One hundred entertaining and informative essays from the popular public radio feature program, BirdNote, accompanied by original illustrations throughout--an illuminating volume for bird and nature lovers across North America. Here are the best stories about our avian friends from the public radio show BirdNote, each brief essay illuminating the life, habits, or songs of a particular bird. Why do geese fly in a V-formation? Why are worms so good for you--if you're a robin? Which bird calls, "Who cooks for you? Who cooks for you-all?" From wrens that nest in cactuses to gulls that have a strange red dot on their bills--these digestible and fascinating bird stories are a delightful window to the winged world. A foreword by John W. Fitzpatrick, director of the Cornell Lab of Ornithology, and an introduction by Gordon Orians, professor emeritus of biology at the University of Washington, are also included. Contains web links to the audio version of each story, with bird sounds. Click or Search Weezag for more fun products! Surprise your loved ones. Add to cart, Buy Now! Ever since its original publication in Germany in 1938, Max Schweidler's Die Instandsetzung von Kupferstichen, Zeichnungen, Buchern usw. has been recognized as a seminal modern text on the conservation and restoration of works on paper. This volume, based on the authoritative revised German edition of 1950, makes Schweidler's work available in English for the first time, in a meticulously edited and annotated scholarly edition. An extensively illustrated appendix presents case studies of eleven Old Master prints that were treated using the techniques Schweidler discusses.

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—Homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Her story began in the national bestsellers A Soldier's Duty and An Officer's Duty. Now Ia is captain and commander at the helm of Hellfire, where she is finally free to chart the course for the fulfillment of her destiny... As captain, Ia must now assemble a crew that can rise to the ultimate challenge of saving the galaxy. The hardest part will be getting them to believe her, to trust in her prophecies. If they don't, her own crew will end up being the biggest obstacle in her race against time. The Salik are breaking through the Blockade, plunging the known galaxy into war. Ia cannot stop it this time, nor does she want to. This is the terrible price she has seen all along—that some must pay with their lives so that others might live. Now only time itself can prove whether each member of her crew is merely a soldier or truly one of Ia's Damned.
