

P53 Protocols Heeng

HAPPINESS is the seed of good health. And poems are an effective means to achieve this in young children. In the age of digital and virtual technologies, joyful poems bring alive imagination and provide means for parents, teachers, and other caregivers to connect with children organically, fortifying the emotional life of both involved. A handy guide of sorts, the book highlights the ways in which poems serve as an opportunity to bond as well as educate children in ingenious and creative ways, altering your relationship to both poems and your children. Penned by an educator with decades of experience of educating and enriching children through creativity, her poems have made many a child giggle and prance around happily as they sang them. An amply armed soldier yearns to see the world and gets a brief glimpse of the beauty around him through the loaned eye of another. A brash and over-confident star athlete on whom a nation’s hope lies takes a walk down the memory lane. The dreams of an Iraqi football player gets shattered by the great dictator which leads him to yearn for death to come knocking on his door. A Titanic survivor reminisces his bitter survival. And many more. What did these people have in common? Or maybe, there must have been something that attached these different people who were spread across different walks of life with varying history and time periods. The truth is that these people aid heed to the voices in their heart. The mumbblings of love, despair, dreams, gratitude, guilt, hope and many more. These mumbblings made them common by a single thread. The book isn’t a casual read and the author urges the reader to lend his mind. The collection of short stories along with the prose at the beginning of each story would take the reader to a roller coaster ride of reality and truth leaving aside all the mirage that our modern lifestyle has forced onto us. Passing through various seasons and times, join a journey that would make you also listen to the mumbblings of your own heart – the mumbblings from your own depth. Seventeen-year-old Sophie Tucker’s quiet life is thrown into disarray when she finds her father, the mayor of the town, dead in the house. Before she can understand what happened, she is kidnapped by a man who claims to be from a secret government laboratory called the CSES. Filo Hardy hails from a family of the long disappeared great Himalayan Maharishis or the enlightened in India. She wants almost nothing from the world. But the CSES might just have the one thing she can’t refuse. Twenty volunteers. Ten lab heads. One trainer. A survival game. It was supposed to be very simple. But what happens when you find you’ve been lied to, manipulated and not everything is as it seems to be? You break.

Trees Up Close offers an intimate, revealing look at the beauty of leaves, flowers, cones, fruits, seeds, buds, bark, and twigs of the most common trees. With more than 200 dazzling photos, you will be amazed by the otherworldly beauty of the acorns from a sawtooth oak, enchanted by the immature fruits of a red maple, and dazzled by the delicate emerging flowers of the American elm.

Look-Alikes Jr.

A Children’s Poetry Book

This book is an attempt to understand our Mind- Consciousness- DNA (Genome) - as one single unit and take the support of Cosmic Meditation to comprehend this wholeness and transcend beyond the physical boundaries of our body. Cosmic Consciousness is synonymous to an operating platform for the SOUL to undertake the journey of life and in the process comprehend itself. Our individual Consciousness is nothing but our Soul which is constantly nourished by the Cosmic energies and the moment the Cosmic energy stops its input, the Soul liberates itself. Soul, which is the very engine of our life, needs the support of the body and mind to unleash its power and realize its full potential. This is possible through regular practice of Cosmic Meditation. During deep states of Meditation, MIND is held in a state of silence - a state when the mind stops its flurry of activity of receiving, processing and transmitting THOUGHTS. During this state of MIND, our individual Consciousness takes control of our DNA. Thus Consciousness, MIND and DNA are closely associated with each other. The present book "MIND your DNA" is a regular practice of COSMIC MEDITATION. My own journey into Meditation started with the book INNER LIGHT - COSMIC MEDITATION which is now available through Amazon. Link shared below:https://www.amazon.in/INNER-LIGHT-MEDITATION-STEP-STEP-ebook/dp/B07GH8BD6B With all scientists accepting benefits of meditation there was no need to launch yet another study. I have bridged the understanding of scientific conclusions by going into details of how it happens at the genomic level and correlated them with appropriate spiritual insights from the Vedas.

biology, genetic engineering, quantum physics, particle physics, CONSCIOUSNESS by neuroscientists and neurobiologists, biophoton research by a certain set of scientists, experiments on water crystals are all inadvertently converging into understanding the secret of functioning of the universe. This book is thus a wholesome diet to the intellectual Minds seeking to get to the depth of the mysterious universe.I invite the readers to enjoy and assimilate this wholesome intellectual diet and find their purpose in life through COSMIC MEDITATION. Best WishesAnand "In the Western countries, first they are strangers, then they become friends, then they become more than friends, then they become strangers again" A Persistent Soul is a story of Sagar and Kimberly who love each other but they understand 'love' differently. She is 23, he is 24. She is beautiful and he is an average looking guy. She is British and he is an Indian. They both are students. He is simple, optimistic, enthusiastic and ambitious. She is hard-headed, unyielding, unforgiving and intolerant but both are heartwarming and exhilarating. Accidentally they meet because of the 'time' right for both of them? A middle-class Indian boy, who is new to the Western world, does not understand the Western theory of love. He falls in love with a girl and decides to spend the rest of the life with her. Kimberly is an over thinker and wants to take every step slowly. She has secrets which she doesn't want to tell anyone and he is the one who wants to know everything. The author Manoj Patil takes us through an incredible journey of love and loss with his debut novel 'A Persistent Soul'. The story of the journey of their love is described by Kimberly's complex character and her complicated past, Western life and culture sensitively brought out through the eyes of a middle-class Indian who persists through storms and rough seas to unite with her spirited lover.

Illustrations: B/W & Colour Illustrations Description: The volumes of the PROJECT OF HISTORY OF SCIENCE, PHILOSOPHY AND CULTURE IN INDIAN CIVILIZATION aim at discovering the main aspects of India’s heritage and present them in an interrelated way. In spite of their unitary look, these volumes recognize the difference between the areas of material civilization and those of ideational culture. The Project is marked by what may be called methodologically pluralism. The core of this volume is woven around seven sub themes. The first is a broad contemporary Indian texts in Sanskrit, from the Vedas which adore nature but are puzzled by creation, to the myths of the more popular puranas and the forceful reasoning of the Yoga-Vasistha. There follows the view of classical Indic sciences: rationalist ayurveda, inferential linguistics, computational astronomy and so forth. A short interlude (Section 6) attempts comparisons between western and Indic views (realizing of course that neither is monolithic). Modern science (section 7) is increasingly tending to the view that culture is not a unique possession of human civilization. A brief survey of development in the twentieth century: the role of new technology in sculptural art.

A Rose from a Dream, the spellbinding segue to When the Lotus Blooms, weaves through the turmoil in the lives of diverse families, rich and poor across India, in the fading years of the British Raj. The novel captures the ethos, sentiments, memories and character of a generation that shaped the future of a nation at a crucial time in its history. The Brown Sahibs, Mahadevan and Inspector Swaminathan, are torn between loyalty to the crown, and a deep rooted patriotic fervor. The Revolutionaries, Valthee and Nandu, are forced into a world of violence to protest the brutal Calcutta riots of '46. The Devadasi, Bala, despises her life as a prostitute, longs for freedom from the care of courtesan Kamalamba, and yearns for love in the arms of her forbidden paramour. Against this tumultuous backdrop, the tender love story of Kamu and Kandu blossoms despite the intriguing contrast of their distinctly different upbringing. The two are destined to cross paths, blending the traditional and the modern, symbolic of India's uncertain future at the dawn of nationhood.

Welcome to Look-Alike Land, where the more you look, the more you see! Like its predecessor, Look-Alikes Jr. features 3-D picture puzzles, but this time invites even the youngest child to join in the fun by featuring simpler, easier-to-find look-alikes in childlike settings. There are 11 scenes - house, parlor, kitchen, bedroom, school bus, classroom, construction site, movie lobby, train, farm, and rocket - each with 50+ objects to identify (700+ in total). Look for a cement mixer made out of a mustard bottle, kitchen cabinets made out of cakes of soap, and a bed built with crayons and pasta! Fun for all ages. This best-selling book is back with a brand new series design and a striking new cover.

Paper Based Sensors, Volume 89, the latest release in this comprehensive series that gathers the most important issues relating to the design and application of these cost-effective devices used in many industries, including health and environment diagnostics, safety and security, chemistry, optics, electrochemistry, nanoscience and nanotechnologies, presents the latest updates in the field. Chapters in this new release include Exploring paper as a substrate for electrochemical micro-devices, Paper-based sensors for application in biological compound detection, Printed paper-based (bio)sensors: design, fabrication and applications, Paper-based electrochemical sensing devices, Multifarious aspects of electrochemical paper-based (bio)sensors, Paper Based Biosensors for Clinical and Biomedical Applications, and more. Provides updates on the latest design in paper-based sensors using various nano and micromaterials Includes optical/electrical-based detection modes integrated within paper-based platforms Covers applications of paper-based platforms in diagnostics and other industries

Topology is a branch of pure mathematics that deals with the abstract relationships found in geometry and analysis. Written with the mature student in mind, Foundations of Topology, Second Edition, provides a user-friendly, clear, and concise introduction to this fascinating area of mathematics. The author introduces topics that are well-motivated with thorough proofs, that make them easy to follow. Historical comments are dispersed throughout the text, and exercises, varying in degree of difficulty, are found at the end of each chapter. Foundations of Topology is an excellent text for teaching students how to develop the skills for writing clear and precise proofs.

The Shattered Middle Class Dreams

There are people in this world with the ability to control other people and their karma. DARK Geniuses who have the power to lead other people. DEEP Teachers who guide people to decide. Lawyers who decide on behalf of their clients. Captains who order their crews. Doers with the power to position themselves to decide, ploy and influence others. DEVIIOUS All of them bound by their profession to perform their best and not falter. To not take advantage of their position at the cost of the other, for in the others' wellbeing lies their success. But this is not a story about one of such people. This is a story about a person who places himself in such a situation that he can read minds and influence them. Unlike psychiatrists, he does not do it as it is his profession... it is his way of life. The thoughts of others are his hunting ground and you are the game!
This book is inspired by the father of the author and was written when he passed away. The book contains shayri on various subjects.

This book overviews the current status of research and development activities of CNTs in nanodevices, nanomaterials, or nanofabrication. This book presents 15 state-of-the-art review articles that cover CNT synthesis technologies for growing highly orientated CNTs, chirality-pure CNTs and CNTs at a large throughput and low cost, CNT assembly techniques, CNT sorting and separation processes, CNT functionalization engineering for more functionalities, CNT fundamental properties and their practical/potential electrical, electronic, optical, mechanical, chemical and biological applications.

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island’s dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, ‘I feel as though all these dogs are my dogs and I have a responsibility to them.’ In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

A PERSISTENT SOUL

"Keep singing," she yelled at her friends as everyone watched aghast. The pop stars obeyed her and continued the song. Holly grabbed Sorrel’s guitar and broke into chorus. The Roberts family led totally normal lives in the most luxurious city in the country until they met Sorrel, one of the most famous pop stars in the city who seems to have gained superpowers. When things start going wrong, it looks like the city is in massive trouble and may fall apart. Numerous kidnappings, thefts, and disasters take place, and Sorrel is in big trouble with the Queen. When the Queen doesn’t take any action against the ongoing happenings, it’s up to Sorrel and the Roberts sisters to stop the disaster and make the city safe once more. Secrets are found and confessions are made... but one secret could ruin everything... that one secret that Sorrel meant to keep safe...

It’s my story, it’s your story, and it’s the story of every middle-class family who has struggled in different phases of their life to live the dream they all see together. We sacrifice our present for a better tomorrow but what if there is no tomorrow. How helpless will you feel when you know that the biggest strength of your life is slowly going away and you can’t do anything? It’s not only about how you lived, but also how you died matters a lot.

The groom died in a celebratory gunfire after the wedding. What to do with the big fat Indian wedding feast already prepared for the hundreds of guests?! Sri and Mia have to hit the ground running when they move to India to take over the struggling family business, Restaurant Annapurna. Set in Hyderabad, also known as the City of Pearls, this is a story of three generations coming together in the span of a year across cultural, social and generational divides. The family deals with life and death and grapple with love and loss. They celebrate the many festivals of India, a wedding and their grand reopening. The younger ones are awed by the ancient city with it’s ultra modern trappings while the elders witness the magic and power of digital revolution and social media. They also sample their way through Hyderabadi cuisine, an intoxicating mix of Mughalai, Turkish and Arabic influences on Andhra, Telangana and Marathwada foods; street food at midnight, a mango feast at the Taj, Anglo Indian at an old friend’s, eclectic gastro-pub fare, Indian Chinese, fusion desserts at the latest bakery, cheeseburgers in a tropical tree house...but, what about Annapurna? And why Sweet Neem? Cover Design IPR: Thousand Oaks Restaurant, Pune Concept & Design: Arti Agarwal Illustrator: Aranyalay Chinchpure

Falguni and Minjoon were leading their own depressing lives in two different corners of the world when fate decided to weave their paths together. Ironically, race and language were never a problem for them. It was a reason to love each other more. But what happens when they hit the tests of fate and fail? What exactly went wrong between the imperfectly beautiful people? What else can be a problem in this inter-country love other than linguistic division? Beyond the Borders is a tale that covers the streets of Seoul and reveals the beauty of togetherness, irrespective of the oceans they crossed for each other. Discover a Korean and Indian experience—the most ‘practical’ fairy-tale ever!

The Sikandar Of Life

When Brady Wayne Darby, a condemned man whose life is marked by death, guilt, and despair, meets Thomas Carey, a weary man of God, he learns about the prospects of rebirth, forgiveness, and hope.

The book, Optimism Unveiled, begins with an ode paying tribute to President Abdul Kalam whose dream was to see India shining in every field. ‘Hima’ is a poem to honour the achievements of the great athlete, Hima Das, whose life is a source of inspiration for all. The book has poems of varied tastes. The poems ‘Paradise’ and ‘Blend’ are experimental in a sense, as photographs of the talented photographer Sudip Bhattacharya are used to pen down romantic verses and poetry of peace. ‘I have a dream’, based on the painting of a promising painter, Sejuti Biswas, is steeped in romantic bliss. ‘She’ is a poetic tale based on a real-life experience. ‘Four Feathers’ symbolises trauma of four women whose ultimate freedom lies in sharing and caring. ‘Mother’ portrays a woman’s helplessness followed by her fearless step to protect her girl child. The book ends with the message of freedom in ‘Bihanga’ (The Bird) based on dancer Alokamanda Roy’s venture of initiating cultural therapy amongst prisoners by teaching them the art of dance.

Nowadays everybody is busy. Uncease a New You: Discover the Hidden Talents in You aims to let you go through a self-discovery ride despite your busy schedules. Your lifestyle will be the greatest foundation on which you can build your health or overcome your cause of unexecuted dreams. Dr Sumit Bokade gives an effective strategy to help you discover your own unique lifestyle. So, that you can achieve – great mindsets, optimum health, emotional well-being and experience Root Cause Parenting. He helps you and your children in revealing your hidden talents. You will discover what your children love and know yourself better. It will teach you that doing bigger things require almost the same energy as it would in doing smaller things. It would be helpful to live a life filled with happiness. Believing on the concepts of knowing well before doing things will be explained and feed into your mind about the fundamental dimensions of life. How everybody will start creating efficiently their ways for preventing diseases, achieving optimal health. So that they will find happiness in your own interest or will discover new ways for solving the day to day stressors. You will start knowing the capabilities within you by knowing yourself and you develop habits in subconscious mind of start executing work in life with limited resources. You will prevent your stuck in future stage of life in fulfilling your dreams. Happiness is related to success. Find and Learn to do the things that elevate your life and that of others. You can start finding your ‘Root Cause’ for your development in your life. You will enjoy and create a new you by helping others and trust me you will soon realise that it is this what the world wants from you.

Ana is a good little nine-year-old girl who always helps the needy. But Ana has a secret need of her own. She loves anything and everything to do with Christmas. At a bakery one day, she saw a cake beautifully decorated especially for Christmas. But Ana knows her family is big and they don't have extra money for things like Christmas cakes. She decides to write to Santa in hopes he will be able to bring her the cake of her dreams. Will Santa Claus be able to bring the cake? Will Ana awake Christmas morning to find Santa has made her dream come true? Read on and discover.

The More You Look, the More You See!

Today, people believe in astrology when they fail and in doctors’ decisions when they are sick. People have forgotten the importance of belief. One must understand that they exist for a reason, which will be realized with time. Competition and anxiety often lead to individuals trusting astrologers more than themselves. The mind turns into a chaotic space when humans fall ill. Instead of understanding what would possibly have gone wrong and find ways to rectify the same, we seek the help of doctors. Doctors are considered to be the second gods who save people’s lives, and the author truly believed this until he met someone in his life who disproved this fact. The power of belief is incredible. The author never stopped believing in himself even after the doctor put him down by giving hints of his inevitable demise, which affected both his mental and physical health so much so that he was unable to walk. This, in turn, made the author get in touch with astrologers who also predicted his impending death. The author decided to take steps against the decisions of the doctors and astrologers, believing that something different could happen. And with hard work and belief, finally, it did!

People of our generation, in the age bracket of 40 to 60, are the last of the generation who had a childhood which would never come back. It was simple and had a lot of happiness around small things. It was carefree and adventurous in contrast to today’s generations who will never experience the childhood which we did despite the advancement of technology and the improvement in the standard of living. The small joys in life are no longer there, and even after having everything in life, it does not seem enough. The idea of this book is to bring forth the childhood which many of our generations would be able to relate to and savour. The book also highlights, to today’s generation, as to what they are missing in their childhood. It may bring out some of those aspects in their childhood. This book is not a simple memoir of childhood. It is an attempt to capture the childhood of a child of a middle-class family who travelled through 8 cities, lived in around 10 houses and studied in around 8 schools. It is also about the various incidents, cities and its foods.

“The rise and fall of kings and nations!” –Cover.

“Akath Kahani Prem Ki, Kuch Kahi Mo Jaye Goonge Keri Sarkara, Baithe Muskae” Meera is a girl from Gen X, who is dispossessed of love from every person she ever loved. A mother is usually considered the main driver of any child’s life, who guides her kid at every stage of life, but Meera wasn’t fortunate. Her mother was the root cause of all the hardship she faced. Whether it was boyfriends or friends, no one stayed permanent in Meera’s life. Yet she won her battles on her own terms. Finally, there was a ray of hope in Meera’s life, a handsome husband and a lovely child, a chance to start fresh, but Sikandar died in the palace even before returning to the throne. She never gave up, fought until her last breath and tried overcoming struggles at every stage. But is this her past karma or just her fate? Albeit the struggle, she was a warrior right from the start, truly The Sikandar of Life! One & Half Mother

Breaking Philosophy

Her life was always through unexpected situations, a woman like Ellen never ever imagined a life like her. She never complained to those who never saw the mother in her. Her soul was matured enough to overcome the sorrow when she lost the most valuable thing in her life. She never learned from the people around her, in fact, she was teaching them the lessons of life. The world and mysterious gods stood with her from the moment she started fighting back for survival. She was just like our mother earth with selfless love. A story through different life’s of a mother.

ICSE Made Easy is a carefully structured series comprising of eight books from level one to eight. The entire series is student-centered and ensures development in all areas of a student’s growth while emphasising a strong base in mathematics. Apart from clear and easy presentations, each chapter is supported by solved examples, graded practice exercises, worksheets, and other activities.

This volume of original stories is all for furry feline friends. A unique collection of fantastical cat tales.

This book is crammed with puzzles designed to stimulate each of your brain’s cognitive functions, keeping it strong and fit. Many different types of puzzles are included, and each of the five levels increases the challenge of solving them. Includes three self-evaluations that allow you to assess your improvement in areas such as focus, attention, memory, and more. With these puzzles, exercising your brain can be fun! The consultant is Dr. Elkhorn Goldberg, a Ph.D. neuropsychologist who created the Manhattan-based Cognitive Enhancement Program, a fitness center for the brain and who wrote The Executive Brain: Frontal Lobes and the Civilized Mind; and The Wisdom Paradox: How Your Mind Can Grow Stronger as Your Brain Grows Older.
