Introduction to Financial Accounting

Decisions and Strategies

**Revised edition of Foundations of finance, 2014.**

'Financial Accounting for Decision Makers' presents the key concepts of accounting without going into too much unnecessary technical detail. The book is aimed as 'users' of accounting information, not 'preparers' of accounts.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Adopting an innovative, open-learning approach to introduce the main principles of financial management in an accessible, non-technical way, this fully updated fifth edition provides a unique focus on the practical application of financial management and its role in decision making. This text presents an accessible introduction to techniques and applications of economic analysis and financial accounting as a method for approaching real-life business problems for managerial decision making in a logical manner. It focusses on the essential skills needed to formulate business policies that help gain a competitive edge in today's work environment. The book discusses the basic concepts, terminology, and methods that eventually allow students to interpret, analyse, and evaluate actual corporate financial statements. It covers the major areas of managerial economics and financial accounting such as the theory of the firm, the demand theory and forecasting, the production and cost theory and estimation, the market structure and pricing, investment analysis, accountability, and different forms of business organisations. The book includes numerous examples, problems, self-assessment tests, as well as review questions at the end of each chapter to aid in working out solutions to business problems. The book will be particularly suitable for courses in Managerial Economics and Financial Accounting as part of an engineering degree education at undergraduate level where the students have no previous back-ground in economic and financial analysis. It will also be immensely useful for M.B.A., M.Com. and C.A. students, business executives, and administrators who need to learn the application of economic theory to realistic business situations.

Management and cost accounting has been the basic toolbox in business administration for decades. Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments. At the same time, business in general, and management accounting in particular, is becoming more and more international. English clearly has evolved as the "lingua franca" of international business. Academics, students as well as practitioners exchange their views and ideas, discuss concepts and communicate with each other in English.

This is certainly also true for cost accounting and management accounting. Management Accounting is becoming increasingly international. "Management and Cost Accounting" is a new English language textbook covering concepts and instruments of cost and management accounting at an introductory level (Bachelor, but also suited for MBA courses due to strong focus on practical applications and cases). This textbook covers all topics that are relevant in management accounting in business organizations and that are typically covered in German and Central European Bachelor classes on cost accounting and management accounting. After an introduction to the topic, including major differences between the German approach and the purely Anglo-Saxon approach of management accounting, the book describes different cost terms and concepts applied in German cost accounting. The book is much more specific here compared to US-American standard textbooks. Based on different cost concepts, the topic of cost behavior is discussed, including the determination of cost functions. The heart of the book guides the reader through the general structure of a fully developed cost accounting system following the German and Central European standard: It starts with cost type accounting, moves on to cost center accounting and finally deals with cost unit accounting, assigning cost to goods and services offered in the market. The remaining parts of the book deal with decision making and how management and cost accounting data can support managers in this task. A comparison of absorption costing and variable costing introduces the reader to management decisions such as product portfolio and outsourcing decisions. Additionally, cost-volume-profit analysis (break-even-analysis) is covered. The book closes with a comprehensive treatment of cost planning and variance analysis.

The world's best-selling textbook on book-keeping and accounting, Business Accounting Volume 1 continues to provide an indispensable introduction for students and professionals across the globe. It is renowned for clarity, with easy-to-understand language and a plethora of examples to aid your understanding. The 12th edition is updated to be fully compliant with International Financial Reporting Standards (IFRS). Other updates include new coverage of professional ethics, disaster recovery, and over 70 new examples to test your understanding. 'A benchmark for all accounting books.' Sarah Knight, former Finance Courses Coordinator, Huntingdonshire Regional College 'The writing style of the book is 'spot-on' and just the right tone - well done! I consider all chapters to be at the appropriate level, very practical and structured in manageable 'bite-sized' chunks.'
