The G9 is Panasonic’s first top of the line camera specifically designed for stills rather than being a stills/ video hybrid. With 60fps burst shooting, class leading stabilization, a user configurable menu system, 80Mp High Resolution mode and many other high end features it is of necessity a complex camera. As with any digital camera the heart of the machine is the menu system, consisting of around 180 entries, many with their own sub menus offering many hundred of options. It is no surprise then that even experienced users can find themselves scratching their heads as they wade through the mass of options.. This book goes through each and every every menu choice and explains what it does and why you might want to do it. It doesn’t try to teach you photography. You wouldn’t have chosen a G9 if you didn’t already have some expertise. What my books aims to do is to familiarise yourself with the G9 and learn to tailor it to your own taste and needs. Having done that, you I think you will find using the G9 not only a pleasure but inspiring as well.

This Snapshots book will teach owners how to take great shots using their new Panasonic GX7 or GM1 camera. Users learn how to create the type of photos that inspired them to buy the camera in the first place. Featuring beautiful images; clear design; and a friendly knowledgeable voice, everything in the book is in service of creating a great image. Starting with the top ten things users needed to know about the camera, photographer Rob Knight carefully guides readers through the operating features. Owners get practical advice from a pro on which settings to use when, great shooting tips, and even end of chapter assignments. The book will also include coverage of shooting video. Both the GX7 and GM1, which have the same sensor and are similar in operation, will be covered. Significant new features: 16MP Live MOS sensor In-body image stabilization (works with any lens) Front and rear control dials Flip-up, 1024 x 768 pixel (2.3M dot equivalent) electronic viewfinder 3-inch tilting LCD 3-level focus peaking 1080 video at 60p/60i/24p in MP4 or AVCHD format Built-in Wi-Fi with NFC Magnesium-alloy frame 1/8000 second max shutter speed, 1/320th flash sync speed Highlight and shadow curve adjustments Built-in pop-up flash The Pansonic GX7 is now available for MSRP \$999 (body only). The Panasonic GM1 is now available for MSRP \$749 (with kit lens)
