A general computer model of the ionospheric behavior during a solar eclipse is briefly described. Solutions are generated for 15 ionospheric species during the solar eclipse of 12 November 1966. These solutions are for altitudes from 60 to 120 kilometers, and include both neutral and charged species. (Author).

The only reference focused on progressive care nursing, this complete reference includes all of the key information you need to know for success in practice and on the PCCN certification exam. Expert authors from the American Association of Critical-Care Nurses provide the most authoritative content on caring for patients in step-down, intermediate and telemetry units and prepare you to treat patients from every phase of progressive care. Plenty of illustrations and easy-reference tables clarify difficult concepts and make it easy to review content quickly. AACN authorship ensures you receive the most accurate and dependable information available from the same group that administers the PCCN examination. Comprehensive coverage including everything from basic to advanced concepts makes this an essential resource for nurses of any level of expertise. Content most likely to be on the exam is highlighted to help you study more efficiently. The latest, most authoritative references categorized by disorder make it easy to find resources for further research. Concise outline format with organization by body system helps you quickly locate information. Priority organization presents nursing management information in order of clinical priority. Content written from a collaborative care perspective includes medical management and interventions integrated throughout the text. User-friendly two-color design clarifies difficult concepts and makes illustrations and tables easy to understand.

Contains nine essays in which the authors argue in favor of eliminating the tracking system in American high schools and returning to a curriculum focused on core subjects such as mathematics, science, and English, with differentiated programs available only after students had earned the core credential.

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Enriches the current discussion on the management of the refugees’ case in Europe combining a multidisciplinary approach to practical case-studies from Europe and beyond.
