As a field, education has largely failed to learn from experience. Time after time, promising education reforms fall short of their goals and are abandoned as other promising ideas take their place. In Learning to Improve, the authors argue for a new approach. Rather than “implementing fast and learning slow,” they believe educators should adopt a more rigorous approach to improvement that allows the field to “learn fast to implement well.” Using ideas borrowed from improvement science, the authors show how a process of disciplined inquiry can be combined with the use of networks to identify, adapt, and successfully scale up promising interventions in education. Organized around six core principles, the book shows how “networked improvement communities” can bring together researchers and practitioners to accelerate learning in key areas of education. Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers. Learning to Improve offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation’s schools and colleges. Designed for leaders who are ready for honest self-examination,

who want to improve their effectiveness, raise their performance on the job, and enhance their careers.

In today's highly competitive realm of professional service firms, the quest for individual stardom is at an all-time high. The temptation to rack up the most billable hours and out-perform one's fellow advisers is often irresistible. But it is also shortsighted and terribly counterproductive, according to world-renowned authority and acclaimed author David Maister. In this groundbreaking book, Maister issues a much-needed wake-up call to today's professional service firms. Arguing that a far greater contribution to a firm's success can come from those who find fulfilment in seeing other's succeed rather than those who assume the role of "most valuable player". The author outlines and discusses in detail the nine key "people" issues upon which successfully managed and profitable organisations rely. Supporting his findings with a range of compelling data, Maister demonstrates how and why firms that emphasise the highest standards of employee professionalism are invariably more financially successful than those that don't.

As our world grows smaller, opportunities for conflict multiply.

Ethnic, religious, political, and personal differences drive people

apart—with potentially disastrous consequences—and it's the task of perceptive leaders to bring them together again. World-renowned mediation expert Mark Gerzon argues that leaders have failed to rise to this challenge. Our organisations, schools, and governments remain filled with divisive dictators and everyday managers, instead of what he calls mediators—leaders who transform conflict so that everyone can move forward together. Through absorbing examples drawn from decades of work with organisational, political, and global conflicts of all kinds, *Leading Through Conflict* provides a powerful new framework for the leader as mediator, and outlines eight specific tools these leaders use to transform seemingly intractable differences into progress on deep-seated problems. Both practical and passionate, this book makes the tools of cross-border leaders accessible to anyone who wants to help create healthier companies, communities, and countries.

#1 NEW YORK TIMES BESTSELLER • The book that sparked a revolution and inspired the hit Netflix series Tidying Up with Marie Kondo: the original guide to decluttering your home once and for all. ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE—CNN Despite constant efforts to declutter your home, do papers still accumulate like snowdrifts and clothes pile up like a tangled mess of noodles? Japanese cleaning consultant Marie Kondo takes tidying to a whole new level, promising that if you properly simplify and organize your home once, you'll never have to do it again. Most methods advocate a room-by-room or little-by-little approach, which doom you to pick away at your piles of stuff forever. The KonMari Method, with its revolutionary category-by-category system, leads to lasting results. In fact, none of Kondo's clients have lapsed (and she still has a three-month waiting list). With detailed guidance for determining which items in your house "spark joy" (and which don't), this international bestseller will help you clear your clutter and enjoy the unique magic of a tidy home—and the calm, motivated mindset it can inspire.

OLD-SCHOOL top-down organizational behavior won't cut it anymore. Direct chain-of-command hierarchies are obsolete, fast giving way to networked, team-oriented organizations. To be successful, the ability to influence others—especially others over whom you have no direct control—is a must. You have to build alliances and persuade people, not boss them around. The ability to influence people isn't something you're born with, it's a skill anyone can acquire. In his new book, The Influence Edge, experienced organizational consultant Alan Vengel teaches the influence skills needed to enlist the cooperation of

others, inside and outside the organization, to achieve your professional goals. Drawing on case studies and illustrative anecdotes from his consulting practice, Vengel introduces a powerful system of influence initiatives and strategic thinking that anyone can apply to almost any work situation. The Influence Edge details specific influence tactics that can lead to workplace success. It provides a nuts and bolts guide for planning for a real influence situation, and shows exactly how to map out a strategy. And The Influence Edge goes deeper into the influence realm to show how to build better long-term rapport, even with really difficult people. An interactive self-study guide, The Influence Edge offers immediate hands-on applications. Its heavily tested, practical insights are embodied in a variety of exercises that help readers evaluate their progress, reflect deeply on what they've read, and build a personal strategy for increasing their influence edge. Vengel equips readers to influence without authority, sell ideas, and build relationships. The Influence Edge is designed to be used again and again. It provides a complete toolkit for turning the often disorderly and seemingly impossible task of getting someone else to help you achieve your goal into an entirely viable process of analysis, preparation, and action.

Ken Blanchard ' s Leading at a Higher Level techniques are inspiring thousands of leaders to build high-performing organizations that make life better for everyone. Now, in Helping People Win at Work, Blanchard and WD-40 Company leader Garry Ridge reveal how WD-40 has used Blanchard ' s techniques of Partnering for Performance with every employee--achieving levels of engagement and commitment that have fortified the bottom line. Ridge introduces WD-40 Company ' s year-round performance review system, explaining its goals, features, and the cultural changes it requires. Next, he shares his leadership point of view: what he expects of people, what they can expect of him, and where his beliefs about leadership and motivation come from. Finally, Blanchard explains why WD-40 Company ' s Partnering for Performance system works so well--and how to leverage its high-value techniques in your organization. In this book, you ' ll learn how to:

- Stop building failure into your mentoring of employees
- Set goals using the SMART approach: specific, motivational, attainable, relevant and trackable
- Help people move through all four stages of mastery
- Create a culture that shares knowledge and encourages nonstop learning

“ I ' m thrilled that the first book in our Leading at a Higher Level series is with Garry Ridge, president of WD-40 Company. For years I ' ve been concerned about how people ' s performance is evaluated. People are often forced into a normal distribution curve, or even worse, rank ordered. Not only does this not build trust, it also does not hold managers responsible for coaching people and helping them win. The manager ' s responsibility is focused on sorting people out. When I was a college professor, I always gave my students the final exam at the beginning of the course and spent the rest of the semester helping them answer the questions so that they could get an A. Life is all about getting As, not some stupid normal distribution curve. Garry Ridge got this, and wow! What a

difference it has made in WD-40 Company ' s performance. " --Ken Blanchard " When I first heard Ken talk about giving his final exam at the beginning of the course and then teaching students the answers so they could get an A, it blew me away. Why don ' t we do that in business? So that ' s exactly what I did at WD-40 Company when we set up our ' Don ' t Mark My Paper, Help Me Get an A ' performance management system. Has it made a difference? You ' d better believe it. Ever since we began the system, our company ' s annual sales have more than tripled, from \$100 million to more than \$339 million. And we ' ve accomplished this feat while making the company a great place to work. " --Garry Ridge
