Their stories continue to influence Western culture, despite the fact that the civilization that created them disappeared thousands of years ago. Author Michelle M. Houle skillfully weaves together the threads of the gods and goddesses of wars, love affairs, and personal quests for power, as well as their very creation. Each story is complemented by expert commentary written by scholars and specialists on Greek mythology.

Most commentaries to date on library use of social networks such as Facebook and Twitter have focused on a handful of well-funded public

libraries with high-profile employees. Now Crawford's Successful Social Networking in Public Libraries fills in the rest of the picture, offering for the first time an in-depth look at how a large variety of public libraries are using social networks. Examining nearly 6,000 libraries across the US, Crawford Analyzes social network usage by libraries of many different sizes and funding levels, showing how many of them are active and effective in quite different ways Offers many examples that will help other libraries establish or refine their own social networking activities Lays out several key questions that libraries should ask themselves, such as "Who do we want to reach?" and "What's the best way to interact with communities?" Gives libraries guidelines for setting social networking goals and conducting ongoing evaluation Includes illuminating comments from numerous librarians on the front lines of communication Based on broad research, Crawford draws a vivid portrait that shows how a wide range of public libraries is conducting digital outreach and marketing through social networking.

Nestled in Upstate New York along the banks of the Mohawk River are the many communities of the Mohawk Valley. These villages, towns and cities have unique histories but are inextricably tied together by the waterways that run through

them. The mills, railroads and the Erie Canal sustained early growth; the Painted Rocks beautified the landscape; and tales from the local Mohawk Nation still enrich the folklore. Many remarkable individuals have called the Mohawk Valley home, including psychedelic philosopher Benjamin Paul Blood, Queen Libby, the Daiquiris and actor Kirk Douglas. For over a decade, local native Bob Cudmore has documented the interesting, important and unusual stories from the region's past, and he has compiled the best of them here.

scientific exploration in Britain's unique South American colony, Guyana. How did nineteenth-century Europeans turn areas they called terra incognita into bounded colonial territories? How did a tender-footed gentleman, predisposed to seasickness (and unable to swim), make his way up churning rivers into thick jungle, arid savanna, and forbidding mountain ranges, survive for the better part of a decade, and emerge with a map? What did that map mean? In answering these questions, D. Graham Burnett brings to light the work of several such explorers, particularly Sir Robert H. Schomburgk, the man who claimed to be the first to reach the site of Raleigh's El Dorado. Commissioned by the Royal Geographical Society and later by the British Crown, Schomburgk explored and mapped regions in modern Brazil, Venezuela, and Guyana, always in close contact with Amerindian communities. Drawing heavily on the maps, reports, and letters that Schomburgk sent back to England, and especially on the luxuriant images of survey landmarks in his *Twelve Views in the Interior of Guiana* (reproduced in color in this book), Burnett shows how a vast network of traverse surveys, illustrations, and travel narratives not only laid out the official boundaries of British Guiana but also marked out a symbolic landscape that fired the British imperial imagination.
