A Medicinal Dispensatory

Written So You Can Understand it

-A colorful collection of photographs from GEMOLOGUE by Liza Urla, a leading and much-loved jewelry blog and winner of the Best Blog in the Fashion category at the UK Best Blog Awards 2015 -Liza Urla is considered to be the first jewelry influencer in the world: she started her highly successful award-winning jewelry blog, GEMOLOGUE.com, back in 2009 and since then has worked with countless jewelry brands such as Van Cleef & Arpels, Chanel, Bulgari, Faberge, Buccellati among others and has gained more than 300,000 followers -Combines 'street-style' pictures with Urla's professional styling creations, developed in collaboration with designers from all over the world -Inspirational and eye-catching photographs will be of interest to jewelry enthusiasts from all over the world Did you know that jewelry predates clothes? The oldest known piece is a set of 100, 000-year-old beads, made from Nassarius shells. Liza Urla advises us not to look at the eyes when meeting a new person, but instead to look at their jewelry. She describes it as the ultimate means of self-expression, essential to our identification as humans. "Jewellery is our armour," she says, "and precious stones our amulets." In this book, she journeys from continent to continent, chronicling the pieces that capture her imagination and her heart. Although many of the pictures are from the street, defining the wearer's style on the day they were taken, Urla has been lucky enough to access people's personal jewelry boxes. As she says, the best pieces are always in private collections. Urla's favorite finds are presented alongside her own jewelry styling, in collaboration with various designers from the jungles of Brazil, the beaches of Mexico, or the streets of London, NYC, Paris or Moscow.

Containing the Whole Body of Physick : Discovering the Natures, Properties, and Vertues of Vegetables, Minerals, & Animals ... : Methodically Digested in Five Books of Philosophical and Pharmaceutical Institutions; Three Books of Physical Materials, Galenical and Chymical ...

For the first time in modern human history, the response to a global health crisis was required among all countries no matter their wealth, size, or economic status. Every country was impacted by the COVID-19 pandemic, and as it surged across the world, it took many lives with it. Thus, it is essential to study the ability of human societies to cope with the changes caused by pandemics. Societal Resilience and Response to Contagious Diseases and Pandemics adopts and maintains an interdisciplinary-transdisciplinary approach to investigating societal resilience. This book builds upon different insights of what has already been done for humanity to survive the spread of a deadly pandemic. Covering topics such as the role of healthcare professionals, political economy, and consumption culture, it is an essential resource for professionals, business leaders, policymakers, professors, graduate students, researchers, and academicians.

Rearranged, Revised, and Enlarged with Special Regard to Pronunciation and Etymology

A Latin Grammar for Schools and Colleges

This book contains essential knowledge on the preparation, control, logistics, dispensing and use of medicines. It features chapters written by experienced pharmacists working in hospitals and academia throughout Europe, complete with practical examples as well as information on current EU-legislation. From prescription to production, from usage instructions to procurement and the impact of medicines on the environment, the book provides step-by-step coverage that will help a wide range of readers. It offers product knowledge for all pharmacists working directly with patients and it will enable them to make the appropriate medicine available, to store medicines properly, to adapt medicines if necessary and to dispense medicines with the appropriate information to inform patients and caregivers about product care and how to maintain their quality. This basic knowledge will also be of help to industrial pharmacists to remind and focus them on the application of the medicines manufactured. The basic and practical knowledge on the design, preparation and quality management of medicines can directly be applied by the pharmacists whose main duty is production in community and hospital pharmacies and industries. Undergraduate as well as graduate pharmacy students will find knowledge and backgrounds in a fully coherent way and fully supported with examples.
