-strong team.*

*A ferret is one of the most delightful pets an owner can hope to have. These creatures will bond with their owner and they have particularly unique personalities which can make them a delight to watch. However they also require a little bit more attention than a mouse or a hamster would and so you need to think about whether your will be able to give them this time before adopting one. Ferrets do have several health issues that as an owner you need to be aware of. Firstly a ferret will need to have annual rabies and distemper shots. You need to consider these financial costs before deciding whether to get a ferret.*
