

Paper Globe

Smart. Funny. Fearless."It's pretty safe to say that Spy was the most influential magazine of the 1980s. It might have remade New York's cultural landscape; it definitely changed the whole tone of magazine journalism. It was cruel, brilliant, beautifully written and perfectly designed, and feared by all. There's no magazine I know of that's so continually referenced, held up as a benchmark, and whose demise is so lamented" --Dave Eggers. "It's a piece of garbage" --Donald Trump.

Introducing the magnificent crumpled paper art by debut author Kunal Kundu, Wildlife on Paper brings to life animal species at risk from all around the world while teaching kids how cool and unique each animal is. From the Peary caribou in Northwest Canada to the Galapagos Penguin in Ecuador, the Royal Bengal Tiger in India to the Hawksbill Sea Turtle in Australia, this book celebrates the rich diversity of wildlife on almost every continent. Each of the sixteen exquisitely handcrafted paper sculptures come with interesting trivia and facts about where the animal lives and how it survives in its habitat and interacts with nature. Also included is a map of where each creature lives on the globe, plus a list of helpful resources and the author's favorite nature conservation organizations. Sure to be a favorite for kids and adults alike, Wildlife on Paper opens the world wide as you marvel at the gorgeous crumpled paper art journey through the ocean, forest, desert, and more to learn about the diversity of animals and their incredible characteristics. (Please note the artist creates his sculptures sourced from eco-friendly paper companies that plant a tree for every ream of paper sold.)

Paper. Pen. Pandemic. Viral cartoons around the globe. The coronavirus crisis and its consequences for economy, politics and society. A critical statement on current events in more than 400 cartoons The economy put in shackles: a critical review on the coronavirus pandemic in more than 400 cartoon The coronavirus outbreak has paralyzed the world: an unprecedented stress test for the health system, enormous challenges for politics and society, resulting in unforeseeable effects on the economy. Can we manage this global challenge? The world leaders and decision-makers in business and politics face difficult tasks every day, because solutions are required quickly. But are the governments' measures to contain the pandemic justified and appropriate? Cartoonists from all over the world have asked themselves these questions. Their drawings and paintings in this illustrated book comment on current events, straight to the point and with a good dose of humor. - How are world governments managing the coronavirus crisis? A critical examination in more than 400 cartoons - Joe Dator, Jason Raish, Gerhard Haderer or Bruce MacKinnon: International artists and illustrators take a stand on the COVID-19 situation - "The New Normal": Did you bring your hand sanitizer and facemask? Our life in times of COVID-19 - A global view on how the pandemic is affecting the economy worldwide: from Italy, the US to Brazil, South Africa or China Will the coronavirus crisis trump other urgent issues? The lockdown created funny behaviors: hoarding of toilet paper and DIY haircuts as well as video conferencing in sweatpants. Unfortunately, social isolation, fear of the future and economic losses due to short-time working are also part of our new everyday life. The crisis shows which professions are relevant for the economic system. Social imbalances and inequalities are becoming abundantly clear. At the same time, issues that demanded urgent action before the outbreak of the virus seem to be forgotten, like the refugee crisis, global warming and the world economic crisis. This cartoon book critically comments on the current situation and makes us rethink our priorities!

The age of exploration exposed the limits of available universal histories. Everyday interactions with cultures and societies across the globe brought to light a multiplicity of pasts which proved difficult to reconcile with an emerging sense of unity in the world. Among the first to address the questions posed by this challenge were a handful of Renaissance historians. On what basis could they narrate the history of hitherto unknown peoples? Why did the Bible and classical works say nothing about so many visible traces of ancient cultures? And how far was it possible to write histories of the world at a time of growing religious division in Europe and imperial rivalry around the world? A study of the cross-fertilization of historical writing in the sixteenth and early seventeenth centuries, The Globe on Paper reconstructs a set of imaginative accounts worked out from Mexico to the Moluccas and Peru, and from the shops of Venetian printers to the rival courts of Spain and England. The pages of this book teem with humanists, librarians, missionaries, imperial officials, as well as forgers and indigenous chroniclers. Drawing on information gathered—or said to have been gathered—from eyewitness reports, interviews with local inhabitants, ancient codices, and material evidence, their global narratives testify to an unprecedented broadening of horizons which briefly flourished before succumbing to the forces of imperial and religious reaction.
