In this comprehensive and definitive survey of current notation procedures, Kurt Stone has brought order to a field traditionally fraught with confusion and idiosyncrasy. He not only describes and recommends new methods for notating modern music, thereby establishing standard procedures for the present and future, but integrates them with traditional practices still in use. The result is a guide to all forms of notation used in serious music today.

Selected from the two volumes of Bartóks For Children, these 42 works were written without octaves to fit the hands of younger players. Each piece has a descriptive title, with half including the words "song" or "dance". Like much of the composer's writing, the pieces directly reflect the use of folk idioms.

Everything is explained in easy stages. With this book it is possible to have fun playing the piano even if the person has no previous knowledge of music. There are over 30 well-known and entertaining tunes to play, and many helpful hints about the instrument. There is advice on buying a piano, taking care of a piano and much more.

This book provides an in-depth study of the late medieval chanson, from Gace Brulé through Guillaume Du Fay. It is largely concerned with interpretation of the way accidentals function, not only at the level of local detail but also as part of the overall design, and explores the way inflections are used by the composer as an expressive tool. Support for this approach comes from reference to causa pulchritudinis ("by reason of beauty"), a justification for chromatic writing first encountered at the beginning of the fourteenth century.

Richard Chronister was one of the pedagogy greats of his time. During the last forty years of the 20th century, he was a driving force for better piano teaching and better training of piano teachers. His influence reached from large universities to small independent studios, and his name was linked with both the most basic principles and the most recent research. His accomplishments were legendary. He started the first university degree program in piano pedagogy, served on six different faculties, and developed a new piano method. He was co-founder of the National Conference on Keyboard Pedagogy and the founder and editor of Keyboard Companion magazine. All his professional life he asked searching questions, such as: How can I build on children's innate love of music? How can I teach so that my students keep learning, practicing and making music? How can I teach my students to become independent learners? What can I apply to my teaching from discoveries of the past and of my own time? How can I become an acute observer of what my students are doing? And of what teachers whom I observe are doing? And of what I am doing as a teacher? This compendium contains Chronister's best answers to these questions and many more. They come from his articles, addresses and lectures. Whether speaking or writing, his style is always lucid, informal and engaging. He never pretends to have the final answer, and invited his audience to consider his advice and reach their own conclusions. This book deserves a place in the library of every serious piano teacher!

**La Légende des siècles (The Legend of the Ages) is a collection of poems by Victor Hugo, conceived as an immense depiction of the history and evolution of humanity.Written intermittently between 1855 and 1876 while Hugo worked in exile on numerous other projects, the poems were published in three series in 1859, 1877, and 1883. Bearing witness to the unparalleled poetic talent evident in all Hugo's art, the Légende des Siècles is often considered the only true French epic and, according to Baudelaire's formulation, the only modern epic possible.**
